Butchering on the Farm Farm butchering is but another system of marketing live stock. Meat is a valuable, but, unfortunately, a highly perishable product. Losses through improper handling, cutting or curing may easily eliminate the profits. Handling meat successfully necessitates a close attention to many details, most of which are very important. Extension bulletin 52 of the Nebraska College of Agriculture contains a general outline or guide for the slaughtering, cutting, curing and keeping of meat on the farm. There are various successful methods for most of these operations. In its 52 pages with 47 illustrations, this bulletin carefully outlines for each operation a method which has been selected as the one best adapted for beginners. ## HOUSE VOTES FOR FIFTY PER CENT SURTAX

STANDS PAT WITH SENATE TO MAKE WEALTH BEAR ITS SHARE OF EXPENSE

Washington, Nov. 17.—Disregarding the expressed wish of President Harding the house voted today, 201 to 173, to accept the senate amendment to the tax revision bill fixing the maximum income surtax rate at 50 per cent on incomes of \$200,000 or more.

Ninety-four republicans, most of them from the middle and far west, joined with the practically solid democratic minority in supporting the amendment. Announcement of the result brought applause from both sides, with some democrats cheering.

Three hours before the vote was taken, the house listened to the reading of a letter from President Harding to Chairman Fordney of the ways and means committee, suggesting that the house and senate compromise.

The executive said he still believed the original house rate of 32 per cent was "nearer to a just levy, and the more promising one in returns to the public treasury," but that in view of the legislative situation, he thought it "wholly desirable" that there be a compromise at 40 per cent.

"Would Meet Expectations" A compromise at 40 per cent, the president wrote, "would measurably meet the expectations of those who are above all else concerned with the return of hopeful investment of capital and the application of our capital resources to profitable productivity."

Immediately after it became known that the president had written, Mr. Fordney, spokesman for the "insurgent" republicans, said that the letter would not affect the result.

They had claimed ninety-three republican votes, or one less than was cast for the amendment. This vote settled the biggest issue between the house and senate on the tax revision bill, and the managers from the two houses will resume their sessions tomorrow with the hope of reaching an agreement on the bill by Saturday night.

Intervention of the president in the tax revision fight—the second since the ways and means committee began drafting the measure three and a half months ago—followed a visit to the White house today of Representative Mondell, republican leader. The president then summoned Fordney and Representative Longworth of Ohio of the ways and means committee and expressed his views on the surtax. These were supplemented by a letter to Mr. Fordney.

During the three hours' debate in the house, which was conducted under a special rule, the president was attacked for writing Mr. Fordney, Representative Frear, republican, of Falls City, returned home last week and was accompanied by Mr. and Mrs. Schaefer who remained for a short visit, returning home last Wednesday.

EXPRESS RATES ARE GIVEN AN AIRING State Railway Commission Adopts Interstate Classification—Refuses Some Changes.

The state railway commission has declined to approve some of the changes in classification and rates filed for adoption by the American Railway Express company. The new classification applicable to interstate traffic was adopted by the interstate commerce commission last January. The express company desired its adoption by the Nebraska commission as to state traffic but the commission says however desirable it is to have uniformity of classification to govern both state and interstate commerce it cannot abdicate the duties imposed upon it by the laws of Nebraska and make the commission's judgment conform to that of the interstate commerce commission regardless of the evidence before it. The state commission held a hearing June 1. It approves classification No. 27 with modifications, the same to be effective ten days after November 15 upon the filing with this commission of tariffs in conformity with its order.

The state commission considers only contested items in classification No. 27. It declines to approve the proposed rule eliminating pick-up service on fruit and vegetables. The company proposed to require shippers to send their shipment to the railway depots in below zero weather. The rule requiring not less than two paper bags to cover bunches of bananas in below zero weather is modified by the state commission by adding "or its equivalent." Double tagging of bananas is not disturbed.

The slight increase on charges on empty carriers is approved, so is the rule requiring fruit shipments of several packages to be fastened together or crated in bundles of four to ten. The locking or sealing of laundry hampers is approved. The proposed increased estimated weights for ice cream shipments is not approved. Added charges for collecting on delivery is approved. The increase on charges on daily newspapers from 1/4 to one cent per pound, where the merchandise rate is \$4.50 a hundred or less, is approved. The commission says one newspaper publisher attended a conference on this subject and assented to the increase. It is alleged postage rates have twice been increased since a change in express rates. The commission also approves the increase in change in express rates. The commission also approves the increase in charges on magazines and periodicals from one cent to 1 1/2 cents a pound. It finds there is really no increase in the new classification on patent insides or magazine supplements for weekly newspapers.

NEBRASKA MEN MENTIONED The Cornhusker team invaded the east to meet Pitt. Somewhere in the stands was one Walter Camp, sport writer, or else an aide de camp. Was there who "knew his onions," and out of it all came a complete Nebraska left wing with a perfect score. The Cornhuskers were well that of. Indeed Walter Camp, chooser of the All-American each season, has come forth giving a list of stars from which, if things conduced in their present course, he will choose his All-American phantom eleven this fall. Now to get to it. The complete left flank of the Husker team, Capt. Swanson, end; Lyman, tackle; Pucelik, guard, are all among his mentions for the great mystic eleven. The Cornhusker team has rated men high toward the unattained hope of making the All-American team but now Nebraska rests on the threshold of placing one or more men on the great eleven.
