To Save Is to Have

Suppose you save 25 cents a day. That does not mean much to the average man. You won't miss it.

Yet that 25 cents a day in ten years grows to nearly a thousand dollars. And the interest, which we pay you for saving your money, brings the total to well over eleven hundred dollars.

Think of what you can do with this.

Realize Your Dreams

Just a few years of small but steady savings will bring you many of the things you are longing for. Perhaps you want a car. Perhaps you want to buy the farm next to you. Perhaps you want to start a business, or to go traveling, or to educate yourself or your children. Saving will do all these. And best of all, you will have formed the saving habit and will never be one of the nine men out of every ten who pass their last years penniless—in the poorhouse or dependent on others.

We are extending greetings to the excellent citizen on this his birthday anniversary. Today also occurs the fifty-second anniversary of the proprietor of the Journal, Mr. R. A. Bates, and we are also extending to him our wishes for a long and successful life as we know he, like the doctor, has worked hard to make this community better for all.

An Excellent Citizen Called Last Thursday the funeral of the late T. S. Barrows was held at the home where he had lived for some time, and where it has been the experience of the family that a better husband and father could not have been possible. Mr. Barrows as a citizen of Murray has ever had it constantly in mind to accomplish the best for the town and its citizens possible. His departure not alone leaves a void in the household where he was honored and lived, but the place which he occupied in Murray will be long in filling in the way that the excellent man has filled it.

GOOD ROAD WORKER

The excellent condition of the road near the Lewiston church has attracted a great deal of attention from those traveling over it and one who has had a great deal to do with making the road what it is has not been given the credit that he really deserved and this is Pete Campbell.

Mr. Campbell was one of the hard workers on the project and is entitled to all the praise that is coming to him.

HOOVER IS IN FAVOR OF EARLIER CENSUS

Suggests that One be Held in 1925 or Thereabouts Because of Dissatisfaction With Last.

Washington, Dec. 12.—Because of a "considerable dissatisfaction" with the result of the count in the census taken last January, the house census committee is considering legislation providing for another enumeration of the population of the United States in 1925 or some other year prior to the next decennial census.

Secretary Hoover says today in that portion of his annual report dealing with the activities of the census bureau:

"This proposed legislation has my approval," Mr. Hoover says, adding that "it has frequently been contended that the distribution of the population as shown by the reports of the fourteenth census is abnormal; that prior to that enumeration there was a great movement from rural to urban districts which since the enumeration, has been neutralized in large measure by a reverse movement, and that this shifting of the population affected the totals for certain states, thus influencing the apportionment of representatives in congress."

Census-taking in January is disapproved on the ground that the weather in that month is a serious handicap to the enumerator, delaying the work and making it necessary "to take unusual precautions to insure a complete canvass. The report says the time for taking the next census should be in April, as was the case before the last census. The change for the last census was made, it says, at the request of various interests making use of agricultural statistics the idea being that more accurate statistics could be obtained comparing the activities of the farms if the canvass was made shortly after the end of the year to which it related.

Mr. Hoover also says that the new director of the census, William M. Steuart, is of the opinion that in order to advance the work of subsequent censuses it will be necessary that changes be made in methods of procedure, but not in the scope of some of the inquiries.

ENDORSED FOR FEDERAL JOBS Washington, Dec. 12.—Representative Jeffers returned today from his home at Omaha, where he has been for the past two weeks. He has recommended G. W. Harding to be postmaster at Ralston.

Representative Andrews has endorsed Dr. J. E. Brainerd for appointment to the pensions examining board at Superior, Neb., to fill the place made vacant recently by the death of Dr. J. W. Mitchell.

Walter H. Head of Omaha is here attending a committee meeting of the American bankers' association of which he is chairman of the officers.

HARRIS ASKS VIGOROUS PURSUIT OF "SLACKERS" Washington, Dec. 12.—Energetic pursuit and punishment of the more than 100,000 men who evaded the draft during the world war is urgently recommended by Major General Harris, adjutant general of the army, in his report made public today by the secretary of war. To bring those guilty to trial, he recommends that congress appropriate \$250,000 to pay rewards of \$50 for each deserter delivered to the military authorities.

Miss Kate Grant of Beatrice Here to Make Physical Inspection. of the School Children.

The children are examined for defects of eyesight, throat trouble, as well as defective teeth, and the result of the inspection noted on the card issued to the scholar and this is taken home by the pupil and turned over to the parents for action. In case of any disability being found, the parents are requested to have the child treated by a physician.
