### DIVIDING UP THE GERMAN CABLES

Program For Their Distribution Presented to Ambassadors Under Treaty of Versailles.

Washington, March 6.—Plans for the distribution of all cables taken over from Germany under the provisions of the treaty of Versailles were presented to the ambassadors of Great Britain, France, Italy and Japan by acting Secretary of State Fletcher, as chairman of the international conference on communications which is considering the final allocation of former German lines. The proposal was not made public, but will be transmitted by members of the conference to their respective governments for review.

Settlement of the former German cable lines in the Pacific was affected by distribution of those lines among the United States, Japan and the Netherlands at the time of the conference.

ference on limitation of armaments, but that allocation was made contingent upon division of the three former German cable lines in the Atlantic, Italy reserving the right to acknowledge distribution of the Pacific cables until her claims in the Atlantic lines had been met.

It was understood that the Italian government insisted upon receiving one-fifth of all the former German cables, either in kind or in monetary value, cash settlement to be applied toward the construction of a cable line from Genoa to the Azores. Interest of the United States and Japan was largely met by the allocations to them in the Pacific.

Bilious? Feel heavy after dinner? Bitter taste? Complexion sallow? Liver perhaps needs waking up. Try Doan's Regulator for bilious attacks. 25c at all stores.

### FUNERAL SERVICES HELD

From Wednesday's Daily.  
This morning the funeral of Mrs. Paul Bartek was held from the Holy Resurrection church on West Pearl street and attended by a number of the old friends and neighbors to pay their last respects. Father Ferdinand Suesel, rector of the church, conducted the service and at the close the body was borne to the Catholic cemetery where it was laid to rest. A number of the relatives from Omaha were here to take part in the last sad service.

Dyspepsia is America's curse. To restore digestion, normal weight, good health and purify the blood, use Burdock Blood Bitters. Sold at all drug stores. Price, \$1.25.

### BARRED ROCK EGGS

For hatching eggs call phone No. 270-W.—Mrs. C. E. Cook. 1104 W. 4th.

Blank books! Yes you can get of all kinds.—The Journal.

## LOCAL NEWS

From Monday's Daily.  
John H. Albert was among those going to Omaha this morning to spend a few hours looking after some matters of business in that city.

William A. Wetenskap was a passenger this afternoon for Omaha where he will spend a few hours with his wife at the Immanuel hospital.

Mrs. A. B. Taylor and Mrs. Thomas Sullivan were among those going to Omaha this morning where they will visit for a short time with friends in that city.

Roy Vickers and Ralph Ransford of Eagle were here today for a few hours, Mr. Vickers being called here to look after some matters of importance at the court house.

Mrs. Elmer Wetenskap was in Omaha yesterday where she visited for a few hours with her husband, who is at the Immanuel hospital recovering from a severe operation.

From Tuesday's Daily.  
W. J. O'Brien, state fish commissioner, was in the city today looking after some matters of business.

Mrs. John Beeson was a passenger this afternoon for Omaha to visit her mother, Mrs. A. L. Huffer, at the hospital.

Mrs. John F. Hitz was in Omaha today for a few hours visiting with her son, Fred, who is there at the hospital taking treatment.

J. G. Lohnes was in the city today for a few hours, coming down to attend the funeral services of the late John George Meisinger.

Mrs. Anna C. Kraft and son, William C. Kraft of Louisville were here today for a few hours looking after some matters of business at the county court.

T. H. Pollock, who has been battling with the flu for several days, has recovered so much that he is able to be out of the house, but is still feeling the effects of the attack to a greater or less extent.

Jack Cecil and son, Harley, who have been in the east attending the funeral of the brother of Mr. Cecil, returned home this morning, called here by the death of Mrs. Clifford Cecil, whose funeral occurs today.

Mrs. E. O. Furlong and little daughter, Doris, of Steamboat, Springs, Colorado, who have been visiting here with her mother, Mrs. W. A. Taylor, and other relatives on the farm south of the city for the past few months, departed this afternoon for their home.

### BROTHER DENIES BRYAN HOME DEEDED TO CHURCH

Lincoln, March 6.—The announcement that the residence of William Bryan, located southeast of the city, had been deeded to the Methodist Episcopal church for hospital purposes, was declared by Charles W. Bryan, a brother to be "premature, unauthorized and not reflecting facts," in a statement issued here today. Disposition of the residence has not been determined, Mr. Bryan said, the offer of which had been placed before the Methodist and Presbyterian churches at the same time.

A special board of the Presbyterian church came out from Philadelphia recently, inspected the home and returned to make a report. It is said the home was found unsuitable, but a final report would be made at a board meeting some time this month.

### YOUNG PEOPLE PUT ONE OVER

From Tuesday's Daily.  
The marriage has just been announced of Miss Dorothy Swatzlander and Henry Robert Herold of Plattsmouth, Nebraska, which took place on September 27th, 1921, in Holyoke, Colorado. The young couple kept the affair a secret even from their nearest and dearest until the other day, on their "anniversary," i.e. five months from date, when they broke the news to the home folks and then to the world. The young folks formed a warm attachment while students at the university, and both families smiled upon the engagement and expected wedding to take place next fall. Mr. Herold is traveling salesman for the firm of Henry R. Gering wholesale chemists of Omaha, and is doing the western territory. Later he will be transferred and will then locate in Plattsmouth where his family resides. He is a Nebraska boy and connected with several old families, the Germans notably, and all who have met him here are taken with his frank, clean cut manner and gentlemanly address.

Mrs. Herold, "Dorothy," needs no introduction, having grown here to gracious and charming womanhood, eldest daughter of Mr. and Mrs. W. E. Swatzlander. Mrs. Herold will accompany her husband over his territory and between whies they will be at home at the attractive Swatzlander ranch where they are receiving hearty good wishes from hosts of friends, including The Telegraph.—Sidney (Neb.) Telegraph.

### SNOW BRIGHTENS CROP OUTLOOK OVER STATE

Lincoln, March 6.—Although a foot of snow would be needed to make enough moisture to greatly benefit wheat in south central Nebraska counties, where the condition is bad from dry weather, A. E. Anderson, federal crop expert, said the Monday snow would brighten the outlook.

In eastern and western Nebraska, he said, the crop condition was good.

Barred Rock eggs for sale, 75c for 15, \$4.50 per hundred.—Mrs. W. C. Copple, Alvo, Neb.

## SOIL HERE IS FOUND IDEAL FOR ALFALFA

ANALYTICAL TESTS PROVE THE  
QUALITY BETTER THAN IN  
OTHER SECTIONS.

### SOME POINTERS ON RAISING IT

Given by the Forage Extension Mills,  
a Local Institution Interested  
in Increased Acreage.

A good many farmers are not aware that the grade of alfalfa grown on our river hills here is by analytical test shown to be far higher in food value than that grown in western irrigated sections and elsewhere. If any one doubts this, we have the certificate of analysis at our office, which they can see for themselves. Nor do many farmers know the value of alfalfa as a soil builder although it is figured to be worth at least \$8 per acre for this purpose. Many farmers cut five tons per acre last season which was worth at least \$10 per ton here. This figure, \$50 per acre, while corn would only figure about \$25 and lots more work, besides robbing the soil. Alfalfa and the Dairy have proven to be the ready money maker for the farmer—the mortgage lifter—the salvation in hard times. As Ex-Governor Hoard of Wisconsin, states: "This alfalfa movement is the greatest event of the century." The U. S. Department of Agriculture says that alfalfa is the oldest plant known to man, and that "it is the most valuable forage plant ever discovered, and we are now growing it successfully in every state in the union."

The lime soil of our river hills is especially adapted for the growth of alfalfa. While some farmers have had indifferent success with it, is due to several reasons. First, improper preparation of the seed bed and improper seed, or sowing seed improperly inoculated. The most valuable instructions we have seen published on these points is issued free by the Henry Field Seed company of Shenandoah, Iowa. We have a few left at our office which we will gladly give to any farmer interested.

Nothing has ever beat alfalfa and corn for either dairy purposes or fattening for market, only the proportions of corn differ for the purpose intended. Both should be mixed for best results and that is what the above mill in Plattsmouth was built for.

It is astonishing how little interest our farmers take in propagating this most valuable and easily raised forage. It is also true for hogs, sheep and even horses when fed as it should be. As a poultry conditioner and food it is also good. Feed is everything for the farmer and without it all else fails and so does the country at large as his prosperity is reflected in all industries. Several times our farmers here have seen the great value of alfalfa, which provided green pastures when all else had burned to the ground, and deeply rooted alfalfa held its own, thus forming the barrier against disaster.

Many farmers also do not know how to cure alfalfa. They are careless, not only in curing but in stacking and housing. The trouble is that they do everything else first, not realizing that alfalfa raising is a business by itself and will pay as a crop by itself. There are a few common sense rules which if followed will pay well, as all alfalfa is graded on the market when sold and if not in the proper condition there is loss to all concerned. It is one of the easiest crops raised and will net the most money.

Hoard's Weekly, published at Atkinson, Wisconsin, is the best dairyman's paper published and is an advocate of alfalfa. Most every edition has information worth the whole subscription. Farmers everywhere should read it. What is the use of working for a life time trying to learn something by hard knocks when a good farm paper like this

would put one straight in one issue? We are boosting for alfalfa for several reasons. One is that we have discovered that the best alfalfa in the world is grown right around here. The next is that we want to create interest so our farmers will each put in a little more than he needs himself, so that we can get hold of it to make a business for our alfalfa mill which will soon be fully equipped. The alfalfa meal that we make is shipped to mixing plants, where molasses is mixed with it, also other balances. These feeds are sold to dairymen everywhere, many located near large cities like New York City, where there are more than 25,000 dairymen who buy concentrated milled feeds. The difference between baled hay and milled hay is that the former will load only nine tons per car while the same hay milled would load thirty tons per car and feed with no waste. The milled feed business is only in its beginning. It is just as necessary to mill feed for highest production in animals as it is for human beings.

We think after this season the country will forget the war and enter into a full line of prosperity. The proposition of feeding the nation will always be with the farmers and it is a big job and our first attention must be with our animals. We hope our local farmers will study the benefits of alfalfa both for their own immediate benefit and also as a commercial sales proposition. Pretty soon our big mill will begin to holler for alfalfa and if the farmers don't have it we are out of luck and we both lose. If every farmer will put in a little more each year there will soon be a steady supply and a steady market.

We make the above suggestions for the information of our farmers and a good many who would like to see the alfalfa mill running all the time. At the present time hay is being shipped in here, but this is nonsense and mere negligence in developing one of our big assets—river hills for alfalfa, and making it strong as prosperity always follows alfalfa.

Yours very truly,  
FORAGE EXTENSION MILLS,  
L. C. SHARP.

## The World's Greatest Range!

Lined With Pure Copper Where Other Ranges Rust Out!

All Copper  
Clad Ranges  
are Copper  
Lined and  
Cannot  
Rust Out!

Malleable  
Iron  
Construction  
as Applied  
to Copper  
Clad Ranges  
is Superior  
to Cast Iron!

Beautiful  
Smooth  
Nickel  
Trimming!

Concealed  
Hinges  
and Catches!  
All Doors  
Double Panel  
With Air  
Space!

14-Gallon All  
Copper  
Reservoir!

By the use of malleable iron a Copper Clad Range is securely riveted, thereby making permanent air tight joints, such as cannot be had in a cast iron constructed range or stove.

Copper Clad Ranges are built with an air space between the copper and outer body, making a Thermus construction and conserving heat and saving much fuel.

Our best advertisement is your satisfied neighbor. Ask them. They will gladly tell you how much they appreciate the Copper Clad.

### FOUR WEEKS' DELAY IN TRIAL OF SMALL

Governor of Illinois Granted Half the  
Time Requested—Warned to  
be Ready April 3rd.

Waukegan, Ill., March 6.—The case of Gov. Len Small, charged with conspiracy to embezzle state funds, had another day in court today and took another adjournment, this time until April 3, four weeks from today. The governor asked for sixty days' delay, pleading his presence is needed at Springfield to get the state road building program for 1922 under way.

A half day in argument ended in Judge Clair C. Edwards' cutting the sought-for sixty days in half and serving notice on lawyers for state and defense that there will be no more delays and that they must be prepared to begin selecting a jury four weeks from today.

Arguments for and against the governor's motion for a continuance were featured by an extensive discussion of the state road-building program, the price of concrete, the ability of state department heads to carry on in the governor's absence and thinly veiled suggestions from James H. Wilkerson, assistant attorney general of Illinois, that the defense might be seeking to postpone the case until after the April primaries.

Vernon Curtis, who was confined to his home by quarantine when Governor Small was arraigned last month was present in court today and entered his plea of not guilty. The state asked that his case be set for trial immediately after that of the governor.

FOR SALE—Two hole corn shellers in good working condition, mounted on wagon elevator, cob stacker. Bargain if taken at once. Also Colony Brooder, 500 chick size.—C. L. Wiles, 3421.

### WOLF HUNT SUNDAY

There will be a wolf hunt held on Sunday at the Speck Island, south-east of the city. Hunters will meet at the American Legion rooms or at Geise corner at 9 a. m. Sunday.

## "Extra Stretch Top"

is a Holeproof Hosiery Feature!

This Extra Stretch top found in Ladies' Holeproof Hosiery means comfort to every wearer. Whether stout or slender this must appeal to you. It means much to the wear of the stocking and the stretch lasts.

You want a stocking that is glove fitting, one that has beauty in addition to one that wears. These things are embodied in this wonderful hose, and whether you pay

**\$1.00 for the silk faced  
\$1.50 and \$2.00 for the pure silk,**

you will get those things counting for

**Your Money's Worth!**

Black, Blue, White, Cordovan, Tan and Golden Brown.
