Safe Banking and Business!

With a steady hand we have endeavored to face the situation in the business and financial world during the times which are just now vanishing into the past.

We are now at the threshold of a better day; we are rapidly passing the crucial time and are entering into a time of prosperity. The products of agriculture are appreciating in price, and this is placing the farmer in better condition.

Let each one bear in mind this is the time for conservative and energetic action.

We believe in better times, and let us all try to make them permanent when they arrive. We are here to render the best service possible in the making of this prosperity for all, and making it lasting.

You All Have Waited!

Yes you have all waited for the decline of the price of lumber and it has come, and you are needing the buildings which you had thought to have had built. During the time the prices of your products have also advanced in price. This we are pleased to know.

The prices of lumber and building material has suffered as much a decline as any could reasonably expect. Really the tendency with the increased building which is sure to come, might strengthen the market some.

The young pigs will be safer with a good, dry warm place. The chickens will lay better with a sunny warm house. And how about your home? Is it as comfortable as the family need?

The world is going forward; let's us get busy.
