In the first oral test in the spelling 700 words there being after the 700 were spelled just six people of which the two Union girls were among the winners. OUT DOWN HOURS From Wednesday's Daily.

Notice was posted in the shops here yesterday announcing that until further orders, all departments of the Burlington shop would lay off on Saturday, making a five-day week as was in vogue during the winter months. For the past few weeks the freight car repair department as well as the coach shop have been working on Saturday. Since the other departments have been having the whole day off. The cutting down of the hours, it is claimed, is due to the coal strike and the shortage of the transportation demands.

- Summer MEDIUM HEAVY
- Winter MEDIUM HEAVY
- Transmission TRANSMISSION OIL
- Differential TRANSMISSION OIL

You Should Know EXACTLY Which Grade of Motor Oil to Use

It sometimes happens that an unusual operating condition in a given make of motor makes advisable the use of a grade of motor oil which would not have been used had the motorist used ordinary methods of selection or followed casual advice.

The matter of finding precisely the right lubricants for your motor—for everybody's motor—seemed so necessary to this company that our experts examined the entire field of automotive equipment; testing, checking and re-testing, until a chart of specifications was evolved which makes it impossible for you to go wrong.

This chart, called the Polarine Chart, is printed in the Red Crown Road Map, which has been mailed to every Nebraska motorist. If you have not received it, write direct to the company. A brief glance at the chart will tell you which grade of Polarine you should use. Follow the specifications consistently and much of the overhauling, replacement of worn or broken parts, burned-out bearings and other expensive and unnecessary repair jobs will be eliminated.

Polarine Oil is made in four grades—medium light, medium heavy, heavy, and extra heavy—but only one quality. Get the proper grade for your car—at the same place you buy clean-burning, scientifically balanced Red Crown Gasoline.

Fordson Seeded Fields

FERTILE fields and well prepared seed beds often produce low yields because of improper seeding.

The Fordson Tractor and Amsco Tractor Drill will get your crop planted at the right time and insure even seeding at the proper depth.

Seeding the Fordson way means early germination, even stand and rapid growth. It also assures even ripening of crop—better quality of grain and an increased yield.

Amsco Drills are equipped with double run force feed—with either single or double disc and ribbon steel tubes. Their strong angle steel frames make them equal to any strain put upon them and the Automatic Power Lift makes them a real one-man outfit. They are manufactured by The American Seeding Machine Company exclusively for the Fordson. Let us show you an Amsco Drill.
