JOHN DANIEL FENTIMAN PASS-**ED TO REWARD**

Had Lived in This County For Many Years and is Well Known All Over the County.

Again this community is visited by death and one of its citizens taken from their midst. On last Friday John Daniel Fentiman answered the final summons.

It is needless to comment upon the life of Mr. Fentiman nor to tell of his deeds of kindness-his neighbors and friends know this. He was ready and willing always to help anyone in time of sickness and trouble. Dan as he was always known was a man with a big, kind heart and he was of a sympathetic nature which made him a good and respected citizen. His loss will be keenly felt. Fol-

lowing is the obituary: John Daniel Fentiman, oldest son of John and Christine Fentiman was born September 4, 1856, a Plainfield, near Chicago, Ill.

At the age of nine years he re moved with his parents to Waterloo, Ia. Here he spent his boyhood. At the age of eighteen years he worked with a Mr. Gault, learning veterinary surgery. In 1877 at the age o twenty-two years he started in farming for himself in Atchison county Missouri. On October 24, 1882, he was united in marriage to Miss Rachel Alice Fine at Burlington Junction, Missouri. The following spring fered for sale. the young couple came to Nebraska and established their home on the farm five miles south of Elmwood. The lot of pioneers has been their part in the growth of Elmwood and vicinity. Five children have been born to them, Cora May Nash of Palmyra, Neb.; Myrtle B. Robertson of Lincoln, Neb.; Ray D. and Pearl Mabel Fleischman, twins, and Clifton J., all of Elmwood. Mrs. Fleischman preceded her father in death Novem-

ber 18, 1918. In December 1913 he retired from active farming and moved to Elmwood where he has enjoyed the companionship of friends and acquaintances. In 1916 he was granted a state permit and continued in active veterinary practice until overtaken by the illness that called him over the great divide. After a severe illness of over two weeks passed away at his home at five o'clock in the morning of May 26, 1922, aged 65 years, 8 months and 22 days. He is survived by his wife, two sons and two daughters, two brothers and two Neb.: George D. Fentiman, Oelwein, Iowa; Mrs. Hattie Root, St. Paul. Minn., and Mrs. Grace Loomis, Sacramento, Cal.

STATE HIGHWAY **BUREAU IS GIVEN** WHITEWASHING

Committee Appointed by Legislature Reports Nothing "Irregular" but Flays Counties.

Lincoln, June 2 .- Twenty-five repesentatives of Missouri Pacific towns between Auburn and Springfield took luncheon at the chamber of commerce Friday with Secretary W. S. Whitten. They were here to present to the state railroad commission their opposition to the proposal of the Missouri Pacific to cancel two local passengers and substitute mixed trains. Towns represented were Auburn, Talmage, Otoe, Brock, Lorton, Dunbar, Avoca, Weeping Water, Manley, Louisville and Springfield.

Thirty protesting representatives of ten towns along the line of the Miss Rose Scheel, one of the pop- Missouri Pacific between Talmadge ular young ladies of this vicinity, and Omaha were present in the sengave her friends a great surprise ate chamber at Lincoln yesterday when they learned of her marriage morning when the state railway comooking after some business matters on Monday, May 22, 1922, to Frank mission took up the application of in Omaha last Thursday and were actrains No. 637 and No. 638, which The bride is a daughter of Mr. and operate daily between Falls City and

but fairly begun when the lunch hour is necessary to eliminate these two The groom had every opportunity trains in the interest of economy, to farm on a highly improved place, proposing to substitute a mixed train

The operation of the train costs would be necessary to have thirteen passengers a day on the average from each of the ten stations into Omaha, tions averaging less than one person

The train now operated leaves Falls City early in the morning, at and reaches Falls City at 6:45. The substituted mixed train would leave Auburn at 7:25 in the morning and reach Omaha at 2:40, laying there over night, while its companion train south bound, would leave Omaha at 6:20 a. m. and reach Auburn at

1:15 p. m. The objecting towns say that this deprives them of a service that they are justly entitled to, having been built up on this schedule, and that the question of whether the trains pay or not is not the vital thing which is adequate service. The company retorts that the bus lines and the privately-owned automobile have left it but very few passengers to carry. It submitted figures showing that there is an average of 3.6 automobiles in the territory, counting in those of the farmers, but not the farmers themselves in the equation.

Mr. Kirk said that every morning at 7:25 a bus started from Syracuse and stopped at every town along this line of railroad, reaching Omaha at 9:45 and returning at 5:10 p. m. from Omaha, reaching Syracuse at 8 o'clock. He said there is another bus which starts at Weeping Water interrupted to say the latter bus had

been taken off. Superintendent Kirk said that be cause of the rates of pay for enginemen and trainmen it is cheaper to run the trains the 220 miles from the 160 miles from Auburn to Omaha and back. He said this was be-

mums for the train crew members. The engineer draws \$13.20 a day for his eight hours work, which Mr. Kirk said was \$23 a month more than any division officer, except himgineer and fireman lay off four days The engineer is paid six cents a mile and when he has run 4,800 miles he lays off the remainder of the month. The conductor and brakemen draw overtime each day because their minimum is 150 miles, whereas the run is only 110 miles. This does not work out in the case of the engineer, whose minimum is 100 miles, but it would if the train were run from Auburn, a distance of 80 miles.

The Anker-Holth Gream Separator

THE ONLY SEPARATOR WITH A SELF

The Anker-Holth bowl can never get out of balance as the self-shifting discs create a perfect balance of the bowl. The discs are interchangeable and do not have to be placed in numerical order as in other makes of separators.

Old discs can be replaced by new ones which cost only a f ew cents and the bowl will never have to be sent to the factory for re-balancing.

The Anker-Holth separator is a self oiling machine, having no oil cups or oil holes to care for. It will outlast any other separator, as all the gears and bearings are continually flushed with oil.

We ask that you call and see this machine on our floor. Sent out on 30 days trial in competition with any make separator you may want to select. You to be the judge and if the Anker-Holth doesn't do the most for you, just load it in the car and return to us.
