Building Your Wealth!

A bank works for you night and day, week after week, adding cents to your dollars. Little by little the amounts grow till each addition is a respectable sum.

Where does the gain come from? Not from your pocket. Nor from ours. It is the result of production. Money placed in a bank is given an opportunity to work and to produce.

Thus a bank BUILDS your wealth.

Start with a small deposit if you will. Add to it when you can—regularly if you can do so. It will not be long till you can fairly see it grow.

The Loyal Neighbors
This is not an auxiliary of the M. W. A. but a real live proposition of true-hearted Americans living in the vicinity of Murray and imbued with the proper spirit. During the past few weeks Mr. J. B. Seyboldt has been in the hospital and in very critical health, no one knew whether he would be able to return home and while he is getting along as well as could be expected, still there is a grave danger existing. But while he was kept there his son, William Seyboldt, and wife, were very attentive to the invalid and ministered and cared for him as best they could. The neighbors, and we claim the right to call them Loyal Neighbors, at that have slipped over into the fields of Mr. Seyboldt and son, and cared for them in a true neighborly way and the fields as we passed them only Tuesday with some of the true-hearted citizens of that neighborhood
