Attorney Graves Nearly Robbed We could not say what day, but not a week ago, Attorney Graves, having a few moments at his disposal sauntered down to the creek south of Union and there threw out his line. Little he knew when he cast his hook that it was a far flung proposition, for he was successful in securing some ten fish, most of them of good length and some of them longer. Of course somewhere else always looks better, even for fishing, and the barrister anchored his catch in the margin of the stream and went up the stream where he secured two more. Being satisfied, he went back for his former catch and found that the turtle had been making a meal from some of the fish, having eaten the half of the larger ones. This is a fish and turtle story.

SEATS TO LEGION SHOW GO ON SALE WEDNESDAY AT 5 In addition to the cut of \$1 in the price of tickets from last September when the show, you won't have to pay war tax to the Legion's boxing and wrestling match next Tuesday night.

Some time ago congress passed a law exempting American Legion entertainments from tax. This was construed to be applicable only when all performers received a stipulated sum for their services, but later a ruling has been made to include cases where entertainers work on percentage providing that percentage is not exorbitant or the possibilities of an extraordinary large crowd such as to give the performers an unusual amount.

The Legion committee has been in correspondence with Mr. A. B. Allen, collector of revenue for the Omaha district, being required to list in detail the seating capacity of the Air-line theatre, where the show will be held, together with the percentage paid each of the participants and was able only today to obtain by telephone a ruling on this matter by Mr. Allen.

The tickets will go on sale Wednesday afternoon at 5 o'clock at Dunbar's Billiard Hall and the Palace Shining Parlor in Plattsmouth. The Green Bus line management and the Schwake Drug company of Nebraska City will look after selling them there. Baseball Headquarters will supply the Omaha fans and a large block of seats will go to Ralph Larson of the Bank of Commerce for the Louisville fans.

HITCHCOCK BARES FALSE CLAIMS OF THE TARIFF PROMOTERS

German Trade Competition Not Hurting U. S. Business, Instead is Best Customer.

Washington, June 20.—The excuses made for the high tariff schedule in the pending tariff bill on the ground that German trade competition is injuring the business of the United States are characterized as "hoggy and a myth" by Senator Hitchcock in the senate today. Senator Hitchcock announced that he would take the floor tomorrow in the senate and prove to the republican proponents of the tariff that German competition was not injuring United States business, in the least, but that the tariff, by making it impossible for Germany to sell to us, and therefore for us to sell to Germany would result in cutting down business in this country.

"I will show tomorrow that the so-called German competition is a hoggy and a myth," Senator Hitchcock declared, "and that the attempt to erect a tariff barrier is an attempt to continue commercially a war which stopped a long time ago in a military sense, and that it is wholly unnecessary and in the interest of a few manufacturers at the expense of the American public." Germany is our best market and customer at the present time, Senator Hitchcock said, and the statistics show that while Germany's exports to the United States are only one-third what they were before the war, the exports of the United States to Germany are three times what she exports to us.

Senator McCumber, defending the bill, declared that he did not believe the manufacturers in this country would raise the prices after the passage of the tariff bill. "If the manufacturers do not intend to raise the prices or intend to reduce them, then what is need of tariff," Senator Hitchcock asked. "We are right now on the eve of a great era of trust formation," he continued. "The trusts are forming and this tariff will which you are trying to erect in this bill," Senator Hitchcock introduced a resolution passed on June 1 by the Retail Hardware Dealers' association of Nebraska at their convention at Crete. The resolution condemned the tariff bill as a "needless increase in prices." The retailers said that increased prices would ruin their trade, and they asked all Nebraska senators and congressmen to oppose the bill.

POLITICAL BOOMLETS ARE LEGITIMATE ADVERTISING

A press dispatch from Lincoln reads like this: "The executive committee of the Nebraska Press association has established headquarters here for the announced purpose of creating a publicity and advertising department, handling its own political advertising and serving as an agent for the various political events and other attractions that are scheduled between now and the November election. Miss Naomi Buck, daughter of Ole Buck, secretary of the association, has been placed in charge. "There was a time when the newspaper publishers were supposed to whoop it up for the candidate of their party, simply as an evidence of party regularity, but that time is passed. True it is that an editor gives editorial endorsement of a candidate or of the principles he represents as a matter of public concern, but to go it blindly and devote time, energy and valuable space in the espousal of a party is neither profitable nor justifiable further than the public weal is involved. Political advertising has become a legitimate and necessary method of publicity. Candidates appreciate the need of propaganda that will place before the public their particular qualifications irrespective of party endorsement. Primary election laws have greatly enlarged the necessity of such action. Where several candidates for the same position seek public approval it is absolutely necessary for candidates or their friends to make known their particular qualifications for the position to which they aspire. "The Nebraska Press association in an organized and business like way has espoused a cause that may well be featured by the organizations in other states."

Mr. Pinkerton said he thought the punishment used in the Puritan days would be more effective today than jail sentences.

Adam McMullen

of Beatrice
Farmer, Practical Business Man, Lawyer, Civic Worker, Legislator
FOR GOVERNOR

The Lincoln Evening State Journal at the close of the Senate Session 1917 said:

"Mr. McMullen has served three terms in the state legislature, in the house during the 1905 and 1907 sessions, when he had a part in moulding the most progressive legislation ever put on the state statutes, the primary, the anti-pass, railroad rate control, railway commission and other enactments. Mr. McMullen has been senator from Gage and Pawnee counties for the past two years.

"Mr. McMullen was born in New York, but for thirty-four years has been a resident of Gage county. He worked as a newspaper reporter in Lincoln while studying at the State University, from which he graduated. Later he graduated from the Columbia Law University at Washington. He practiced law for some six or seven years, but in recent years has been engaged in extensive farming operations and has not followed his old profession. He has lands in Nebraska and elsewhere.

"Senator McMullen has been one of the progressive republican leaders for a number of years and during the last session was the most pronounced exponent of square-toed Americanism in the state senate. He is an excellent speaker, just in his prime, and is well known over his district."

PRESIDENT AND CABINET DISCUSS RAILWAY STRIKE

All Agencies of Government Determined to Prevent Walkout—Trains to be Run.

Washington, June 20.—With all agencies of the government determined to prevent a railroad strike if possible, and to make the strike ineffective in its efforts to paralyze transportation, if it does come, the issue was a subject of discussion at the cabinet meeting today.

Following the cabinet session, nothing was disclosed as to the trend of the discussion, but it is known that the president's advisers are keeping in close touch with the situation and that plans are under way to deal with any emergency.

Cannot Change Laws At the capitol there is considerable apprehension, but the view of the majority seems to be that there is nothing that congress can do in a legislative way to relieve the situation at this time.

No plans now exist, it was stated, for amendments of the Cummins-Eash law, Senator Cummins, Iowa, chairman of the interstate commerce committee, still believes that there will be no strike and sees nothing that congress can do to prevent it, though he thinks, however, that the government would break the strike.

"I cannot bring myself to believe that there will be a railroad strike," said Senator Cummins. "The country cannot go through a railroad strike on top of the coal strike. The government would not permit the suffering that would follow such a calamity.

No Changes Planned "But there is no program now for amendment of the transportation act. About the only way the act could be amended in the present situation would be by the insertion of penalty clauses directed at railroads or employees disregarding the awards of the railroad labor board and making strikes a conspiracy. But it is un-

les to talk of that because you cannot get such legislation through congress at this time. That is certain. "If the strike should come, the government would have to see to it that trains continue to run. There is no alternative."
