**HAS EMPLOYEES ENJOINED**

The C. B. & Q. railroad company has enjoined nine of its employees at Pacific Junction who were on duty at the time of the death of G. W. Mullica in the yards at Pacific Junction. This injunction prohibits them from discussing the events of the death accident with any one so as to encourage further court action by the administratrix of the estate of G. W. Mullica.

A certain agent of a Minnesota legal firm represented to the administratrix that Iowa courts would not give her full justice. He based his representation on information received through eye witnesses of the death of G. W. Mullica. This caused the administratrix to allow a suit to be started in a Minnesota court which involved much expense on the part of the railroad to defend. The men enjoined are M. A. Melody, C. A. Morgan, G. W. Larson, Louis W. Hansen, L. Lutter, I. E. Doran, Vern Price, H. D. Nelson, J. R. Supple.—Glenwood Tribune.

**SEEK TO END THE MINE STRIKE THRU CONFERENCE**

Administration is Hopeful of Getting Miners and Operators Together in Conference.

Washington, June 23.—Along with official expressions of regret for the mine strike outbreak in Illinois it was made known today that the administration still was pressing efforts to bring about a settlement of the bituminous coal strike thru a conference between the two parties and has some hopes of success. There were White House intimations that publicity for the details of the attempt would not be helpful and that details consequently would be withheld.

President Harding was said to deplore the Herrin events and to realize in their evidence of the bitter hostility arising out of the strike while Secretary of Labor Davis was twice in conference with the president during the day issued a statement declaring that those responsible for the outrages in the Illinois mining town should be punished to the fullest extent of the law.

The president is awaiting an official report on the events in the Herrin field which he is said to expect shortly. Labor department agents have been in constant touch with strike developments since April 1 when the miners walked out in all union fields.

Efforts to bring about desired settlement would be made along the lines of getting the mine operators and the miners' union representatives into a joint gathering, Secretary Davis indicated.

The miners' leaders, however, have countered in the informal negotiations with a proposal to meet in a national conference fixing wages at one time for all fields or attempting the task. The union territory have, in public, held out steadfastly for a series of district and state conferences of any kind.

Mr. Davis has had several special assistants interviewing individuals on both sides, endeavoring to find a common ground for a meeting. The present prospects that this could be done were said to be some weeks.

**The Race Victory at INDIANAPOLIS The Road Victory at WICHITA Help You Choose Tires**

500 miles at 94.48 miles an hour—a relentless grind over a rough-finished, sun-baked concrete and brick pavement at record-breaking speed—that is the grueling test Oldfield Cord Tires underwent successfully at Indianapolis Speedway May 30th. They were on the winner's car for the third successive year and on eight of the ten finishing in the money, upholding the confidence successful race drivers have in the trustworthiness and ability of these tires to meet the greatest demands of speed, endurance and safety. Their records in every other important race have been equally as good.

Consider this achievement along with another test of Oldfield quality made at Wichita, Kansas, this past winter and early spring.

34,525 miles on rutted, icy Kansas roads, running day and night on a Studebaker stock car without a single tire change. This test was made by a group of Wichita automotive dealers in a tire, oil and gasoline economy run. Mayor Kemp of Wichita was official observer and made affidavit to the mileage and service given by Oldfield tires.

You may never subject your tires to the grueling experience of Indianapolis nor the steady grind of bad winter roads, but it is good to know you can get such safety and mileage economy by buying Oldfield tires. Ask your nearest dealer.

**165% Increased Business**  
The buying public is the surest barometer of the value of any article. Their approval of Oldfield value has been demonstrated by the increase of 165% in business for the first five months of 1922 over the corresponding period of 1921.

Agents Everywhere  
Oldfield Tires are distributed through 73 branches and distributing warehouses in all parts of the United States. More dealers are constantly becoming Oldfield agencies and Oldfield Tires are now available in your community.
