Celebrates 62nd Birthday

Mrs. A. F. Rhoden very uniquely managed a surprise on the father of her husband, D. C. Rhoden, which was celebrated last Sunday at what is known as the Rhoden grove picnic which was in store and suggested the bringing of well laden baskets for the occasion.

The dining tables were placed in the shade of the large trees of the grove, and accommodated nearly one hundred who were present.

Mr. Rhoden has been in poor health for some time, and this cheered the Murray townsman greatly.

Besides the sumptuous dinner that was served in the grove, a very delightful program was given at the home of Mr. and Mrs. A. D. Rhoden just across the way. There were thirty-one guests, including Mr. and Mrs. John A. LEOPARD WHICH ESCAPED SHOW KILLED BY BOY

Fremont, Neb., July 5.—The large leopard which escaped from a circus exhibiting at Uehling Saturday and terrorized the countryside for miles around, was shot and killed less than a half mile from the place of its escape late today by a young man, one of the hundreds of farmers, business men and boys who had hunted the animal all thru the night.

While persons carefully remained indoors last night unless they were taking part in the chase, they apparently had little fear so far as the leopard was concerned, the fugitive heard itself evidently being frightened by unaccustomed freedom and was keeping close to wooded tracts.

It was tracked over more than fourteen square miles.

SEVEN THOUSAND IMMIGRANTS ARE ADMITTED

New York, July 1.—The lid of the "melting pot" was tilted tonight as the influx of seven thousand immigrants to the United States started.

The beginning of the new immigrant year was marked by mad races of steamships. Under the law only three per cent of any country's nationals may be admitted in any one month.

Lines violating the quota must pay \$200 for each excess immigrant, refund the passage charge to the United States and provide home passage free. Ellis Island authorities admit those who arrive first until the quota is filled.

The greatest rivalry was between ships bringing Greeks. It was that that at least 200 Greeks would have to be returned.

TRICK OF FAKIRS

Frank M. Davis, a Chicago post-office inspector, ran across a letter that offered "Genuine Canadian rye, \$8 a quart. Only a limited supply. Sent by registered mail."

Davis sent \$8—and got a quart of rye grain.

The two ambitious who sent the letter in custody, charged with using the mails to defraud, must be praying that the jury will have a sense of humor.

This is the "best graft" since the fakirs who advertised a genuine steel engraving of George Washington for \$5—and filled orders with two-cent stamps.

Clever brains like these could get rich quickly in legitimate pursuits. Unfortunately, they are too impatient.

CORN IN STATE IS LOOKING GOOD IN ALL SECTIONS

Wheat in Southeastern Part of State Ripening Well and Good Yield Expected—Corn Good.

An excellent condition of corn, fair to poor condition of small grain crops and potatoes particularly in the southern half of the state, a light second crop of alfalfa and more than usual damage from hail are the leading features of the semi-monthly report of the Nebraska Department of Agriculture and Bureau of Agricultural Economics (formerly Bureau of Markets and Crop Estimates).

The condition of corn is generally good throughout the state. The fields are free from weeds and in a good state of cultivation. The preliminary estimate of acreage will be made in the regular July report.

Considerable of the winter wheat in the southeastern quarter of the state will make good yields in spite of the early and rapid ripening of the grain. Counties bordering the Missouri river and the Platte river have the best yields. South and west of these counties the percentage of shriveled grain is greater. Hail damage was greater than usual this year, some of the storms being very extensive.

The percentage of shriveled grain is greatest in central, south central and southwestern Nebraska. While some of the counties within this area have fairly good wheat crops, others suffered severe damage from the premature ripening of the grain.

The damage to barley, spring wheat and oats, particularly early oats, in the southern half of the state is very severe. The northern half of the state fared better although some injury is evident. South central Nebraska replaced considerable of the abandoned winter wheat with barley, oats and some spring wheat all of which suffered severe damage.

The earliest potatoes in the southern half of the state are badly damaged as the drought and high temperatures came at the critical time. The early plantings and the crop in the northern half of the state are in fairly good condition at present. The early commercial potato crop in the Kearney district is better than expected and may exceed last year's shipments by fifty per cent.

The second crop of alfalfa is very short in most of the counties. The raspberry crop was reduced considerably by the drought. Apples continue promising. The cherry crop was heavy throughout the state.

A NATION ON THE JOB

Czechoslovakia is essentially an exporting country. Its production of sugar, textiles, glass and beer, together with its less important manufactures, have been an important factor in European industry and commerce for many decades.

Appreciation of this situation has led to marked activity in the negotiation of commercial treaties, and already Bohemian products are being marketed under agreements in Switzerland, Jugoslavia, Germany, Bulgaria, France, Roumania, Italy, Austria, Poland and Spain.

Similar arrangements are in the making with Great Britain, Denmark, Belgium, Holland, Greece, Norway, Hungary, Sweden and Portugal, while there have been trade conversations with Russia.

Czechoslovakia can take care of herself. The world will watch with interest the progress of less fortunate sister republics toward the realization of their hopes.
