**The Copper-Clad Range**

The strikingly beautiful outlines of the Copper-Clad Range stops every woman. As she looks and admires, she finds that it is true beauty—the beauty of simple elegance and perfect proportions—of fine finish—the thoroughbred of the Range World.

Look for hinges on the above—two only on the oven door and they are long and smooth. There are six other doors yet not a hinge in sight, not a catch, nor hook nor latch. Built like fine automobiles, the hinges are all inside.

**The Copper-Clad Range**

With White Enamel Trimmings

"Copper-Clad" means pure Sheet Copper is placed BETWEEN the sweaty asbestos and range body. To place it elsewhere would be like climbing on top of a roof to get out of the wet.

SET OF ELEGANT  
**This ALUMINUM WARE Free**

IF YOU BUY A COPPER-CLAD RANGE NEXT WEEK

"Free" means that this ware does not cost Copper-Clad buyers a single penny. It is a reward for buying while the "Copper-Clad Crank" is here and is offered by him to justify you in attending this sale.

This ware is very substantial and just the kind that you would select if buying for your own use. The 7-in-1 convertible cooker takes the place of seven different vessels as shown by figures 1, 2, 3, 4, 5, 6 and 7. You can use this utensil in some form every day.

Free to every Copper-Clad buyer during this sale. Come—See the Asbestos Sweat.

**COPPER-CLAD WEEK**

Next Week, Sept. 18-23

No matter whether you want a range now or next year or any other time, it will pay you to come and see the Copper-Clad Crank make the Asbestos Sweat.

He takes any piece of Asbestos, puts it between two iron plates—heats it—and shows you the sweat. You can roll it up in drops with your finger.

Every good range must be lined with asbestos to hold the heat around the oven and

keep down fuel cost. Every time the range cools off, the asbestos takes moisture out of the fresh air circulating through the range like a blotter takes up water. When you fire up, this moisture is driven by the heat to the outside against the cold range body and starts Sweat-Rust on the inside where you can't get at it even though you know it rusts. Sweat-Rust ruins thousands and thousands of otherwise good ranges every year. When the range body is gone, the range is done for.

**The Copper-Clad Idea is "Pure Sheet Copper Between the Asbestos and Range Body."**

Copper never rusts. It may tarnish but it will last centuries. There are Copper Domes that have been defying the elements for hundreds of years. So, when we say a "Copper-Clad can't rust out," we mean that the copper lining overcomes all internal rust. An oiled rag will keep the outside free of rust—and there are no fussy ornaments full of rivets and bolts

to skin your hands. The Copper-Clad wipes clean like a dish.

If these things are so—you should know it. Not by hearsay—but by the evidence of your own eyes. Remember, this "Copper-Clad Crank" is here to tell—to show—to explain. He delights in it. You won't "bother" him by asking questions. He has oodles of time to answer and he is here to "Show You."
