RAIL LABOR BOARD HOLDS FARMING **OUT WORK ILLEGAL**

Decisions in Three More Cases Declare It is Attempt to Evade Provisions of Rail Act

Chicago, Oct. 5 .- The United States railroad labor board handed down three decisions holding, as in former cases, that the contracting of railroad work to outside agencies 5,000.00 of railroad work to outside agencies 1,012.32 was fliegal because the practice attempted to evade the provisions of the transportation act.

Two of the cases involved grievances of the maintenance of way union against the St. Louis & San Francisco railroad. The union charged, in one case, that the road contracted out the resurfacing of its trackage to outside agencies and in the other that the carrier contracted out its positions of pumpers and coal The road held that the "farming out" of such work was customary, but the board ruled against the practice.

The third case investigated was that of the New York Central railroad, the brotherhood of railway and shop clerks maintaining that the carrier contracted its freight handling to the New York Marine company and to William Spencer & Sons at certain points in New York city. This case was also decided against the road.
