It is the Matter of the Best Hog

When hogs are high and feed is low any old critter will show a profit, but when hogs are low and feed is high it takes the best of stock and rightly kept to register on the right side of the ledger. W. T. Valley living a few miles northwest of Murray has a hog which is a few weeks over two years of age and will approximate between 1,100 and 1,200 pounds. He is named "Checkers" and he also has a fine sow which cost him some three hundred dollars and he considers she is well worth the price at that. When times are hard and money scarce these are the kind of hogs to grow. Drop around and see Walters layout when you have an opportunity.
