We hope the effort of a few of the dissatisfied to remove Col. Tom Majors from the normal school board at Peru will prove futile. Tom Majors is a grand old man of 82 years, and is the founder of that institution. It would be a disgrace to remove him at this time, and we hope Governor Bryan will pay but little attention to the disgruntled. He is almost on the verge of removing himself. So let him remain what few years he has of life. We are a friend of Col Majors and always admired him.

PRESIDENT COOLIDGE

What manner of man is this thrust suddenly into the presidency of the United States out of the mist that has clothed almost every vice president from time immemorial? What qualities and tendencies has he manifested from which the nation can deduce his probable course in the months ahead? Has he inherited those staunch attributes, the courage, the conscience, the faith associated in tradition with the hills of his New England?

In his first public pronouncement as president, Calvin Coolidge declared, "It will be my purpose to carry out the policies which he has begun for the service of the American people and for meeting their responsibilities wherever they may arise," and his first public act is a request that every associate of Warren G. Harding remain at his post.

Does this constitute the true faith to which he will hold? Will he be guided by the spirit of Harding or is there in Coolidge an individuality capable of some overwhelming impulse which will redirect his course and mark him apart for posterity? There is no infallible omen of his future; one can assure himself of no accuracy even in essaying to prophesy the Coolidge of tomorrow by the man of today. The president performs strange miracles with its material; its magnitude may inspire the occupant to realize every potentiality of greatness or it may defeat him utterly. No president has ever left the White House as he entered it; he must be greater or less.

Of Coolidge's ultimate capacity, then, little can be forecast. Of his present character it can be said that he is precisely all that one implies in the sobriquet, Yankee, he has a considerable reputation for shrewdness, he is unexcited, he is inclined to think directly. His instinct for creating an apt and memorable phrase has sometimes been compared with Woodrow Wilson's. He speaks in the fewest words, either through a natural predilection or because his public career is in great part the creation of the late W. Murray Crane of Massachusetts the epitome of the common association of silence with sagacity.

Coolidge is by preference a lawyer and by instinct a politician. He is not wealthy, has no flair for society, he is no mixer in the accepted sense. He is a public servant of a type commoner in New England than elsewhere. He forswears any appearance of projecting himself into favor, yet he has periodically found himself in a position where his shrewdness and his capacity for inspiring confidence in person who may not attempt to reason why, have combined with the vagaries of Providence to carry him to greater political heights.

Coolidge until now has been a man who prefers to talk in terms of broad principles. What concrete policies will spring from the exercise of these policies if he finally distinguishes his administration from that of Warren G. Harding, is hard to say. His career to date has produced a great assortment of conflicting estimates of the man; that he is a conservative with a mild liberal tinge, that he talks like a liberal and acts like a conservative; that he is at bottom a liberal. As governor of Massachusetts he signed many measures ameliorating conditions of employment in that state, but in this his state was not a pioneer. He has been a party regular from the beginning, yet he is an ardent admirer of the Roosevelt tradition and frequently employs a theme derived from Roosevelt: "Disaster will come from those who, probably with good intention, seek the private control of public action."

He was first propelled into public action through his stand in the strike of the Boston Police Union, a disorder handled in its physical phases by other and extremely capable men. But the principles involved were first crystallized into words by Coolidge, and doubtless no one had a clearer conception of their various values.

In his address to the Massachusetts senate on the occasion of becoming its president, he declared: "Do the day's work. If it be to protect the rights of the weak, who ever objects, do it. If it be to help a powerful corporation better to serve the people, whatever the opposition, do that. Expect to be called a standpatter, but don't be a standpatter. Expect to be called a demagogue, but don't be a demagogue. Don't hesitate to be as revolutionary as science. Don't hesitate to be as reactionary as the multiplication table. Don't expect to build up the weak by tearing down the strong. Don't hurry to legislate. Give administration a chance to catch up with legislation."

If one can gauge his man from these words he is entitled to try. His opposition in Massachusetts inclined at the time to call them mere words of which there was superabundance in national politics at the moment, and to suggest that one definite policy is worth several hundred programs. Yet the estimate one makes of Coolidge must be grounded on such declarations of principles. And he is abundantly equipped with the familiar philosophy of his school:

"That the rights of every citizen are to be protected by every power and resource of the state.

"That men do not make laws but discover them; laws must be justified by something more than the will of the majority; they must be founded in righteousness.

"That we need a broader, firmer, deeper faith in the people—a faith that men desire to do right, that the commonwealth is founded upon a righteousness that will endure, a reconstructed faith that final approval of the people is not given to demagogues, slavishly pandering to their selfishness, merchandising with the clamor of the hour, but to statesmen ministering to their welfare, representing their deep, silent, abiding convictions.

"The republican party in the future as in the past will stand opposed to the establishment of one class who shall pay the taxes. Government under the republican party will continue in the future to be administered so as to breed not mendicants but men."

From these threads we must weave a temporary design that will signify Calvin Coolidge, letting time color it here or there or alter it completely discarding gradually the picture we conjure from the principles he enunciates and substituting the clear likeness born of policies in action. For two years he has been the subject of the most irreconcilable appraisals. Today he is as mystifying to many appraisers as the morning he arrived in Washington. But these are times when no man in the presidency can remain inscrutable indefinitely.

Calvin Coolidge once wrote a book entitled "Have Faith in Massachusetts." America seeks to feel that Massachusetts has not failed her in the man who has become the unwilling beneficiary of a national tragedy.
