UPDIKE IN FAVOR OF A BOOST IN TARIFF

Tells President Coolidge it is Necessary and Predicts it Will be a Reality in a Few Weeks.

Washington, Nov. 15.—Nelson B. Updike, publisher of the Omaha Bee, after a talk with President Coolidge, today predicted that a higher tariff on wheat "as a means of aiding the middle west farmer, will be a reality in a few weeks."

Declaring that he had been amazed to find that the president "had voluminous and accurate information at hand concerning the middle west conditions," Mr. Updike said that "it will be gratifying to the wheat farmers of the middle west to learn that the first thing President Coolidge has done is to take steps to meet the present emergency as it now exists and permit other plans to work out as fast as possible."

Speaking of the investigation ordered by the tariff commission into wheat duties he asserted that the president "emphasized the fact that if the investigation showed facts to justify the high tariff as it is my opinion it will prove, the higher tariff will be only for the purpose of meeting the present emergency in the wheat belt."

"Meantime," he continued, "everything will be done to avert a similar condition among wheat growers in the future and the president asserted that every facility was being pressed into service to carry on an investigation of proposed plan for permanent relief of wheat farmers such as: 'Pushing to completion an investigation for the purpose of readjusting and lowering of freight rates on export wheat and wheat products.'"
