## THE LORD'S PRAYER

Our Father which art in heaven, Hallowed be thy name. Thy kingdom come. Thy will be done in earth, as it is in heaven. Give us this day our daily bread. And forgive our debts, as we forgive our debtors. And lead us not into temptation, but deliver us from evil: For thine is the kingdom, and the power, and the glory, forever. Amen. — Matthew 6:9-13.

## Lines to Remember

Kind words are the music of the world.—F. W. Faber.

The balance of power in Europe depends chiefly upon their balance of mind.

It never rains in the Sahara and Gobi deserts, so they would be fine places for picnics.

In Los Angeles, a man was arrested for spanking his wife. Bustles had their advantages.

Presidential possibilities are making all the noise they can, but you can't see some of them.

They are fighting in Ireland again. We knew if spring just kept on the Irish would get restless.

A girl's great advantage over a man in the business world is that she can marry the boss.

You never realize how high silk stockings are until you see them worn with a bathing suit.

While making pointed remarks, remember the porcupine. His only friends are other porcupines.

Almost a hundred million dollars' worth of tobacco will go up in smoke in the United States this year.

The charges against Senator Wheeler of Montana are found unjustified, as predicted from the start.

Statistics show our rural population is falling off because down on the farm they are down on the farm.

The annual honey crop of the United States is about 250,000,000 pounds, which certainly is sweet of the bees.

Secretary Hoover rightly deprecates the "campaign of personal abuse" over his Alaska fish bill. Senators should be able to discuss fish without talking like fishwives.

Judge Gary says that the worst thing we have in the United States is congressmen who think the worst thing we have is the steel trust, so it's still an open question.

And the old veterans of the Civil war, who are passing away by the hundreds every day, get no love from the Yankee president, who does not even know what it is to be a soldier boy. Was he old enough to go to France? You bet he was, but he staid at home and growled.

## TRADE OUTLOOK BRIGHT

How about business conditions? Things have slowed down a bit lately in several of the basic industries. But there's nothing in the situation to make us uneasy. All indications are that the slow-down is temporary.

Business is a lot like a man hiking across the continent. He can walk fast just so long, then he has to stop and rest. That's the real business situation—production was on too big a scale, so now there's a lull to "size things up."

These lulls come periodically even during long-range periods of prosperity. Trade goes up and down. It always has, and it always will.

Take steel. This giant industry is operating at about 80 per cent of capacity, may 85. But in recent months production was smashing all records. Now the industry slows down to catch its breath.

Then, too, buyers are buying hand-to-mouth, holding back for lower prices. Makers are slowly making concessions—small price cuts to serve as bait. This also is a periodical and inevitable reaction. When prices stabilize, lots of orders.

Auto industry also is quieter. Buying movements by the public come in waves. The last big wave, during January and February and March, made the factories turn out more cars than ever before. A lull now, but only temporary. Place your bets on another big buying movement, to start soon.

A lot of lessened activity in business generally is seasonal—always comes at this time of year. That's one reason why coal production is slow. Spring always brings a dull spell. Furthermore, there's a tremendous over production of coal—and no national strikes in sight to create a shortage.

But business leaders are expecting good times. They're getting ready for it—providing the capital to carry on work. In April 298 million dollars' worth of new stocks and bonds were floated, compared with 305 millions in April last year.

In the last three weeks of April (latest figures available) the whole country loaded and moved 2,620,218 cars of revenue producing freight. This was a bit less than in the corresponding period, and 120 in 1922 and 111 in 1921.

This is the long range tendency, not only in rail traffic but in general business. That's what really counts—the long range activity, not temporary lulls.

## MAKING A CHILD BEHAVE.

A shrewd mother writes. "The best way to punish children is to make them punish themselves. My little boy, in rage, grabbed a dish from the table and shattered it to fragments on the floor. Instead of spanking him, I made him smash the door of the Court House in the City of Plattsmouth, in said county and state, sell at public auction to the highest bidder for cash, the following described property, to-wit:

A. L. TIDD, Att'y for Plaintiff. a28-5w

We know of a little boy who simply would not behave at the table. Delighting in mischief and having a cruel streak in his makeup, he deliberately tormented his mother whom he knew to be nervous. One trick in his repertoire was tapping a water glass with a spoon.

Punishment seemed only to make him worse.

He was cured by making him eat his meals alone until he was willing to behave.

The effectiveness of punishing youngsters is frequently due to the punishment being administered when the parent is in rage. For instance, many a father gives his son a trouncing that he regrets when he cools off. His natural re-action is to atone—to "make up" by gifts such as candy or coins. This naturally neutralizes the corrective effect (if any) of a whipping.

Never punish a child when you are in anger. Think it over. No matter how a parent punishes, he should chastise or penalize only when in complete control of his temper.

More effective than any beating is to say to a boy: "If you do so-and-so, you cannot go to the movies for a month. Now, it's up to you. If you want to punish yourself, go ahead and be bad."

New York is putting up a 1,000 room club house for business and professional women and celibacy thus wins another premium.

They are blaming Daugherty for everything that has gone wrong with the administration. Yes, just like the republican gang—kick a man when he is down.

So far as we are concerned, Muscle Shoals as a subject of breathless interest is rapidly taking its place with Fiume, the Island of Yap and the Einstein theory.

Both house and senate adopt the Jap exclusion bill—the senate by a vote of 69 to 9. Now look out for the Coolidge veto. Will he dare do it? Not on your tintype.

It is costing the government much more to enforce prohibition than will pay the bonus of the overseas soldiers and the increase in the Civil war pensions. Oh, what a country and what a people!

Remember the big bargain day next Wednesday—bargains galore.

**its BALANCE that COUNTS**

**H**IGH quality pigments and oils I don't guarantee a paint that spreads, covers and wears well. Neither do low, medium and higher boiling point fractions in gasoline assure superior motor fuel. In both cases balanced proportions determine real worth.

If altering the proportions of low and higher boiling point fractions in Red Crown would improve it, we would change it to a blended gasoline.

But Red Crown is so accurately balanced to give quick starts in any weather, burns up with such a slight residue of carbon, develops power so dependably and gives such big mileage per gallon that it would be a mistake to change it.

Innumerable experiments have proved that you can neither add nor take away any fraction of Red Crown and have as good an all-around motor fuel.

Drive in to any Red Crown Service Station and fill up with balanced gasoline. You will receive prompt attention, courteous service and full measure of gasoline that is suited to the needs of modern motors and Polarine motor oils that give protective lubrication.
