FINISH POULTRY ON THE FARM. On the farm or poultry plant, where it is produced is the logical place to finish surplus poultry. As well as increasing the weight, a short period of feeding (10 days to 2 weeks) on a mixture of finely ground corn and bran in equal parts with white shorts or ground oats added will improve the quality of the birds for sale.

Birds should be confined to a crate and fed the above mixed to a mortar consistency with sour milk or buttermilk three times a day. Such chickens are known as "milk fed" and command a higher price. They should be sold to a dealer who buys on a quality basis.

Details in the making of a crate, feeding, etc., may be obtained from your County Extension Agent or the Agricultural College. Ask for Extension Circular 1414, "Finishing Poultry on the Farm."

Dr. Coogan Here but Once a Month During Summer. Readers of this paper and patrons of Dr. Thomas P. Coogan, the genial Omaha dentist, has visited Union for two weeks for the past year or more, are advised in an advertisement of the doctor in this issue that he will be here but once a month during June, July and August, his June date being Saturday, the 14th. This change is made on account of the doctor's increasing Omaha business and because he believes he will be able to serve the people here during the summer season with visits once a month. On the 14th, his advertisement states, he will clean teeth free.

Another Good Bill at Union Theatre for Saturday Night. "The Single Track," starring Corrine Griffith, Richard Travers and others will be the feature attraction of the Union theatre Saturday night.
