## McAdoo and Victory.

"On to New York!" is the slogan.  
"A hot time in the old town" of New York.

June has given us plenty of rain and oceans of pretty flowers.

Come to Plattsmouth on the 4th of July, and have a good time.

There is one really international word to-day. That word is "dollar."

Writing these things is a job, but we like to think of it as a position.

Where is Dawes' home—Washington, D. C., New York, Illinois, Nebraska or Germany?

Of course it doesn't do much good to sprinkle a dusty street, all the same it ought to be sprinkled.

Fire crackers are in evidence a little too soon, ain't they? Two weeks before the Fourth of July.

Yes, the Fourth of July will be in on time, and remember Plattsmouth will pull off the biggest celebration on record.

Sun Yat Sen may not be as dead as alleged, but his press agent now enthralls with suspended animation, as it were.

Music is getting so you can't tell if the neighbors are playing the phonograph, fighting crying or washing dishes.

Three months now since the town clock has struck a tick. Why don't the authorities get some one that knows how to fix it?

A June husband tells us he can't go to town with her. He has to stay at home when she goes and sign for the packages.

In South Africa they have discovered a new ribbon baboon. After looking at his picture you can readily see why he is blue.

Gaston Means wants his prosecutor fired because he is so hostile. Defendant would much prefer an old family friend on the job.

The old-fashioned girl who used to sing when she churned, now has a husband who kicks when he has to turn the ice cream freezer.

This fellow La Follette can't get the idea that a plank is to get you over a place where you might fall through. He thinks it's a club.

Camels are being replaced by automobiles in the Syrian desert, but they are still found superior in one respect: Their radiators don't boil over.

It took prayers by a Methodist Bishop and a Jewish Rabbi at the Cleveland convention to fully advise the Lord as to the virtues of the Republican party.

If that Englishman who claims to have invented a death ray is really in earnest about it, he is cordially invited to come over and try it out on our crop of grubworms.

We claim to be able to understand a lot of things, but we don't understand the egotism of any man who assumes that he is too big to be Vice President of the United States.

Not only are the doctors doing the best they can, but they are making faster strides than science ever made before toward a knowledge that will bring health and happiness to the race.

Governor Lowden's mother must have experienced great difficulty in giving him castor oil. It took over 1,000 Republican politicians to hold him while they tried to give him the nomination for Vice President, and then they couldn't make him take it.

Each week the railroads are moving more and more freight. This means that times are going to get better. When freight movement is big business men are betting on good business ahead and are getting goods ready for expected customers. Latest reports show the railroads moving 91 cars of freight for every 77 cars in 1921 and 1922. Throw away the blue spectacles.

Thus the old guard has become the rear guard.

But Snotor Lodge has one consolation. Nobody calls him a grand man.

This year the hand that used to rock the cradle holds the balance of power.

French presidents hold office for seven years in theory, but only in theory.

Big forest fires sweep Arapahoe National Forest. Blaze starts from careless campers.

The airplane is a great invention, but it is very hard on First and Second Lieutenants.

The kids' vacation has started. Teachers' vacation has started. Mothers' vacation has ended.

Another good thing about a Nebraska summer is that it always backs up the old-fashioned theology.

Some have the notion that all export business makes lots of jobs, for Americans busy is what we need most.

These are the days you miss a man for a couple of weeks, then you see him home sunburned and broke.

In Dallas, Texas, a grocer is suing a girl for breach of promise. Only a very foolish girl would jilt a grocer.

Personally we think it may be all right for a girl to smoke cigarettes, but we regard snuff as more effeminate.

A Delaware, Ohio, man has a clock 11 years old which runs. The moral is: Never try to fix a clock yourself.

The republicans talk against McAdoo because they know he is the strongest man the democrats can nominate.

If the party goes a little stronger on backing Calvin, most of the G. O. P. congressmen will have to run independent for re-election.

## HOLD UP AT THE O STREET BRIDGE

Eagle Beacon Reports Daring Job Pulled Off by Parties Not as Yet Under Arrest.

A hold-up was staged on the O street road at the Stevens Creek bridge, five miles west of Eagle, last Saturday morning.

A party driving a car enroute to Syracuse from Havelock was held up and robbed at that point, then thrown into the ditch. At the completion of this work they took their victim's car and drove it to the barn just west of A. W. Norris' home on the Allen Crabtree farm. There they put the car in the barn and then set fire to the barn, destroying some of its contents. Ed Ossenkop, who lives nearby, saw the fire and phoned to r. Norris, who in turn notified the officers at Lincoln. They came immediately to investigate, but we have not learned of any arrests.—Eagle Beacon.

# With both gunpowder and gasoline it's BALANCE that COUNTS

The formula of gunpowder determines its explosive force and propelling power. The same is true of gasoline. To get dependable results, the constituent elements must be in properly balanced proportions.

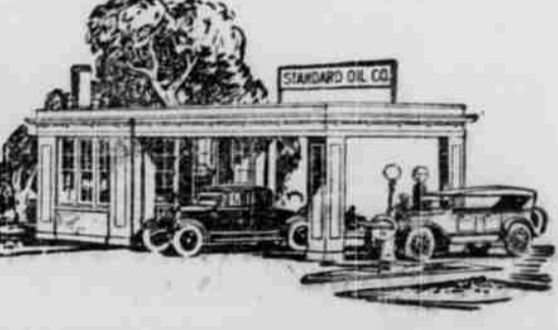

RED CROWN is as uniform as good quality gunpowder. It is made to rigid specifications which provide the low boiling point fractions for quick starts and the higher boiling point fractions necessary for power to the end of the stroke. The proportions are right. You can't alter them and get as dependable all-around motor fuel.

Red Crown vaporizes with a maximum of air. It burns up in the fraction of a second. It develops the full power of your motor on a lean, economical mixture and produces little carbon.

Prove this in your own car. Drive in to any Red Crown Service Station. You will receive prompt, courteous attention and full measure of properly balanced gasoline and Polarine motor oils that provide protective lubrication.
