TWO MILLION WORD MIND ANALYSIS OF LOEB AND LEOPOLD

That Will Be Basis of Defense of "Superintelledual" Slayers.—They Have a "Complex."

Chicago, June 21.—Nathan Leopold Jr. and Richard Loeb, sons of millionaires and confessed slayers of 14-year-old Robert Franks, were victims of an "intellectual complex" which made them irresponsible for their crime, brilliant scientists who have been retained by the defense are ready to testify.

A complete volume, the result of exhaustive research and medical examination of the "prison laboratory," is being prepared. It now runs more than 2,000,000 words and the doctors are at work cutting it down to a comprehensive analysis of the boys' case so that it can be used by defense attorneys in their attempt to establish Loeb and Leopold insane.

Use Sensitive Instruments. Dr. H. S. Hulbert and Dr. Karl Murdock Bowman are the two psychiatrists making the tests. They have been examining the two admitted murderers for two weeks.

Now the tests are about completed. All that remains to be done is to make reports that will convey to twelve jurors their belief that the boys are insane.

Both boys were college graduates and were working at the University of Chicago for higher scholastic honors. Leopold, son of the millionaire Harris Paper Box company, had received a Chicago university degree and was studying law. Loeb, whose father is Alfred H. Loeb, vice president of Sears-Roebuck & Co., was the youngest graduate of the University of Michigan and also was studying law. Both are scarcely 19 years old.

That the boys were precocious and therefore unbalanced mentally, will be the plea of the defense. Attorneys for the prosecution meanwhile are preparing a counter case.

They will use every means at their command to break down the insanity plea.

Dozens of the students who were intimate with Leopold and Loeb and were familiar with their habits, will be called upon to testify that the slayers were normal in every respect.

The trial is scheduled to open August 4.

SEEKS STANDARDS FOR HOSPITALS

Says Illegitimate Children Should Be Given an Even Chance.

Lincoln, June 22.—Citing cases in which new-born illegitimate children were exposed in such a manner as to endanger life, Mrs. Clara C. Clayton, head of the child welfare department, has issued a statement asking for "such standards for maternity hospitals as shall tend to insure babies a square deal."

Totals issued this week by the bureau of vital statistics brought the illegitimacy problem sharply to the attention of welfare workers. Nebraska records showed that 423 children were born out of wedlock in a period of five months, one maternity hospital placed eleven babies with child-placing agencies during their first day of life," said Mrs. Clayton. "During the past year, thirty-seven babies have been taken to the Home for Dependent Children before they were 1 month old. Similar conditions prevail in other orphanages.

"That these things are true is of vital moment. Granted that a child deprived of reason of his birth of the heritage of a home is better off placed in someone else's home that child has a right to a good start in life."

In 1903, 332 pairs of twins and one set of triplets were born in Nebraska, the bureau report showed. The births total was 39,171, as against 12,639 deaths. Of these 23,660 were white, 295 black, thirty-one Japanese, five Chinese, 107 Indian, 161 Mexican and two of mixed race.

Babies were born to 26,185 native-born fathers, 3,853 foreign-born fathers, 333 unreported. Native-born mothers numbered 27,528 and foreign-born 2,643.

When you need more room—it is there!

THE Big-Six Touring is a seven-passenger car—not merely a seven-passenger body mounted on a five-passenger chassis. It was designed and built for seven-passenger service—with a motor of ample power and stamina for seven-passenger satisfaction.

Then, too, with the auxiliary seats folded away, the Big-Six becomes the most desirable five-passenger car in which you have ridden, with room enough for all the luggage you will ever need.

Big-Six appearance is attractive, distinctive, and in good taste. Its performance, acceleration, flexibility and dependability are known and respected the world over.

No car, regardless of price, surpasses it in quality or completeness of equipment.

If a smaller manufacturer or assembler were to build the Big-Six—of equal quality and workmanship—his price would be \$3,500—perhaps more.

But Big-Six overhead is distributed over six times as many units as are built by any Big-Six competitor, hence Big-Six cost and selling price are surprisingly low.

Don't buy blindfolded. Examine, ride in and drive the Big-Six before you buy any other car.

REAL CAMPAIGN ISSUES BECLOUDED, ASSERTS M'ADOO

"Special Privilege, Threatened by Outburst of Public Opinion, Setting up Straw Man."

New York, June 22.—Assailing the metropolitan press, which he declared was making "clumsy attempts to becloud the issue," William G. McAdoo tonight, at a rally of delegates supporting him, asserted that "whenever special privilege is threatened by a popular outburst of public indignation, it sets up a straw man issue to divert the people's attention from the real problems of the day."

"That deceit," he added, "is being attempted now."

"From some of the things which have been printed here about the forward-looking men and women who make up the progressive democracy of America," declared Mr. McAdoo, "it would appear that some editors have the idea that the people who came from the south and west and from smaller cities than New York are easily fooled. They are wholly wrong. We may look less sophisticated than New York editors because we live in far away and smaller places, but we haven't lost the faculty of thinking for ourselves and knowing, when we see it, the genuine from the false. I am confident that these attempts to becloud the issue and reflect upon the intelligence of the great mass of delegates is quite futile."

Mr. McAdoo summed up the real issues of the 1924 campaign as follows:

"To rid the federal government of special privileges, corruption and graft, and to prosecute all persons, whether civilians or officials, guilty of conspiracy to defraud or cheat the government."

"To remove the influence of invisible government from the treasury and the federal reserve system."

"To repeal the Fordney-McCumber tariff bill, which taxes the common people in the heaviest of special interest, and to substitute a tariff bill which will help reduce the cost of living and do justice to all interests."

"To repeal the obnoxious features of the Eech-Cummings railroad act and to set up in its stead a measure for railroad reform which will eliminate waste, reduce transportation costs, cut freight rates and insure the operation of the railroads for the benefit of the country."

"To add the farmers by establishing lower freight rates and by developing foreign markets which can absorb the surplus agricultural crops."

"To vigorously enforce all laws. To say that they cannot be enforced is not only to confess governmental impotence, but failure of democratic institutions."
