

THIS CITY PART OF GREAT TRANSMISSION LINE OF CO.

Line of the Nebraska Gas & Electric Co. Linking up Various Units, Passes Through Here.

From Wednesday's Daily— Construction of a 65,000-volt electric transmission line from Plattsmouth to Lincoln, by the Nebraska Gas & Electric company, which will make Plattsmouth an important link in the super-power system of the Continental.

The sixty miles of line will pass through a territory where electric service is not now available and will make it possible for farmers along the route to have this service sooner than farmers who are not now near electric lines.

The plant of the Lincoln Gas & Electric Light company, which will be the western terminus of the line, has been recently remodeled and put in excellent condition.

The line will be built on 50-foot class A wood poles set 300 feet apart. Each pole will have two crossarms which will carry three large size copper wires. The line will operate temporarily at 22,000 volts.

The new line will connect Plattsmouth with the newly enlarged plant of the Lincoln Gas & Electric Light company and with the South Platte territory of the Nebraska Gas & Electric company which in turn is connected with the lines of the Central Power company, Grand Island. It will give Plattsmouth a call upon any one of seven steam generating stations and six hydro-electric plants on the Blue and Loup rivers.

The plant of the Lincoln Gas & Electric Light company, which will be the western terminus of the line, has been recently remodeled and put in excellent condition.

A connection with this power station, with its 10,000 kilowatts of capacity, will mean electric service of the finest kind for Plattsmouth, officials of the company declare.

The Nebraska Gas & Electric company's South Platte system embraces thirty-five towns and cities, among which are Beatrice, York, Aurora, Osceola, Stromsburg and Geneva. The towns are connected by high voltage lines to hydro-electric plants at Millard, Wilber, DeWitt, Holmerville and Barneston on the Blue river, to steam plants at Beatrice, York, Geneva, Osceola and Aurora and to the Central Power company's steam plants at Grand Island and Power

and its hydro-electric plant on the Loup river at Beolus.

This interconnection of power plants by high voltage transmission lines, officials of the company point out, is in harmony with the general scheme of so-called "super-power" development over the country and means more dependable service for the communities so connected. The new line will form the last link in the Continental Gas & Electric corporation's continuous electric circuit extending from Gentry and Grant City, Mo., on the southeast, to Phillips, Hordville, and Marquette, Neb., on the northwest, a distance of 200 miles as the crow flies.

POSTOFFICE FORCE IS CUT DOWN BY ILLNESS OF CLERK

With Shortage of Help New City Delivery System Adds to the Strenuous Work.

From Wednesday's Daily— Miss Gerda Peterson, one of the employees of the local postoffice, is off duty for some time at least following a very severe attack of eye weakness that makes it necessary to receive medical treatment for the optics. Miss Peterson has had some trouble with one of her eyes for several years and in the last few months this has been aggravated by the other eye becoming affected and in the last few days causing her so much trouble that it was necessary for her to receive treatment. It is hoped that the affliction is merely of a temporary nature and that she may soon be restored to her former health.

The postoffice force is badly depleted at this time and the sudden attack of the eye trouble of Miss Peterson cuts the force down to three employees. Mrs. Minnie Pickard, one of the clerks, has been compelled to remain at home by the illness of the young man who is in the office to remain at home by the serious condition of her father. Another of the clerks, Mrs. George Nelson, has just recently resigned and with the eye trouble of Miss Peterson reduces the force at the office to Ray Larson, the dispatching clerk, Leslie Niel and James Holly, who are carrying on the work.

To add to the great amount of work that must be handled the office is just starting out a system of free mail delivery for the city that requires some little time to get working and with the force in the office reduced to such a small number, it is adding that much more to their trials and tribulations. However, the members of the force and Postmaster Holmes are putting forth their best efforts to see that the new service is started as efficiently as possible.

The plant of the Lincoln Gas & Electric Light company, which will be the western terminus of the line, has been recently remodeled and put in excellent condition.

A connection with this power station, with its 10,000 kilowatts of capacity, will mean electric service of the finest kind for Plattsmouth, officials of the company declare.

STRANGER FOUND HERE PROVES TO BE AN OMAHA MAN

Man Picked up Near Charles Allen Farm Found to be Richard Sedlacek of Omaha.

From Wednesday's Daily— The stranger who was taken into custody yesterday morning by Sheriff E. P. Stewart, near the Charles Allen farm south of this city, and who was unable to give an account of himself, has proven to be Richard Sedlacek of Omaha, who has been missing from his home since Monday afternoon and for whom a search has been made by the Omaha police for the past two days.

The first intimation of the identity of the stranger was received by County Attorney J. A. Capwell from the World-Herald last evening and a description given by the county attorney tallied with that of the missing man and the news given to the overjoyed parents of the young man who were greatly worried over his disappearance from home.

Mr. Sedlacek is twenty-eight years of age and has, since his discharge from the army in March, 1918, after a nine months service on the border, been suffering from ill health and a mental state that has caused him more or less trouble and loss of memory and speech for frequent periods. This probably accounts for the fact that when he was found by Sheriff Stewart the man could apparently hear but could not respond.

His parents, Mr. and Mrs. Frank Sedlacek of 4714 South 13th street, had feared that the young man had wandered away and met death in the Missouri river, not a great distance from their home.

The only clue to the missing man up to the time the message from County Attorney Capwell was received, was that given by a neighbor who saw him walking west on T street near 26th street. The man had undoubtedly kept on his wanderings until he reached this place where his strange actions aroused the fears of the residents in the vicinity of this city and led to the calling of the sheriff and his deputy.

This morning Mr. Capwell took the young man to Omaha where he was restored to the parents who were overjoyed that their fears of his safety were groundless.

LOCATES MISSING CAR

From Wednesday's Daily— The local police some time ago discovered a car on the highway near this city that had been abandoned by someone and which bore an Oklahoma number and have since been holding the car here for the claimant. This morning, Chief of Police William Heinrichsen received a telegram from Oklahoma City giving the number of the car and stating that it had been taken from that city some weeks ago. The car is the same as the one held here and will be placed at the disposal of the owner who was notified by Mr. Heinrichsen of the fact that the car was held here.

NO TRACE OF BODY OF UNION MAN IS FOUND IN CHICAGO

Relatives to Arrive Home Today— Lake Michigan Being Searched For the Body.

The efforts to locate the body of Jack Patterson of Union, who was drowned at Estes street beach in Chicago, Monday afternoon, are still being continued and the dragging of that portion of the waters of Lake Michigan have so far failed to reveal the whereabouts of the body of the unfortunate man.

Mrs. Patterson, the bereaved wife, and her father, Joseph Fetzer, are expected to arrive in Omaha today over the Northwestern and will be met there by Mr. and Mrs. Thomas M. Patterson, parents of the unfortunate man.

The theory that was advanced that perhaps Mr. Patterson had been made the victim of foul play was found to be hopeless as his money and watch were found in the clothing that he had left in his automobile when he had gone forth to take the ill fated dip into the waters of the lake.

Monday the heat was very intense in Chicago and the waters of the lake very cold and this may have caused the young man to suffer a cramp when in his heated condition he plunged into the waters. Friends who have been intimate with Mr. Patterson both here and at Union, state that he was not able to swim to any extent but frequently had gone in with them at swimming parties to splash around in the shallow waters.

Mr. and Mrs. Patterson have been visiting at the home of Mr. Patterson's sister, Mrs. Albert Deegan who reside in the Rogers Park section of Chicago some two blocks from Lake Michigan and near Estes street beach where the fatal plunge was taken into the lake by Mr. Patterson.

The family have the deep sympathy of their many friends here in the sudden and tragic death that has taken away the husband, father and son from the family circle and the old friends have awaited the outcome of the search in the hopes that the body might be recovered.

lytic stroke which rendered him almost helpless for some time and it was only with the greatest difficulty that he was able to be up and around. The last winter he experienced a serious shock that affected him very much and made necessary the taking him to the hospital for care. He leaves to mourn his loss the widow and several children, among whom are Dewey and Russell Read of this city. The body is being held at the Morsy funeral home in Omaha pending the arrangements for the funeral services.

The services were held at the Glendale church and were conducted by the Rev. W. E. Goings of the Christian church of Louisville and a very large number of the old friends and neighbors were present. The interment was at the Glendale cemetery. The L. O. F. lodge of Louisville of which Mr. Reames is a member, was present. Mrs. Reames was a member of the Rebekah order.

Saloma Lambright was born June 10, 1869, in Livingston county, Missouri, and at the time of her death was aged fifty-five years. She lived in Missouri with her parents until 26 years of age when she went to Sheridan, Wyoming, and resided there for some time. She was married August 10, 1898, to S. J. Reames, a childhood friend and schoolmate. Mrs. Reames was always a loyal friend and a kind neighbor and her many acts of assistance to her friends endeared her to a very large circle. She was a member of the Presbyterian faith and during her long illness was a faithful and patient Christian as she faced the close of her life's story.

The condition of Mrs. Charles McGuire, who has been quite poorly for the past week is now reported as being somewhat better and is now able to be up and around a part of the time and her more favorable change has brought a great relief to the members of the family who have been greatly worried over her illness.

BOOZE HANDLER GETS HEAVY FINE

L. F. Haufelt Draws Down Fine of \$200 and Costs and Loses Car—Turned Over to U. S.

From Wednesday's Daily— The capture here early Tuesday morning of L. F. Haufelt of Johnson county, by Sheriff E. P. Stewart and Deputy Sheriff Rex Young, proved a very costly one for Mr. Haufelt in a number of ways, besides the loss of the thirty gallons of alcohol that he was transporting.

Yesterday afternoon on complaint filed by County Attorney J. A. Capwell, the prisoner was arraigned in the court of Justice William Weber and received a fine of \$100 each on two counts and the car that he was driving and using for the transportation of the booze was ordered taken and sold by the court in accordance with the law in the case.

As soon as this was disposed of the county authorities handed Mr. Haufelt over to the representatives of the federal prohibition enforcement department, Karl Schmidt, former state deputy, and Newell Roberts of Omaha, who is an assistant in the office of Bob Samardick, the Omaha resident of bootleg joints. It is probable that an additional complaint will be filed in the federal court at Omaha as the alcohol that was captured was secured in that city by Mr. Haufelt.

A lay liver leads to chronic dyspepsia and constipation—weakens the whole system. Doan's Regulax (50c per box) act mildly on the liver and bowels. At all drug stores.
