They also visited in Indianapolis and Richmond while they were away.

A young man who was, on account of the fact that he was kept away from home Sunday evening on account of a very pleasant engagement, did not get home in time for his supper, and when he did arrive found the things put away, so he concluded he would see what he could find and ran across some bread and honey and after having satisfied his hunger, was attacked with a spell of colic which resulted in keeping him in misery for the entire day following.

Kemper Frans will Move
Kemper Frans, who has had his barber shop in the building next to the hotel, is soon to move his place of business west of the library building, which makes an excellent place. The building in which he is at present located having been sold and the getting of this other room near the library is a very fortunate thing, as it is a much better room as well as in a better location.

Enjoyed Hallowe'en
The younger people and there all ways will be young people, and we want them for they are the hope of the country, having ideas of frolic and play, did not miss the opportunity to have some fun, some of it boisterous, on Hallowe'en. Among other things they removed some improvements of real estate, but did not carry the real estate away. The old monkey business of another day, for no one had a buggy now, found a most convenient resting place and night. Some visible evidence of their pranks still remain.

Shellenberger, one of the instructors in the Cotner university at Bethany will deliver the discourse. Rev. Church Serves Dinner
The ladies of the Christian church served dinner at the church building on election day and were very liberally patronized by those who came to vote as well as many traveling men who happened this way on that day. The ladies know well the art of feeding the men, for they sure did put up the eats in the most approved manner.

WOMEN OF FRANCE REFUSE DICTATION
Refuse To Abide the Decree of Fashion As To What They Shall Wear For Their Winter Headgear.

Paris, Nov. 4.—Winter styles are here and with them has come a bitter fashion controversy. The "hat question" has arisen between the milliners on the one side and their customers on the other.

The milliners have replied, it shall be the director, and refuse to make any other kind. Paris women have vehemently objected, and the result has been that a surprisingly large number of straw hats continued to be worn, and the time honored custom of donning velvet hats on the first day of September has been broken.

At the opening of the fall racing season at Longchamp, it was noticed that women steadfastly retained their summer headgear. Meanwhile the show windows of milliners on the rue de la Paix and the rue Royale are overflowing with velvet hats.

"It makes me look like a nutronny," one of the most fashionable women at the track replied when asked the reason for her failure to adopt the "directoire." This probably sums up the case for the customers.

The milliners have come out flatly and decreed that women must wear square crowns or nothing. It has become practically impossible to find a milliner who will make the stubborn little cloche.

"Beware of the wrong hat! The hat you choose can make or mar not only the ensemble of your toilette, but the charm of your face itself." Such is the way a woman fashion writer in one of the most widely circulated style magazines advises her women readers.

The tendency in hat styles, apart from the square crowns, is distinctly to heighten Black Anne is prevalent in every modiste's window. If there is any trimming at all, it must stand very high. The crown alone carries the height if the hat is not ornamented. The square crowns have their high trimming at the side or directly in front, but the round crowns, what few there are to be seen, carry their ornamentation on top.

THREATENS OFFICIALS WITH PROSECUTION
Nashville, Tenn., Nov.—Reports from Watertown and McMinnville reached United States District Attorney McLane today that voters were being challenged at those places and affidavits required that they had paid their own poll tax. The district attorney announced that any and all election officers, judges and clerks in the middle Tennessee division who intimidated voters or refused to grant them the privilege of voting when they presented their poll tax receipts and were otherwise qualified would be prosecuted by the federal government and warrants would be issued today against such election officials. The district attorney said election officers had no right under the law to go behind the poll tax receipt and require an affidavit of the voter.

BIBLE SCHOOL LESSON

November 2

By M. S. Briggs

November 9

Golden Text: "I am the bread of Life."

This lesson is among those where in the Master illustrates a great truth by a material example, by creating a necessity of life when he made bread for the 5,000 people besides women and what children there were there. And interspersing the truth in such a wonderful way that it was almost beyond the conception of the people of that day and the wonder of all succeeding generations. The Master had been teaching and great multitudes had listened until the evening had come of the third day. They were tired, sleepy and hungry. The disciples had compassion for the people and went to the Master with the query, "What shall we do with the people for they are weak and exhausted and should they depart without anything to eat why they would perish by the way. We have only 5 small barley cakes and two small fishes and what are they among so many people. And if we would try to buy enough for them all to have a little it would cost two hundred denarii worth. They say, 'What shall we do?' The Master said, 'Give them to eat. Then he said, 'Bring the five barley loaves and the fishes and tell the people to sit on the grass in divisions of fifty and when they had seated themselves he blessed the bread and meat then break it and passed it to the disciples. They to the multitude and every time it was broken it multiplied and all ate as much as he desired and when all were fully satisfied the Master said, 'Gather up the fragments and when they had done so the found twelve baskets full over and above what all had eaten. This seemed a wonderful thing and beyond the comprehension of the multitude. The Master, with all the wonder still uppermost in their mind, tells them that He is the Bread of Life. They are much surprised but are in a state of mind to accept the vital truth which the incident had brought to them. He then enforced the fact that he had come to this world with a message of redemption and that he was indeed the bread of life. Think of the small lad who had supplied the initial five barley loaves and the fishes. The boy by the way was playing an important part in the work of the world.

The lad with the five barley cakes and the two dried fish, was indeed fortunate that he was a partner with the Master in supplying bread for the multitude as well as being commanded with Him in the great lesson which he taught. The multiplying of the bread for the hungry fishermen was two-fold in purpose for it was taking care of the needs of mankind in their dire extremity and opening a way by which he might teach them an essential truth. That He was and is the bread of life which come down from heaven. He came that those who might partake of Him would have in themselves a life springing up into everlasting life. He has left his word, the bread of life for us which we may partake and inherit everlasting life. This we must break for our fellowman and as oft as we do this it increases until it shall enliven the whole world.

Verily, the breaking of this bread of life to our fellowman is one portion of our mission. To feed the multitude is the thing which Jesus taught when he said to his disciples, "Feed ye them."
