ROYAL ARCH MASONS ELECT NEW OFFICERS
Nebraska Chapter No. 3 Selects Officers For the Ensuing Year At Their Session.

From Monday's Daily—
The members of Nebraska chapter No. 3, Royal Arch Masons, of this city have selected their officers for the ensuing year who will be installed in their new stations following the close of the grand chapter sessions at Omaha, Nebraska, City and the installation being presided over by James M. Robertson, grand high priest.

The officers named by the local chapter are as follows:
High Priest—Glenn Perry.
King—James P. Beasley.
Scribe—Frank A. Cloft.
Secretary—W. F. Everts.

The chapter loses the services of Fred P. Busch, who has for the past five years served as secretary of the chapter, as he was insisted that he be relieved of his duties as he feels that he has served his time in the position.

Nebraska chapter is one of the oldest in the state and also has the distinction of having held the first session of the grand chapter of Nebraska here in 1867 at which time the chapters of Omaha, Nebraska, City and Plattsmouth organized the grand chapter and in the time since the organization a large number of the Plattsmouth members have held many of the grand chapter offices and at the present time the grand high priest and grand secretary are both members of Nebraska chapter.

"COVERED WAGON" HERE
From Monday's Daily—
The new "covered wagon" is here and unlike its pioneer prototype, this wagon has come from the far east instead of the far west where there is oil, flowers and "bull" flowing and flowering like milk and honey. These new wagons are not like their pioneer forebears seeking fortune and fame but are gathering around the family hearthstone for the holiday season.

The covered wagon that came slowly from the west was a roadster of the variety made famous in the Ford factories and the party that were driving the wagon, composed two Plattsmouth young men, Blythe Rosemanus and Fritz Duda and Art Rice of Los Angeles, and their sights of the twinkling lights of this city Saturday brought as great a sense of happiness as did the vision of the blue Pacific to Balboa as he led his hand across the Rockies to California.

The party left Los Angeles eleven days ago and they have had some very stirring experiences in the journey that were amusing and also amusing. On the first lap of the journey they were lost at night in the sandy wastes of Nevada and after searching for the highway decided to await the coming of the moon and lying down beside the Detroit vibrator, they rested until the first dawn of day and then they discovered a sign post not twenty feet away that guided them into the city of Searchlight, where both of the inhabitants greeted them on their eastward journey. The distance demulsifier that they were driving developed a great appetite for gas and oil and the members of the party state that when they made a stop at a gas station they would secure five gallons of gas and also five gallons of oil and in fact the car did a great deal toward giving Nevada and Utah a real system of oiled roads almost to California. One of the party's disagreeable experiences was found in Wyoming where the cold weather made it necessary to make stops at hotels instead of camping out as had been the practice on the first part of the trip. The boys state that as near as they can keep track they had fifty punctures on the trip and they had occurred eight miles from this city and they came in on the rim.

SMALL FIRE OCCURS
From Monday's Daily—
Last evening the members of the Plattsmouth fire department were aroused from their peaceful slumbers near the midnight hour with the turning in of an alarm from the residence of V. T. Arn, where the combined coal shed and chicken house was found to be ablaze. The

SUNFLOWER PORTLAND CEMENT

Ask your wife about the principle of good bread making—

"She will tell you
"That proper proportions of rich, pure ingredients are only the first step in making a fine loaf of bread—
"That the yeast, sugar and salt must be thoroughly and evenly mixed with the flour—
"That you cannot properly mix these materials dry—
"That without the milk and water, it is impossible to uniformly coat each particle of flour with exactly the right amount of yeast, salt and sugar.
"Cement making is much the same. Uniform quality depends on perfect mixing of the proper raw materials.
"Five years of research work on the part of the International Technical Staff combined with its 20 years' experience in cement making resulted in the perfection of the International Wet-Blending Process. This process is new used in the mill of the Kansas Portland Cement Company at Benner Springs.
"Their product, SUNFLOWER PORTLAND CEMENT, offers the cement buyer two things he wants:
[1] Quality that exceeds the U. S. Government standards by over 50%.
[2] A control which insures uniformity at all times.
"Yet this super-grade product costs no more than other cements. It has our unqualified endorsement and recommendation."
