

Hot biscuits that just melt in your mouth

Try making your next batch of hot biscuits with Omar Wonder Flour. Use the same recipe you always use. Then see the difference. As they come out of the oven, golden and brown, your mouth will water just to look at them. And good—they're a revelation!

You can get light, tempting hot breads every time if you will use Omar Wonder Flour. It is unsurpassed for every flour use. Folks just rave over cakes, pies, waffles, doughnuts, cookies, gravies and cream sauces when they're made with Omar.

The reason for the goodness of Omar Wonder Flour is no secret. Only the very finest selected spring and winter wheat is used. We test every run that goes through the mill before we ship one sack of it. So when you buy Omar, you know that you are getting the best—a health-building flour that will make the best bread and more loaves per sack than any other flour you ever used. We know it too—we're so sure of it that we make it a guarantee. If it isn't so, your grocer will give you your money back for the empty sack.

More and better bread from every sack—or your money back.

OMAHA FLOUR MILLS COMPANY, Omaha, Nebraska

IMPROVEMENTS ARE TO BE VOTED ON THIS SPRING

PETITIONS COVERING REQUEST TO GRAVEL HIGHWAYS ARE CIRCULATED.

PLACED ON BALLOT IN APRIL

Circulated Today and Will Be Passed Upon by Council in Submitting Proposition to Voters.

From Wednesday's Daily.—Petitions were being circulated today covering the placing on the ballot at the city election in April of three improvement propositions that have long been urged and which the backers wish to be passed upon by the voters of the city at this coming municipal election.

One of the propositions to be asked is the voting of bonds for the graveling of the roadway from the end of the paving on Elm street to the Oak Hill cemetery, where one of the worst pieces of road in the city exists and which has in the past winter caused a great deal of inconvenience to those who were laying away their loved ones in the cemetery or who were desirous of visiting the cemetery.

Another proposition for which bonds will be asked will be that of graveling the Louisville road from the end of the paving on Chicago avenue to Maiden Lane, at the city limits, covering another main traveled road that is difficult of travel in the winter or in wet weather.

The last of the proposed improvements that it is desired to cover by bond issue is that of extending the sewer on Chicago avenue from Tenth street to the end of the paving on Chicago avenue. There is a small creek or natural waterway along the east side of Chicago avenue that has given the city a great deal of expense and trouble in the past as the creek is subject to overflowing and has washed away the bank so much that it is threatening the paving along the avenue on the east side, by causing cave in of the brick and which will have to be cared for in some manner in order to protect the street and which it is believed can be handled most satisfactorily by the putting in of the sewer line.

The petitions will be submitted to the council, it is stated, and who will authorize the submission to the voters of these propositions, that are vital to the improvement of the city.

MISSOURI PACIFIC SUPER-INTENDENT HERE TODAY

From Wednesday's Daily.—This morning, C. J. Brown, division superintendent of the Missouri Pacific, came up from Falls City to look after some of the railroads affairs at this point and among these several improvements that the railroad has been contemplating for some time at the passenger station on North Fifteenth street. The company will have this coming summer their landscape engineer here to arrange some workable plan whereby the surroundings of the station can be beautified and made attractive and in keeping with the beautiful grounds of the Nebraska Masonic Home adjoining the station on the east. The station is on the main highway to Omaha and passed by hundreds each day and will, under the plans of the railroad, have grounds and surroundings in keeping with the importance of the station. The approaches to the station, the terraces and ground west of the walk to the south of the station will be improved and made an object of beauty to the eye.

WILL TRY CASE IN THE EAST

From Wednesday's Daily.—This morning, D. W. Livingston, well known Nebraska City attorney, was here for a few hours looking after some matters with Judge Begley, and departing from here for Indianapolis, Indiana, where he was called to defend an injunction sought in the federal court there by the Knights of Pythias against a client of Mr. Livingston in Otoe county. Mr. Livingston has had a number of actions covering fraternal insurance cases and in one of these brought against the K. of P. he secured a notable victory in the United States supreme court where the case was taken on appeal from the decision of the Nebraska supreme court and where the court sustained the verdict in favor of the client of the Nebraska City lawyer.

RESTAURANTS OPENING UP

From Wednesday's Daily.—The next few weeks will note a number of changes in the restaurant and lunch counter business in this city and with two new establishments of this kind opening up in the city. The cafe operated by T. B. Brown will change hands on Sunday as Mr. Brown retires to return to Nebraska City and prepare for the opening of Brown's Park for the summer season, and will be succeeded by Mr. Brock, who has just located here and purchased the restaurant of Mr. Barclay, the owner. Charles Lewis, who has been chef at the Brown cafe for the past few months, will open up the former Wagner cafe in Coates block, which has been closed for the past several months and will be ready for business on Sunday morning. The lunch room in the Gid Archer soft drink parlor that has been conducted by A. L. Brown, will be taken over by William Galloway in the future and Mr.

Brown will open up a new lunch room in the Main hotel building, it is stated.

CASE UNDETERMINED

From Wednesday's Daily.—Sterling Fleming, young son of Mr. and Mrs. M. P. Fleming of this city, is at the Wise Memorial hospital in Omaha where he is undergoing treatment and examination to determine just what is best to secure relief for the young man. Sterling has been very poorly for several days and on Monday night he was taken to Omaha and placed in the hospital. His condition has caused some worry to his family and friends and they are anxiously awaiting the outcome of the examination in Omaha to determine the cause of the illness of the young lad.

NEW BRIDGE PLANS ATTRACT MUCH ATTENTION

Many Calls From Prospective Bidders on the New Structure to be Built Over Platte.

From Wednesday's Daily.—The plans for the proposed King of Trails bridge over the Platte river north of this city, which were prepared by State Engineer Cochran, have been attracting the attention of many bidders over the state in the last few days and at the offices of the King of Trails Bridge Co. here as well as in Omaha, there have been many inquiries as to the plans and specifications on which bids will be received March and at the chamber of commerce offices in Omaha.

The plans contemplate a structure that is in strict compliance with the latest requirements of the state and federal governments so that when the bridge is ready to be taken over by the state and Cass and Sarpy counties, it will be up to all requirements that may be demanded in order to secure the state and federal aid on the roadways leading to the bridge.

The plans call for piling that will be sunk fifty feet, through the sand and soft sandstone to the hard shale that underlies the softer top and which should place the superstructure on a hard foundation. The piling also is to be enclosed with concrete that will give the piers added strength.

The roadway on the bridge will be twenty feet in width, ample for the passage of two lines of traffic at one time and avoiding congestion of traffic in times of heavy travel. The specifications call for either redwood or concrete flooring, on both of which bids are asked. This will make a wider bridge than was at first figured on as the steel sides of the bridge will extend at least five feet on each side of the structure. The approaches are to be built up four feet above the high water mark of the past years and which will, it is thought, keep the water off the roadway in high water time.

GIVES FRIENDS FAREWELL

From Wednesday's Daily.—The handsome country home of Mr. and Mrs. Fred Spangler was the scene of a very pleasant gathering on Saturday evening when Messames Spangler, Julius Pitz and Fred Nolting entertained the friends and neighbors in honor of Mr. and Mrs. Andy Snyder, who are soon to leave the farm home in that locality to make their home in Plattsmouth. There were fifty guests present and the time was spent in games and music at which a great deal of pleasure was derived by the members of the party.

At an appropriate hour dainty and delicious refreshments were served that added to the enjoyment of the event and at a late hour the members of the party departed homeward wishing the guests of honor success in their new home and a regret that they were leaving the farm home where they have resided for several years past.

PANCAKE SUPPER A SUCCESS

From Wednesday's Daily.—Last evening the ladies of the St. Mary's guild of the Episcopal church held a very delightful Shrove Tuesday pancake supper at the former Wagner cafe in Coates block. There were a large array of the dainty cakes and toothsome country sausage served to a very large number of people. The room was crowded from the opening of the serving hour at 5 o'clock until the close of the evening and the occasion one that was much enjoyed by everyone of the large number present.

FILES QUIET TITLE SUIT

This morning in the district court action was filed entitled William A. Oliver vs. Paul Nuckolls et al., in which the plaintiff asks the quieting of title to certain real estate in this city owned by the plaintiff. Attorney W. A. Robertson appears in the action for the plaintiff.

Come in—see what Studebaker offers in this Sedan at \$1545

NEW beauty—new lines and now—new value; these are some of the things the new Studebaker Standard Six Sedan offers at its new reduced price.

It is a fact that this Sedan will out-perform any car selling within hundreds of dollars of its price.

No car possesses greater beauty or is more luxuriously comfortable. No car is more enjoyable to drive or is easier to steer.

Comparison with other cars selling for more—or less—will provide convincing proof of its greater dollar-

for-dollar value, its better performance, surplus power, unusual roadability, and many other desirable features.

Now matter how much money you expect to invest in a car, by all means see the Standard Six Sedan, ride in it—drive it yourself. It is then that you will realize the difference.

The price of this Sedan is low, simply because of Studebaker's large production, vast physical and financial resources, and because it is manufactured complete—body and chassis—in Studebaker plants.

Its new reduced price—\$1545—has entirely revised all standards of closed car values.

BATTLEGROUND OF PREHISTORIC MONSTERS FOUND

Migrating Mammals Fought for Mastery When They Clashed in Patagonia.

Buenos Aires, Feb. 23.—The battle ground of the prehistoric mammals of Patagonia and those of North America, discovered by Professor Elmer S. Riggs, assistant curator of the Field museum of Chicago, contains one of the world's richest collections of fossils, according to Professor Riggs, who now is in Patagonia, continuing his researches. The valley of Tarija, Bolivia, where the troops of animals met during simultaneous migration after a land connection had been established between North and South America, is filled with the bones of great beasts which fought for mastery of the continent.

Bones Feared by Natives

The carnivorous animals from North America, in years of fighting in which the saber-tooth tiger played a terrible role, destroyed the herbivorous Patagonians, and spread over the entire continent. In turn many of the northern invaders, including the saber-tooth tiger, gradually were exterminated. Remains of the mastodon, the saber tooth tiger and other giant cats, of prehistoric horses, of the camel-like ancestor of the llama, of the glyptodont, the great-grandfather of the armadillo, weighing tons; jaw bones and legs of lestonoids; the huge scelidodon, with a foot like a hook, far descended from a small tree-climbing animal; and of other strange creatures are mingled there in the soil of the Tarija valley, forming an indelible record of a great war and furnishing scientists an intensely interesting field for research. Fossils mingled.

Some of the remains have been exposed for years in the fields and by the side of the highways. The huge "bones of giants" are feared by the natives, although nearly every hut has a tusk or jawbone of some prehistoric beast in a niche to "drive away bad luck." The peons believe that if the remains of these "giants" are disturbed they will blow up on the disturber, causing death!

Another native superstition is that the bones get up at night and go down to the creeks to drink. The peons speak gravely of this as though they had often witnessed it.

MUNICIPAL EMPLOYEES NEED PAY INCOME TAXES

A decision most important to taxpayers, if sustained by higher courts, was announced by Judge C. C. Simons in the U. S. Circuit Court at Detroit, Michigan on December 23.

Judge Simons ruled that employees of the Detroit Municipal Railways were instrumentalities of the Federal Government because in his opinion "the operation and maintenance of a street railway system in connection with public highways, by a municipality, is an exercise of a strictly governmental function."

The Internal Revenue Collector was directed to return to an employee of the Detroit Municipal Railways \$38.17 which he had paid in income taxes for 1923.

The U. S. Department of Internal Revenue has recently given an opinion that incomes of employees of publicly owned utilities are subject to federal taxation. Water Commissioner Wall of St. Louis is quoted as saying that wages of publicly owned utilities are based upon tax-exemption and that if these employees are obliged to pay income tax the municipalities should reimburse them to the amount of the tax levies.

CHRISTIAN CHURCH MEN HOLD BANQUET AND ORGANIZE CLUB

Election of Officers Held and a Very Pleasant Occasion Enjoyed by New Men's Club.

From Wednesday's Daily.—Last evening the First Christian church was the scene of a very pleasant gathering of the men of the church, the occasion being marked by a fine banquet which the ladies of the church arranged and served for the newly organized Men's club. The scene was very attractive with the snowy linen, the sparkling silver and china and the group of some forty deeply interested men of the church who were intent on carrying out the plans for a successful organization of the men of the church.

The Rev. Walter R. Robb, pastor of the church, presided in his usual pleasing manner at the session.

During the banquet a very pleasing program was enjoyed by the members of the party. Manfred Drake furnishing a delightful vocal solo and Little Miss Catherine Terryberry and Master Wallace Terryberry giving two piano and drum duets that made a decided hit with the members of the party.

The election of the officers of the organization which adopted the name, "Men's Club of the First Christian church," was then taken up and the following were selected: President—H. L. Thomas.

Vice President—George Rogers. Secretary—L. F. Terryberry. Treasurer—B. A. McElwain.

The meeting also decided to hold the business meetings on the first Tuesday of each month and the third Tuesday of each month will be devoted to a social session.

At the close of the evening, B. A. McElwain gave a very pleasing solo, "The Lighthouse Bell," and the benediction was offered by Luke L. Wiles, one of the members of the club.

Everybody's friend—Dr. Thomas' Electric Oil, the great household remedy for toothache, earache, sore throat, cuts, bruises, scalds. Sold at all drug stores. 30c and 60c.

MEASLES, SCARLET FEVER DECREASE

Smallpox, "Flu", Typhoid and Pneumonia, However, All Show Increase

Washington, Feb. 21.—How's the health of the nation this year?

Better, thank you, so far as diphtheria, measles and scarlet fever are concerned, answers the United States public health service, with its finger on the pulse of the country.

But there is more smallpox, typhoid fever, influenza and pneumonia than a year ago.

Last year at this time 2,656 cases of diphtheria were reported and this year the total is 1,631 from thirty-four states, or about forty-eight cases a state.

Reports from 104 cities, with population of about 29,000,000, show only 902 diphtheria victims, where last year there were 1,377.

Last year the states reported 14,092 cases of measles, and this year the total for the week just ended is only 2,415.

Scarlet fever has claimed 4,186 victims, about 200 less than the total for last year, according to the state reports. But the cities report 2,401 cases, an increase of about 200.

The figures show 1,324 smallpox cases reported by thirty-four states, and 388 cases reported by 104 cities. The state figure is 120 over that for last year, but the city figure is only increased by six. The cities report twenty-seven smallpox deaths during the week, sixteen of which occurred in Minneapolis.

In spite of the recent scare about shell fish and typhoid fever, only 270 cases of typhoid were reported. Last year there were 202 cases at this time. The cities had ninety-four cases, as against sixty-eight last year.

This week cities from all over the country reported 1,256 deaths from influenza and pneumonia. Last year at this time the total was 1,074. The increase is probably due to the recent severe outbreak of influenza in southern states.
