

BANK PROFITS!

The income of the Plattsmouth banks is derived almost wholly from loans. Obviously only collected and available funds can be loaned. A depositor receives credit for his deposit on the day he makes the deposit and proceeds to check against his account. It may require from two days to a week for the bank to collect the items so deposited. These uncollected items are called float and float cannot be loaned. It is a loss or expense to the receiving bank and adds to the cost of carrying checking accounts. But to obtain a simple illustration, let us disregard float and consider a net deposit of actual funds of \$50 and let us suppose this deposit is to remain in a bank for one year unchanged. What profit will it yield? How much of it can the bank lend and at what available rate?

The bank can keep not over 70 per cent of it loaned and at an average rate of not to exceed 8%. 30 per cent or more must be kept in reserve unloaned. The account is handled once each day for 300 days by the bookkeeper and twelve monthly statements must be made up for the depositor to keep him informed as to his balance; a pass book and a check book are issued because the depositor has a right to check on the account if he wishes to do so. Adding the expense of labor on this idle account to the stationery expense and the net profit is nominal. But this is not the normal account. The normal account of \$50 has 15 or more checks drawn against it per month, or 180 per year. By strict analysis it can be shown that active accounts of this character are unprofitable and properly justify a minimum charge of 50c per month.

ORGANIZATIONS BOOST FOR COMMUNITY BUILDING

Fire Department and Ad Club Each Make Liberal Donations Toward Auditorium.

From Saturday's Daily—
 The American Legion post of this city which is sponsoring the movement for the erection of the community auditorium and convention hall, has received in the past week two very encouraging donations from organizations that add to the splendid showing of a number of the business houses of the city and the individuals who have felt the response to the call for the erection of the community building, that the project is far more encouraging.

The residents of the city realize that the enterprise is one for Plattsmouth, the securing of a suitable auditorium for meetings, entertainments or athletic events, such as has been often desired in the last two years.

The building that the Legion is sponsoring will represent in its completeness the general spirit of progress of the city, the unity of the people in reaching out and helping put across the civic building that will place this city in the ranks of other communities that can receive and properly handle gatherings of various kinds that may wish to meet in the city, or for purely local entertainments and enterprises.

The first of the organizations to take up the assistance of the building fund was the Ad club of the city which gave the Legion of \$100 for the fund and the strong wishes of the club for the Plattsmouth community building. The Ad club made the donation unsolicited. It represents the general spirit of the Plattsmouth people to help out the worthy project and in addition to the donation many of the members have heavy and very liberal donations to the cause as individuals and business firms.

The second of the welcomed and appreciated donations came last evening when the members of the volunteer fire department, who are boosters for the city as well as preservers of life and property in time of stress, voted to pledge the sum of \$500 to the building fund. \$250 of it is to be donated in September and \$250 to be placed in the hands of the building on September 1, 1936. The fire department have built up a very nice fund by their investments, the receipts under the occupation taxes on fire insurance companies as well as the sums paid for nozzlemen at fires, taking from this sum of \$250 that they will see it used in the aid of the new building. The firemen have been noted for their progressive attitude in many things in the past and make a contribution to the building fund that at heart can fall to have the support of the firemen.

These donations represent two very active organizations in the city and with the C. D. of A., the first organization in the city to make a contribution to the building fund shows that the entire community feels the need of the community building and are doing their best to make the building a distinct success.

VISITS OLD HOME TOWN AFTER ABSENCE OF YEARS

Another Old Timer Comes Back to Renew Acquaintances of the Years Gone By.

From Saturday's Daily—
 Last evening John Richardson and grandson, Johnnie, returned home from a visit covering a several weeks period in the west and northwest, including trips through Wyoming, Montana and Colorado. On their way west Mr. Richardson and the little grandson stopped at Cheyenne where they attended the Frontier days observance and were very much pleased with the exhibition of the horsemen and the thrills afforded. They witnessed the collapse of the seats at the rodeo, but fortunately they were not in the seats that collapsed.

One of the most pleasant features of the trip, Mr. Richardson states, was the time spent at Lake Brooklyn, Montana, where they fished to their hearts content and had more of the fine mountain trout than they could possibly use. Here they experienced two real snowstorms and chilly weather all during their stay so that they found campfires at night a pleasant feature. The lake is in the Snowy range, one of the large mountain ranges in that section and which has had a very cold season this year.

On their return to Denver and thence on home Mr. Richardson states they found a great deal of mud from the heavy rains of the last few days.

John says that his Chevrolet is a real fuel saver as he made an average of 23 miles on a gallon of gasoline and that the car had only two punctures in the 2,314 miles traveled and no engine trouble whatever.

Hall's Catarra Medicine
 Those who are in a "run-down" condition will notice that Catarra bothers them much more than when they are in good health. The fact proves that Catarra is a local disease, it is greatly influenced by constitutional conditions.

MRS. JACKSON POORLY
 From Saturday's Daily—
 Mrs. Clyde Jackson, wife of Officer Jackson, has been quite ill at her home in this city for the past few days and the condition of the patient has become such that it will probably be necessary to have her taken to the hospital at Omaha for an operation in hopes of giving her some permanent relief. The many friends of this estimable lady will regret very much to learn of her illness and sincerely trust that she may come through her ordeal without trouble and have her former good health restored.

FAITHFUL OLD WATCHMAN

From Saturday's Daily—
 Marsh Smith, who has been for a long period of years that runs longer than the memory of man, watching out the Missouri river bridge of the Burlington railroad, is today observing his seventieth birthday and working as usual in the task of safeguarding the structure and preventing anyone from attempting to cross the bridge at danger to themselves and the railroad. Mr. Smith has served faithfully and well for many years in the position of watchman, storm and sunshine not making any difference to Mr. Smith as he maintained his lonely watch of the bridge and making trips across and back to inspect the bridge at frequent intervals during the day and night. The job is a lonely one as only the passing trains and an occasional visitor comes to break the dull monotony of the work, but Mr. Smith has proven a most faithful servant to the railroad in every way in his long years.

MANY OLD LANDMARKS ARE BEING RAZED IN THIS CITY

Old Time Frame Structures Are Being Cleared Away for Other More Modern Buildings.

From Saturday's Daily—
 A number of the old time frame structures over the city that have lived through their days of usefulness are now being torn down to make way for other more modern and useful structures that will rear themselves on the sites of the old time buildings.

The residence property on Chicago avenue, long known as the S. M. Chapman residence is now yielding to the passing of time and being torn down to make way for one of the fruits of the modern day life, a gas filling station. This house was built in the late sixties it is stated by the old timers here and was for many years one of the most attractive homes in the city, the members of the Chapman household being born and reared here but since the removal of the family from the city the home has gone to decay and allowed to run down so that the removal of the building will add definitely to the appearance of that part of the city.

Another of the old timers that is soon to be swept out of existence is the frame building at the corner of Seventh and Main streets, long known as the Schidknecht building, which is now past a forty years period of existence. This corner has long been occupied by the frame building and that it is to be removed it will give a very desirable lot for some neat building or residence property. The site was originally occupied, it is stated by the older residents, with several frame store buildings that were destroyed by fire in 1883 and then replaced by the present building that was occupied by the late Dr. W. H. Schidknecht as a residence and office during his lifetime and by the widow as a home for some years, but since has been allowed to go more or less to decay and ruin.

Another of the old buildings that are to be taken away is the German Turner hall on Washington avenue that is to be changed into a residence by the present owner of the building. The old hall has been the scene of some real times in the years gone by that the residents here in years past have participated in, dances, the old time German gatherings and festivals that featured the hall having been real gala occasions.

RETURNS FROM THE WEST

From Saturday's Daily—
 Last evening John Richardson and grandson, Johnnie, returned home from a visit covering a several weeks period in the west and northwest, including trips through Wyoming, Montana and Colorado. On their way west Mr. Richardson and the little grandson stopped at Cheyenne where they attended the Frontier days observance and were very much pleased with the exhibition of the horsemen and the thrills afforded. They witnessed the collapse of the seats at the rodeo, but fortunately they were not in the seats that collapsed.

One of the most pleasant features of the trip, Mr. Richardson states, was the time spent at Lake Brooklyn, Montana, where they fished to their hearts content and had more of the fine mountain trout than they could possibly use. Here they experienced two real snowstorms and chilly weather all during their stay so that they found campfires at night a pleasant feature. The lake is in the Snowy range, one of the large mountain ranges in that section and which has had a very cold season this year.

On their return to Denver and thence on home Mr. Richardson states they found a great deal of mud from the heavy rains of the last few days.

John says that his Chevrolet is a real fuel saver as he made an average of 23 miles on a gallon of gasoline and that the car had only two punctures in the 2,314 miles traveled and no engine trouble whatever.

 Those who are in a "run-down" condition will notice that Catarra bothers them much more than when they are in good health. The fact proves that Catarra is a local disease, it is greatly influenced by constitutional conditions.

MRS. JACKSON POORLY
 From Saturday's Daily—
 Mrs. Clyde Jackson, wife of Officer Jackson, has been quite ill at her home in this city for the past few days and the condition of the patient has become such that it will probably be necessary to have her taken to the hospital at Omaha for an operation in hopes of giving her some permanent relief. The many friends of this estimable lady will regret very much to learn of her illness and sincerely trust that she may come through her ordeal without trouble and have her former good health restored.

CASS COUNTY TO HAVE BALL TOURNAMENT

Plattsmouth, Greenwood and Manley to Participate in a Series of Games at Each Town.

From Saturday's Daily—
 The lovers of the great national pastime of baseball in Cass county are to have a real opportunity of enjoying some of the fastest contests that they have seen this season in the forthcoming tournament to be staged between the teams of Plattsmouth, Greenwood and Manley.

The games are to be played at each of the three towns so that the fans in each section of the county can have a real chance to see the fast work of the three speedy teams.

The final details of the tournament were prepared last evening at a meeting held at Manley at which representatives of the several towns were in attendance and all were unanimous in their decision as to the manner in which the games were to be conducted. The representatives of the clubs selected Theodore Harris of Manley as the secretary-treasurer of the tournament, who will supervise the conduct of the series.

As the games are staged in the different towns, the home team in each case will provide the grounds, balls and umpires, the receipts being later divided among the teams in order of their standings at the close of the Sunday of playing.

The games will all be played on Sunday, this being more convenient for the players and the fans of the various communities, the home team in each instance playing the "two visiting teams."

The first game of the series will be held Sunday, August 16 at Greenwood, when Plattsmouth and Manley will journey there to meet the west side team.

On Sunday, August 23, Greenwood and Plattsmouth will go to Manley for the second game of the series. It is expected to hold the last game on Sunday, August 30, at Plattsmouth when Plattsmouth will play Greenwood and Manley. In case that the Plattsmouth team is then playing in the Council Bluffs tournament the date here will be made as early a date as possible.

All three of the teams have good, fast players and they will not be allowed to do any "padding" of the lineup or strengthening of the team as they all have men as good as can be found on the amateur teams in the state.

It has been arranged that the prices for the double headers will be fifty cents, a very low price considering the fact that some of the best players in the county will be out to entertain and amuse the fans, the proceeds going to make up the purse that will reward the winning and losing teams in the series of games.

GET AT THE CAUSE

Many Plattsmouth Folks Are Showing How to Avoid Needless Suffering.

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what wonder, with the burning and scalding, the attendant backache, headache, the dizziness, life is indeed a burden. Doan's Pills—a stimulant diuretic to the kidneys—have brought peace and comfort to many Plattsmouth people's experiences.

H. J. Kaufman, mechanic, 615 S. 6th St., says: "Sharp pains seized me across my back until I was unable to work for several days. Every move I made sent a knife-like pain through my back, my back was so weak, I felt unsupported and I could hardly turn over in bed. The kidney secretions were dark and scalded in passage. I used Doan's Pills and they cured the entire trouble."

Mr. Kaufman is only one of many Plattsmouth people who have gratefully endorsed Doan's Pills. If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask distinctly for DOAN'S PILLS, the same that Mr. Kaufman had—the remedy backed by home testimony, 6 cents at all dealers. Foster—Milburn Co., Mrs. J. Buffalo, N. Y. "When Your Back is Lame—Remember the Name."

WILL DISCUSS EVOLUTION
 From Saturday's Daily—
 While Rev. Walter R. Robb, pastor of the First Christian church, is absent from the city Sunday, his place will be occupied by LaFayette Overman, well known lecturer and speaker, who will have as his subject of discussion that of Evolution.

This theory of the origin of man is one of the matters that have been largely in the public eye in the last few months, many eminent leaders of the moderate school and the fundamentalist having taken up the matter and given it a great deal of publicity.

The scientists have contended that man had his origin from mere animal organisms and the Bible and strict Bible teachers contend that the divine origin of man is clearly proven in the Bible.

HOMES FOR SALE
 If you are looking for a home in Plattsmouth it will pay you to consult with C. E. Martin, he can fit you out with the kind you want at right prices. A3-6id-4tw

ARREST MADE IN CASE OF ALLEGED SWINDLE

Richmond, Va., Aug. 7.—An alleged mail fraud scheme which federal agents said revolved about a mythical 300 million dollar fortune lying unclaimed in the United States treasury, was brought to light here with two arrests.

S. T. Kent Oliver and R. W. Warren, well dressed and middle aged, were the men arrested, and a search was under way for George Stevens Stearns, an alleged accomplice. The warrants against them charged "conspiracy to defraud certain persons by use of the United States mails."

Agents working on the case asserted that citizens of Petersburg, Va., alone had contributed about 10 thousand dollars to help finance court proceedings for recovery of the "unclaimed fortune." Many persons in other parts of the country they said, had similarly turned over their money with the expectation of receiving large shares of the 30 million dollars.

NEHAWKA HAS A CALL FROM SNEAK THIEVES

Butcher Shop, Garage and Plumbing Shop Are Visited by the Unwelcome Callers.

For the first time in a considerable period the town of Nehawka, the metropolis of the apple section of Cass county, has been visited by petty thieves who made away with small amounts of goods after they had gained entrance to the Opp meat market and the Clarence Hansen garage and plumbing shop.

At the meat market there had evidently been several attempts made to get into the building before the invader was able to accomplish his purpose. The screens on two back windows and the door were found out and entrance made to the building through a transom over the door, this evidently being the last hope of getting into the building before the one that permitted the entrance to be made. When the owner of the place reached there Wednesday morning the boxes and barrels that had been used to reach the transom were found and it was realized that the community had harbored a small time burglar.

The door of the Opp store, it is stated, was held in place by an iron bar but the parties had overlooked this in making what was evidently a hurried getaway and they had crawled out the same way they had come. There were several pounds of candy and gum reported missing from the meat market by the owner when he checked up Wednesday but nothing else as far as can be learned.

At the Hansen garage and plumbing shop the burglar who made entrance into the building had evidently in some way gained possession of a key that unlocked the building and had an easy time getting in and out. There were several small wrenches taken as well as a 30x3 iron tube.

The Nehawka people are convinced that the work is that of local talent and whom it is hoped to catch if they attempt any more of the escapades that is certain to land them in bad.

WELL KNOWN MURDER THEORY STRENGTHENED

Mattoon, Ill., Aug. 5.—The suicide theory was weakened and a murder theory strengthened somewhat today by further developments in the investigation of the death of Miss Cora Schilling of Coles county that the woman's body had not been in a sitting posture in the cistern when he and Boss Lilly, a tenant, found it, as was at first reported.

Thomas Seaman, the spinner's brother-in-law, told Coroner P. S. Schilling of Coles county that the woman's body had not been in a sitting posture in the cistern when he and Boss Lilly, a tenant, found it, as was at first reported.

He said that it was in an almost upright position, but with the head and torso bent slightly forward. The coroner said this might indicate that the woman was dead when an unknown person dropped her body into the cistern.

PLATTE RIVER RAISES

From Saturday's Daily—
 The Platte river was on a rampage yesterday afternoon and showed a two inch raise at the close of the day, the result evidently of the heavy rain of Thursday and the overflow from the streams that empty into the Platte river. The sudden raise interfered to some extent but without any real damage.

The government's warning to prohibition agents not to shoot innocent persons is fair enough, most people will concede, though extreme advocates of dry enforcement may fear it is an indication of weakness at Washington.

Disease is an effect. It is simply the absence of normal nerve function. Chiropractic locates the cause of the effect, adjusts it and the effect vanishes.

NATIONWIDE DISCUSSION SECURED

A summary of the six highest papers submitted in the \$20,000 prize contest offered by Bonbright & Company, Inc., and the American Super-power corporation, of New York, for the best review and forecast of the electric light and power industry to cover the decade 1929-39, shows a marked uniformity of opinion regarding electrical development. Four hundred and thirty-eight papers were submitted from all parts of the country and David Cowan of Montreal, Canada, won the first prize.

A summary of forecasts for the industry as of January 1, 1930, places energy to be generated at about \$0,000,000,000 k. w. h.; gross revenue, \$2,000,000,000; capital invested, \$10,000,000; number of customers, 22,000,000; coal consumption per k. w. h. from 1 to 1.8 pounds and extensive growth in use of powdered fuels.

There was a marked difference of opinion as to future farm electrification, municipal ownership was not favored, reduction in cost of electricity was predicted, and value and growth of customer ownership of electric securities were emphasized.

Domestic refrigeration was acclaimed one of the outstanding accomplishments of the decade. It was shown that holding or investment companies, capable of bringing about interconnection of individual company properties were essential to proper electrical development.

A review of prize winning papers published shows tremendous interest in development of electric industry and progressive part it has played in acquainting the public with its problems and thereby gaining public good will and fair consideration.

GIVES SHOWER FOR SUMMER BRIDE YESTERDAY AFTERNOON

Mrs. Lloyd A. Sharp is the Guest of Honor at a Most Delightful Social Event.

From Saturday's Daily—
 Yesterday afternoon the beautiful country home of Mr. and Mrs. Philip Hirz was the scene of a very beautiful and pleasing gathering of friends who were the guests at a miscellaneous shower tendered by Mrs. Philip Hirz in honor of Mrs. Lloyd A. Sharp, a recent summer bride, formerly Miss Leota Hackenberg.

The guests had come with many handsome and attractive gifts that were suitably presented to the guest of honor with the well wishes of the friends and will add to the charm and usefulness of their home.

At a suitable hour the guests were treated to very dainty and delicious refreshments served by Mrs. Hirz which added to the delights of the members of the event.

Those attending the pleasant event were: Mrs. John Buechler, Mrs. Ben Speck, Mrs. Louie Friedrich, Mrs. Louie Meisinger, Mrs. Fred Buechler, Mrs. Edgar Meisinger, Mrs. J. P. Meisinger, Mrs. Fred Lugsch, Mrs. C. C. Koke, Mrs. Louie Schissel, Mrs. Will Renner, Mrs. Will Hirz, Mrs. Adam Stoehr, Mrs. Fred Nolting, Lavetta Renner, Mrs. George Kafenberg, Catherine Reuhl, Florence Woodruff, Mrs. Elmer Rummell, Miss Ruth Hook of Omaha, Mrs. O. M. Kintz, Mrs. Herman Graham, Mrs. Fred Tschirren, Kathryn Hirz, Leola Hirz, Mrs. Clara Sharp, Ione Sharp, Mrs. Carnahan of Paris, Illinois, Mrs. Hammond Sharp, Elvera Born, Mrs. Walter Robb, Mrs. S. O. Hackenberg, Gretta Hackenberg, Mrs. O. C. Rhoades, Hilda and Malinda Friedrich, Emma and Elizabeth Hirz, Mrs. John Parkening, Mrs. Fred Baumgart, Mrs. Frank Claus, Mrs. Philip Kehne, Mrs. Fred Guenther, Mrs. Mary Becker, Mildred Stoehr, Elizabeth and Marie Nolting, Mrs. John Holmes and Catherine Meisinger.

SADDY GETS NASTY RAP

From Friday's Daily—
 Henry Krefel, one of the lads, who at varying times, engages the pastime of caddy at the local golf course, is wearing his left hand in a sling as the result of having the hand get in the way of the hard driven little white ball, propelled by the force of a trusty driver. The ball struck the hand of the young man and resulted in the fracture of several small bones of the hand.

"The American nation has lost a great patriot; the world a great figure; the Christian religion a great champion; and I have lost a great friend."—Ed F. Dunne, former governor of Illinois.
