W. C. SCHAUS IS NAMED AS DEPUTY SHERIFF

Selection of Well Known Auto Salesman as Deputy in Office of E. P. Stewart Announced.

From Wednesday's Daily—
The announcement was made at the court house today of the appointment of Walter C. Schaus as deputy in the office of Sheriff E. P. Stewart, the position of deputy having been vacant since the resignation of W. R. Young last spring.

In the office the services of a deputy are badly needed as the time of the sheriff is well taken up almost every day with calls to various parts of the county as well as the routine work of the office and without a deputy it is necessary many times to leave the office for considerable periods of time without anyone on hand in case some emergency may arise that will require their services.

There are in addition to the criminal work in the office in ferreting out law violators a large amount of legal papers to serve and which require frequent trips to all parts of the county, these trips are taking up a great deal of time and thereby hampering the sheriff in the discharge of the full duties of the office.

Mr. Schaus, who is selected to be the new deputy, has made his home here for several years and has been engaged for the greater part of the time with the Plattsmouth Motor Co. as salesman and in the last few months has served as the manager of the O. K. garage, which is owned by Mrs. Petring. He is a young man of very pleasing personality and is about to make a very effective assistant to Sheriff Stewart, particularly in the handling of the office work and serving legal papers that from time to time accumulate and his appointment will give the sheriff more time to handle the other matters of the office much more conveniently.

FORESTRY IN NEBRASKA

More than 196,000 trees were distributed last year to farmers in the Kinkaid district of Nebraska from the United States forest service nursery at Halsey, Neb., according to a circular just issued by the United States department of agriculture. "Tree Distribution Under the Kinkaid Act of 1911." This brings the total number of trees distributed since 1912 above 1,800,000.

Reports sent in by the farmers who have planted trees received from this nursery indicate that an average of about half of them survive. This is a good showing considering the inhospitable sand hill sites on which many are planted. Some planters who take unusually good care of the trees have obtained almost perfect stands.

Jack Pines planted by the forest service itself on the sand hills at Halsey have succeeded so well that true forest conditions now prevail in some of the plantations. The circular states that 10,000 acres have been successfully planted by the government, and even on the roughest and lightest sand hills in the state 50 to 85 per cent have survived. Some of the trees planted twenty years ago have reached a height of thirty-two feet and a diameter of six inches, and the average height and diameter of trees of this age are twenty-four feet and four and two-thirds inches respectively.

The main object of the tree distribution by the government, says the circular, "is to stimulate interest in tree growing, chiefly for the production of fuel and fence posts and the establishment of windbreaks. With proper care, wood lot plantations should begin to yield fence posts and firewood in fifteen years. Since trees will do well on any suitable for farm crops, profitable use can be made of what might otherwise be unproductive areas. Furthermore the establishment of windbreaks and wood lots makes living conditions more pleasant and adds materially to the value of the property."

The circular gives directions regarding species to plant and methods of planting and caring for the trees.

FOOTBALL TEAM TO COUNCIL BLUFFS ON NEXT FRIDAY

From Wednesday's Daily—
The Plattsmouth High school football team will play its first scheduled game of the season Friday when the local warriors play Thomas Jefferson High school at Council Bluffs, one of the best schools in the Iowa city and which has the reputation of being one of the fastest football aggregations in western Iowa high school circles.

The local boys have been working out each evening at the baseball park and getting hardened up for the beginning of the season and will have as their first opponent a team that will thoroughly test their mettle in a hard fought battle.

The Plattsmouth team will play its first home game Friday, October 3, when North High school of Omaha will be here for the curtain raiser and promises to be a very fast team as North High has reached a high standing in its athletic work, altho a comparative new school.

MAYORS ASK OPERATORS TO GRANT "CHECKOFF"

Philadelphia, Sept. 20.—Mayors and burghesses of sixty cities and boroughs in the anthracite region of Pennsylvania have sent letters to the mine owners urging them to grant their employees the "checkoff," said a statement issued tonight by the United Mine Workers.

The "checkoff" provides for the deduction of union dues by coal companies on the written consent of the miners and turning it over to the local unions.

Did You Know These Things About Oil Heating?

There are only four oil burners out of the 1700 on the market that you can possibly be considering. These four all sell for about the same price. If there is any doubt in your mind which to choose, read the facts below.

The more capital a manufacturer has, the better able he is to build in volume and to give you the benefit of his savings in better quality or lower price. OIL-O-MATIC is made by a million-dollar oil burner institution—by many times the largest in the world.

Highly successful products are made by successful concerns. The OIL-O-MATIC factory, the largest in the industry, is a monument to the uninterrupted success of OIL-O-MATIC for nearly 7 years.

The fact that OIL-O-MATIC is operating successfully in more homes than any other oil burner is merely an indication of its merit.

But when OIL-O-MATIC dealers place orders for more burners in 65 minutes than any other concern sold all last year, there is little room for doubt about the kind of service OIL-O-MATIC gives.

"The house heating fuel of the future," say the Empire Refineries, "is going to be the heavier grades of fuel oil." It contains more heat units per gallon and costs on an average 1-3 less than kerosene or distillate.

The Underwriters' Laboratories, after exhaustive tests, proved that OIL-O-MATIC could use fuel oil as low as 28 degrees equally as well as any of the lighter grades. Thousands of OIL-O-MATIC owners are using fuel oil and saving as high as 25% over burners restricted to more expensive oils.

There are four natural laws of oil combustion, each as hard and fast as the law of gravitation. No oil burner can ever be made to work right if its principle is wrong.

OIL-O-MATIC was the first automatic oil burner built to operate according to these fundamental principles.

Continuous pilot lights, drip bucket shut-offs, pots inside the firebox, and crank handles on automobiles are all in the same class.

OIL-O-MATIC eliminated the needless waste of the pilot light 6 years ago. No part is inside the firebox to burn out. It is the only oil burner with the Williams Thermal Safety Control that makes the whole burner a single unit. Nothing can work unless everything is working right.

"No oil burner is any better than its installation," says E. J. Smith of the Underwriters' Laboratories. OIL-O-MATIC maintains the Williams Institute of Heat Research, the largest oil burning school. Over 1500 dealers, service and installation men have graduated from this national institution.

Once people learn what oil heat means, they never go back to coal even if they have to replace their burner with a better one.

As many OIL-O-MATICS are being bought to replace other burners as the total sales of many oil burner companies.

Right now is the time to decide. We are working at top speed to complete all installations in time for cold weather. Every day you delay makes it that much harder to get your burner installed in time. See a demonstration today. Take a year to pay, beginning October first, if you wish.
