Receives Letters Patent. Messrs. WHY! WHY! WHY!

The San Francisco Bulletin brings up the question of irresponsible automobile drivers being allowed to operate on crowded streets and highways. It cites the case of a local accident where a child of two years lost his left arm almost to the shoulder. His mother had a fracture and dislocation of her ankle. The driver of the machine said, "I have not paid for the car, have no insurance and am in debt."

The question then arises, why should such an irresponsible driver be allowed on a public highway with as deadly an instrument as a motor car? If a man cannot afford to get a public liability insurance on his car, he should not be permitted to run it. When it is suggested that such a policy be required by law, agitators for public ownership of industry immediately demand that such a policy be furnished by the state "at cost." This means "at cost of taxpayers," for the state cannot write an insurance policy which will pay expenses of writing it, cover losses, and taxes which should be collected, for any less than a private company.

Why should the general taxpayer have to run the risk of being assessed even a single penny in order to try to furnish state insurance "at cost" to an irresponsible automobile driver who doesn't own his car, who can't afford to buy insurance, and who is in debt? Why should such
