All who had radios enjoyed the numbers which were played by James E. Hatchett on last Monday evening. The first one was surely excellent, and for the running against the microphone by some of the crowd while Mr. Hatchett was playing the second number he would have made a better showing. To add to this someone ran against his elbow, knocking the violin bow out of his hand. Notwithstanding all this he was able to make a good showing.

Says Come Get the Hen.

L. C. Horcher had a nice flock of chickens a few days ago, and some chicken thief came and took all but one of the flock. Mr. Horcher said that they had just as well come and get the other hen, and the chicken coop, as he will not have any use for them now. We say that some one should have been there and gave the miscreant a charge of buck shot as he was leaving, and for ballast make him stand up when he ate his dinner.

Some Change in Business

Respect and Obey the Law.

The law student, when beginning the study of the law as a profession finds a diversity of definitions for law. One rule of action, and one more elaborate, "a rule of action emanating from the superior by which the inferior is governed." There are good, and in the case of American laws, the superior is the voice of the people, which is the voice of God. There is another definition which we think in a way is very applicable to the case and tells the constituency of law. This law is the concrete experiences of the people in the best government of themselves.

The matter resolves itself into the phase of who has the right to make the laws. In the case above cited, when the people are the sovereign, it is very naturally the case that they are the ones from whom the law comes, and guided by the experiences of mankind from the earliest glimmerings of the world's history, the revelations from the Maker of the universe, God, the Father, and Jesus Christ, the Son, they will not go wrong in making the rules by which they shall be guided in the conduct of the affairs of mankind.

"In the beginning God created the world and all things therein." He was the author of the universe, the world and the heavens. He, therefore, of necessity, had the right, and still retains the right to make and have executed, the laws.

There are different laws, all intended for the best regulation of the affairs of mankind. Some are framed to promote progress, and in order that public improvements may be furthered, others to define rights of persons, rights of property, and the rights of the government that is to execute the laws. Others are restrictive, there are international laws, constitutional laws, common laws, statutory laws, laws of nature, which are the laws of God.

After the world had become peopled and there were diverse ideas of how the people should conduct themselves, and the Israelites had been oppressed in Egypt, and had been led out of their bondage, the Red Sea being divided for their escape, thru His servant, Moses, the Great Jehovah handed down a set of laws for the government of man which have been the foundation of all law and constitutional rights since. In them it is also seen that God expected man in a measure to work out his own destiny, and the manner of his own government. This set of laws are in short as follows:

The Ten Commandments.

1. Thou shalt have no other gods before Me.

2. Thou shalt not make any image for a god, either in heaven or on earth.

3. Thou shalt not take the name of the Lord, thy God, in vain.

4. Remember the Sabbath day to keep it holy.

5. Six days shalt thou labor and do all thy work.

6. Honor thy father and thy mother, that thy days may be long in the land.

7. Thou shalt not kill.

8. Thou shalt not commit adultery.

9. Thou shalt not steal.

10. Thou shalt not bear false witness against thy neighbor.

When these were handed down from the mount by God through Moses and were delivered unto the people they pronounced them good. As the world grew and the people multiplied other laws were necessary for the regulation and government of the people.

Governments were instituted among men and laws particularly applicable to the particular governments were made and, in most cases, with a view to the best interests of the people and of other nations or governments.

International law or the comity of nations have been established that their relations might be more agreeable and that safety and justice might prevail.

Then came some of the Pharisees to the Master saying as they desired to entangle Him in the meshes of law with what they thought was a hard question and asked Him whether it were right to give tribute unto Caesar, as he, the ambassador of the most high God, was teaching that all must give obedience to God.

They had thought that if He should say that there was no cause for rendering obedience unto Caesar they would complain against Him to the Roman law, and if He did say to respect the law of Rome, then the people would forsake Him and therefore they asked the question.

The Master said where is the tribute money? When it was produced He asked whose image and subscription is this on the coin. They said it is Caesar's. Then came the reply, "Render unto Caesar the things which are Caesar's and unto God the things which are of God."

In other words He wished to impress on them that it was necessary for all to observe the laws under which they live.

In our case the laws of this land guarantees life, liberty and the pursuit of happiness, and it also requires that we be just to each other and in it is embodied the laws of the ten commandments as given above: Thou shalt not kill; Thou shalt not commit adultery; thou shalt not steal, and thou shalt not lie about thy neighbors.

Golden Text: Think not that I came to destroy the law, or the prophets, I came not to destroy but to fulfill.—Matt. 5:17.

Respect and Obey the Law.

The law student, when beginning the study of the law as a profession finds a diversity of definitions for law. One rule of action, and one more elaborate, "a rule of action emanating from the superior by which the inferior is governed." There are good, and in the case of American laws, the superior is the voice of the people, which is the voice of God. are living, and for this you are also expected to observe the laws which the whole people have made. God enters into partnership with man, kind and in this partnership, He furnishes the land, the balmy winds, the copious rains, the sunshine, man is expected to provide only the toil in order to raise a crop. This is only because he was disobedient for until the fall, all was entirely free.

Now we are citizens of the best country on the globe, we full-chested Americans all boast of this, and while this is so, we have to obey the law, whether every particular one is agreeable to us or not. The highway traffic laws are made for the safety of all the people. The glaring lights are a menace to the traveling public and a set of rules are required that all may observe then and safety for all results. Just as these laws and rules are observed are we safe, and he who does not observe them has no right to expect that protection which he is not willing to give. In the case of human laws the laws should be obeyed while we have them, if they are not what is required change them, but while they are on the statute books obey and respect them, and unless one can do this they are not good American citizens.

Regarding the laws of God, they

are right, we have nothing to do but obey them and assist others to do so.

GOES TO ROCHESTER

From Wednesday's Daily—

This afternoon Mr. and Mrs. T. H. Pollock departed for Rochester, Minnesota, where they go to visit the Mayo hospital and where Mrs. Pollock will receive treatment and possibly undergo an operation. The health of Mrs. Pollock has not been the best for some time past and in the hopes of restoring her to her former good health she will consult the eminent specialists at the Mayo clinic to determine her case. The many friends here are hopeful that her stay may be short at the hospital and that she may return home recovered from her poor health.
