South Dakota Bankers Favor Nebraska Law

Visiting Delegates Representing Association Willing to Repeal Law and Start Over.

A delegation representing the South Dakota state bankers association called on Secretary Peterson last Saturday to investigate the workings of the Nebraska bank guaranty law. The delegation comprised George A. Starring of Huron, secretary of the state association; David M. Finnegan, president First National Bank, Yankton; Otto V. Meyhaus, president of the Corn Exchange Savings bank of Sioux Falls.

The visitors remained at the capitol two hours. The state association of South Dakota bankers desire the repeal of the present law on the ground that they are \$48,000,000 of guaranty fund certificates outstanding and no apparent way to pay them. Mr. Peterson said the delegation expressed a willingness to repeal their present law, which differs from the Nebraska guaranty law, and are willing to start over again with the enactment of a new law. The visitors were said to be convinced that the Nebraska law is working well and promises to accomplish its purpose. They said politics ruined the operation of the South Dakota law.

Mr. Peterson has issued a printed folder telling of the workings of the Nebraska law. "Nebraska is a remarkable state and tells a story no other state can tell," says the statement. "Nebraska depositors' guaranty fund protects \$28,000,000 of funds deposited by 550,000,000 people in the \$96 Nebraska state banks, and every dollar is safe. Nebraska stands alone as a state where depositors sleep well at night. It is a story

no other state can tell. As compared with other states Nebraska stands first in banking, second in hogs, third in wheat, third in corn, third in cattle." In answer to the question, "Has Nebraska's law been tested?" Mr. Peterson says: "It surely has. Having been in operation since 1911, or more than fifteen years, during which time we have passed thru one of the worst periods of deflation ever known, it surely cannot be said but what the law has been thoroughly tried out. During that time 155 banks have been closed by the state. Practically all of these have been during the past five years. Of this number 114 have been placed in receivership and deposits of every \$28,000,000 paid in full. The commission is now operating thirty-seven banks as going concerns and in four banks receivers have been appointed but sufficient time has not elapsed for the court to pass on claims. "In making this payment of more than \$28,000,000 no depositor has ever lost one cent, nor has he had to wait for his money. As soon as his claim was approved the money was available to pay it. Of this \$28,000,000 paid to depositors, the state banks have contributed about \$11,500,000, the balance being secured from the assets. During the past twelve months the commission has paid more than \$7,500,000 of deposits or an average of about \$25,000 per day. "There remains in the hands of the commission more than \$10,000,000 of deposits belonging to the banks whose deposits have been paid in full. The proceeds from the collection of these assets will be returned to the guaranty fund and thus indirectly to the banks, to reimburse them for the amounts already advanced. While the value of these assets is doubtful, yet it is certain that a considerable sum will be realized." Mr. Peterson asks for changes in the law recommended by the banker delegates who met recently in Omaha.
