PUBLISHED SEMI-WEEKLY AT PLATTSMOUTH, NEBRASKA  
 Mated at Postoffice, Plattsmouth, Neb., as second-class mail matter

R. A. BATES, Publisher

SUBSCRIPTION PRICE \$2.00 PER YEAR IN ADVANCE

The Bee's non-partisan! Ahem! Oh, Lord! Where do you get it?  
 About the only establishment that makes money, without advertising, is the mint.  
 Kipling can't even slip out of his predicament by claiming to have been misquoted.  
 Of course politicians know there are two sides to every question; don't they take both?  
 Los Angeles is slipping. The pulpit, not the movies, furnished the year's greatest sensation.  
 Work your face to be beautiful, says a London expert. But be sure to work it in the right place.  
 Our children are awfully firm when it comes to holding out against being led into anything right.  
 This beautiful weather is just what the farmers need and they hope it will continue for several weeks yet.  
 You may have noticed that the more an officeholder talks about resigning his job, the tighter he clings to it.  
 In our opinion, Mr. Smith of Illinois is as bad as Mr. Vane of Pennsylvania, but Mr. Smith has been "dry" cleaned.  
 Charles Evans Hughes has been appointed to The Hague. We always suspected those whiskers would get him into trouble.  
 Spain has a law by which habitual drunkards must have their heads shaved every four weeks. Here in Plattsmouth the habitual drunkards merely drink stuff that makes his hair curl.

Misery loves company, but company never loves misery.  
 Many a man who isn't coward is afraid of consequences.  
 It is not a bad idea—McMullen is scared—and badly scared.  
 Governor McMullen is very mad, one would judge by the way he talks.  
 Queen Marie is almost here, and the fool Americans will go crazy over her.  
 Well, Queen Marie was finally able to find a steamship that wasn't too crowded.  
 These are the days when a college freshman is perfectly safe—if he's in a hospital.  
 Youth and age can get together on almost anything if age will only come all the way.  
 Most of us laugh at neighbors who run after rich people, but we envy them if they catch up.  
 Mr. Mencken says America had a good time during the war. Surely, and on Armistice Day, too.  
 A Cincinnati bootleg king has been put in jail. The common people are losing all respect for royalty.  
 Fortunately but few men say what they really mean—otherwise blacked eyes would be more common.  
 Head hunters attacked naval flyers. We ought to send some of our weather prophets down there.  
 France and Germany are being nice to one another again. Now if one of the other just doesn't say too much!

## Overdoing?

Hurry, Worry and Overwork Bring Heavy Strain.  
 MODERN life throws a heavy burden on our bodily machinery. The eliminative organs, especially the kidneys, are apt to become sluggish. Retention of excess uric acid and other poisonous waste often gives rise to a dull, languid feeling and, sometimes, toxic backaches and headaches. That the kidneys are not functioning perfectly is often shown by burning or scanty passage of secretions. More and more people are learning to assist their kidneys by the occasional use of Doan's Pills—a stimulant diuretic. Ask your neighbor!

### PROSPERITY—FOREIGN TRADE

The government's financial reports on foreign trade for August show our exports as \$50,000,000 in excess of imports.

For the first eight months of 1926 our foreign trade sheet has shown an unfavorable balance of trade against us, running into many millions. However, August's sudden swing in our favor has reduced the adverse figure to \$16,000,000, and September's foreign trade promise to put us on the right side of the ledger.

It is problematic whether we still need to assume that our prosperity is greatly affected one way or the other by the relation of exports, as some of the old-fashioned and pessimistic financiers would have us believe.

Let us look at some figures. The value of our annual manufactured products has increased to the amazing sum of -65,000,000,000, and our net farm products are valued at \$12,500,000,000. As our exports in 1925 amounted to \$4,819,000,000, it will be seen that our own people absorb 15-16th of our agricultural and manufactured commodities. In 1925 we imported goods to the value of \$4,227,000,000. This leaves the balance of foreign trade in our favor at \$592,000,000. It seems like a large figure, and does amount to \$5 per capita, but when it is pointed out that this amount is only 1-130th of our self-produced value from the farm and factory, it becomes apparent that whether the balance of trade swings with us or against us it cannot materially influence the nation's prosperity.

There is another lesson to be derived from this showing and that is, since the apparently serious period of the post-war business slump of 1921, we have forged ahead each year in home production valued at billions of dollars, while our imports, and more than balanced exports, have grown only in humble hundreds of millions. Such being the case, it is self-evident that we are so strongly entrenched in the new economic system of high wages—meaning purchasing power—and mass production at lowering unit costs, that we can well afford to materially lower the tariff wall without endangering our industrial structure.

It can also be said that no foreign nation is giving evidence so far in spite of their beggarly low wages, of being able to compete with us. In fact, it is time to try the experiment of giving the consumer, particularly the farmer, the benefit of reducing prices by scaling down the protective tariff.

**LOWER TAXES, MORE MONEY**

Nobody should be compelled to read figures, and most of us never do it voluntarily. However, the undertaking now and then is conducive to such inward content that we find ourselves doing it, regardless of prejudices against the practice.

Take our government's financial showing these last three months as an example. We had receipts of \$1,055,501,667. This was in increase of more than one hundred million dollars. And in the same period we spent \$757,462,110 which represented a cutting down of government outlay amounting to twenty-three million.

Lower tax rates brought in large revenues. We made money for Uncle Sam by cutting the cost of doing business all over the country—making government taxes on business and all other activities less than before. So wise handling of national affairs puts money in the people's pockets.

## WHAT PRICE MATRIMONY?

Did anybody ever tell you before you were married that two can live as cheaply as one?  
 Investigation has not been able to determine just where that fascinating fallacy was started.

But it is an interesting idea, and the facts and figures necessary to run down and forever kill this respectable old tradition are worth our time.

Mrs. Amy Braden, secretary of the state department of public welfare in California, can tell the hopeful young bridegroom just how right or wrong he is in his fond expectation that two can live as cheaply as one. Mrs. Braden has made a study of the business and she knows.

For instance, if you happen to be a clerk and you decide to get a wife and live happily ever after, you can count on your annual living expense being boosted by the sum of \$826.26. But don't be downhearted. Further figuring reveals that if your wife is that rarest of all gems—a good manager—the added expense of \$826.26 may be cut to \$720.66.

Mrs. Braden calculates that the living expense of a clerk who is not married averages \$1,285.70 a year, while the living expenses of a man and wife in this same station of life should not be more than \$2,111.46.

And this, with the "good manager," might be cut to \$2,006.46.

Of course this is not actual minimum living cost. This is, rather, a "fair living cost" which ought to provide a reasonable amount of comfort and health.

Perhaps there is too much talk about the added cost of living when a man marries. Marriage, if it is worth anything, it is worth paying for. It should not be regarded in terms of dollars and cents, so long as the man has sufficient income to permit a decent home and upkeep.

Things that cost nothing are generally worth about what they cost.

Gertrude Ederle was also the first woman to go over 14 hours without powdering her nose.
