During the banquet there was music furnished by the local musicians of which Miss Violette Calfee was one of the players.

Home from the West. Mr. and Mrs. E. M. Jardine who were in the west for some ten days taking an outing and visiting with friends returned home on Monday of last week, and report an excellent time while they were away. They found the chicken shooting fine and it was so good that Earl nearly wore himself out in pursuit.

Has a Wonderful Plant. Harry Leesley, who is a breeder and raiser of many chickens, has a very fine plant with some half dozen incubators and enough brooder houses to care for them has now in one pen some four hundred and ten of white Leghorn pullets, and in another pen one hundred and fifty-five with others elsewhere, enough to make something over six hundred layers when the season comes. Besides this, he has just disposed of some one hundred and sixty of this

excellent breed of layers. It is his intention to carry over the next season one thousand laying chickens. The bunch he has now there sure looked nice. He has electric lights of which he has a plant at the home so arranged that it makes the day longer by furnishing light in the evening and the night shorter by lighting the houses before day. He has lights all over the place so that it is not possible for some chicken thief to think he can get by with a theft.

"A GROWING MENACE" Being too busy this morning to write something myself I am taking the liberty again of borrowing from my friend who is secretary of the McComb Mississippi Chamber of Commerce. Smith is his name—as common as Dais—but a very uncommon fellow. His article applies to every city and every citizen regardless of location.

A Growing Menace (By C. H. Smith.) "Members of the Chamber of Commerce and the public generally will hear a great deal and read a great deal about the itinerant salesman 'the man who will never help you build a town, and who contributes nothing to the welfare or support of McComb."

"The itinerant is a bird of prey and a bird of flight. His chief purpose is to get business to which he is not entitled and for which he does not pay his proportion of expense. He takes advantage of unthinking people and profits by the industry, effort, resources and wealth of this community which he is not interested in fostering or maintaining. These are the facts.

"To many members of the Chamber of Commerce patronize these itinerant salesmen for every kind of merchandise, which might be purchased here in like quantity and quality at a fair price. The practice is wrong and intolerable. Not particularly because it is unfair and a menace to the local retail merchants who may be your customer, but fundamentally wrong because the social and business structure is being weakened and undermined. Such citizens can not be associated with his brother, George Conis, in the conduct of the Palace Shining parlor. Mr. Conis was located here in this city during the time that George Conis was in the army during the World war and is well known to a large number of the residents here.

Do not fasten end of aerial on electric light poles or run it parallel to any electric light line. If the aerial is placed at right angles to the light line, there is least chance for induction and the reception is improved.

Radio fans in placing their aerials, cannot be too careful when they choose a location near an electric light line. They should never attempt to place the aerial over the electric light wires as there is the possibility of coming in contact with wires carrying high voltage either at the time of building the aerial or later when sleet might break it down.

Radio sets are not built to withstand very high voltage. Also, the operator is not protected in case the aerial is connected by accident to a high voltage line.

Presbyterian Aid Society AT CEDAR CREEK ENTERTAINMENT From Saturday's Daily— Last evening Miss Marie Kaufmann, Mrs. A. D. Caldwell and Miss Catherine McClusky gave an entertainment at Cedar Creek which was very pleasing to a large audience.

Parmele, who has been making her home with the Atwood family for several months. Mrs. Agnew also has returned to her home in Lincoln.—Louisville Courier.

BANK IS DOLLED UP In the point of both the general appearance of the building as well as the volume of business and the character of the institution, the Murray State bank, is taking a back seat for no other bank in this section of our great commonwealth.

The Murray State bank has just recently had installed a new set of fixtures that makes it one of the handsomest appearing banking houses in the state.

The new fixtures were made to order for the bank by one of the large supply houses of St. Joseph and they are certainly beauties in every sense of the word.

The wood portion of the fixtures is in the rich mahogany finish and a handsome ornamental grill tops the desks and adds to the beauty of the desks and up to date fittings. The base of the counters and the office partitions is of marble and makes a complete touch to the bank interior.

Cashier W. G. Boedeker and Assistant Cashier Ludwig Hallas are finding a great deal of pleasure in the handsome new work room that they now possess and the people of Murray can be well pleased over the snappy appearance of their banking house.

Mr. R. B. Hayes and Mrs. Ed Roman were at Omaha last evening attending a meeting of the missionary societies of the Methodist church.
