A large number of the farmers are now busy in the fields picking corn which is in some cases very poor, while in other cases there is a fairly good yield, and in most fields the crop is better than could have been reasonably looked for when the condition of the weather in the mid-summer is considered.

### Woman's Reading Club Met.

The Woman Reading club met with Mrs. August Johnson Thursday afternoon, October 21st with 19 members present to enjoy the excellent Child Welfare program. A discussion on the Right of Childhood was conducted by Mrs. Ganz the leader of the afternoon. To be physically, mentally and morally well born was given as the first right of the child and the necessity of happiness for proper development was emphasized.

The child of necessity demands much of the time of the parent but so much attention should not be devoted to the child that he becomes selfish in his demands. The training a child should be entitled to should be of such a nature it will administer to his physical, mental and moral needs.

There is no specialist for the moral training and it is this phase of child development that is most often neglected.

Mrs. Frank Edwards read a very interesting paper "The Responsibility of the School." She said in part: "The responsibility of the public schools is to teach the child how to live and not how to make a living. Too many social subjects do not make the best citizens. It is necessary to master the fundamentals first and then learn the crafts next." The fundamentals given were: the English language, how to read, write and speak; Civil government and its responsibility; Ground work in geography, mathematics and natural sciences; Structure and care of the human body, and the development of the people's ideals and modern languages.

"Much depends upon the character and individuality of the teacher, whose first aim should be the building of character."

"The moral Training of the Child," was the subject of the paper read by Mrs. Ganz. The blame of the lack of moral training she laid at the door of the home where she suggested the child had failed to learn the virtue of obedience. "The child should know soldier like obedience but it is well to remember that children learn from example and it might be wise for the parent to sweep his own house first. There is need of a stabilizing force and the Ten Commandments provide the best possible source. If summing up then the parent must practice and teach the Ten Commandments to children."

For Sale. White Orpington cockerels \$2.00 each if taken at once, Mrs. August Johnson, Alvo, Neb. Its

In addition to the hog cholera situation the problem of substitute feeds for corn feeder pigs and long lot sanitation will be threshed out. Altho the speakers' list has not been prepared, Professor Loeffel said that an effort is being made to obtain nationally known hog men to speak.
