60-Mile Gale Sweeps Away Mining Town

Dwellers Awake to Find Homes Being Lifted From Over Beds; Swept Down Canyon.

Tonopah, Nev., March 15.—A 60-mile gale, accompanied by hail and snow, tore down Weopah's "tent city" Monday. Everything movable went down the canyon in a wild swirl of tin pans, tin camp stoves, gasoline cans and canvas housing.

The time-honored custom of going to bed fully clad prevented additional hardship, for the prospectors were in condition to grapple with the storm as soon as they awoke. They made a mad scramble to save as much as possible from their belongings.

Many found refuge in the camp of J. A. Houlihan, where there are four houses of substantial construction, and a cyclone cellar extending eight feet under ground with a well-rounded roof of cemented rocks.

HORSES STILL DYING OF CORN STALK DISEASE

Phillips, March 13.—Farmers in south and west part of Hamilton county are again losing horses from corn stalks. A lull in horses reported dying from this disease was broken the past week, when a number were again stricken. Some farmers have lost as high as five and six head, or their entire lot of farm horses.

A number of cars of grain, both corn and oats, have been shipped in to Phillips and are being sold out through the Farmers elevators of this place to farmers for feeding purposes. It is being purchased by farmers in 50, 100 and 200-bushel lots.

CHICK HATCHING CENTER IN CLAY COUNTY

Daykin, March 15.—A canvass of this vicinity proves that it is becoming a wonderful chicken raising community and that the fowls are paying a good share of the living and profits of the farmers today. There are hatcheries and incubator manufacturers at Clay Center, Fairbury and Alexandria, all near here, which turn out thousands of chicks each season. They report a volume of business this season 10 times that of last year. Eggs are brought in by customers, about 10,000 chicks being taken off each week.

FARMERS LOSING HORSES

North Loup, March 13.—Farmers in the Davis creek territory are reported to be suffering deplorable losses of valuable farm animals from the so-called "corn stalk disease." Edgar Davis has lost four horses recently and a neighbor farmer, Earl Bingham, has lost five. Many others have lost one or more animals and the epidemic seems to be growing more serious as the season advances.

Male Member Has Show of Bravery

Declares She Is Not Always in Chair on Third Reading and Argues Against Lifting of Bill.

Representative Gillespie of Sarpy, only woman member of the legislature, discovered in the house Monday that one member of the stern sex stood ready not only to oppose her motion to lift bill but to proclaim that she had not always been in her chair at third reading, a violation of one of the rules. The woman made a strenuous attempt to resurrect H. R. 469 and while Wildman of York, the stern man who argued against it was on the floor, she stopped him so often that he finally appealed to the speaker.

"I am surprised that after giving this measure two hours study you know enough about it to take the floor against it. I have studied it two years."

Again when Judge Wildman declared that it is a measure to correct a fault of Sarpy county, the member from that county said: "Sarpy has no faults."

Mr. Wildman said that passage of the bill would mean approximately \$2,800 increase in one district. Chairman Davis of the committee on education which put the bill to death, opposed resurrection. Representative Landgren, also of the education committee, said that the bill was killed by divided vote and that had a full membership been present it may have been reported out. The motion to life was defeated, the result of the standing vote being 35 to 39. The mover of the motion demanded a roll call and resurrection lost 34 to 46.

The house refused to make a speech.

Radio Control Board Meets

Says Plans to Unscramble "Chaos of Air" Will Silence Some Stations.

Washington, March 15.—Members of the new federal radio commission met informally Monday to consider the gigantic job of unscrambling the radio broadcasting jumble. The session preceded the first formal session Tuesday.

Several major tasks must be accomplished before the listener gets any benefit of regulation: Division of the country into radio zones within which broadcasting stations will have wave length separation of at least 10 kilocycles.

Shift of American stations from wave lengths allotted to Canadian, Mexican and Cuban broadcasters. Determination of what stations must reduce their power and solution of the question of time division to eliminate simultaneous operation on similar wave lengths of nearby or powerful stations.

Scientific research shows that 300 stations properly divided geographically and by kilocycle frequency may operate in the United States without serious interference.

The new commission faces a situation where nearly 700 stations are on the air nightly.
