During this interval these excellent American citizens have worked with a will, to make the state one of the best in the Union and they have with the other hardy pioneers succeeded in doing so. Their many friends in Greenwood and the surrounding community, called today and this evening extending congratulations, the friendly handshake and good wishes for the days which are to come, wishing that they may be the happiest of their lives, which have been most joyful in the realization that they have did all possible to make the land in which they have labored the better, and the people with whom they have lived most happy.

There was a larger crowd in attendance than at any time in recent years and all enjoying the day and doing all possible to boost the church and Bible school. There were addresses, special songs, solos, discourses and readings which were surely enjoyed by the very large and greatly interested audience present. They were considering this one of the very best days which the church has had, and a great advertisement for the church and its auxiliaries.

Looks Good for Greenwood.

One of the citizens of Greenwood told the reporter that one year ago there were eleven vacant houses in the city, and that today, there is not a vacant place, and in many instances there are two families living in one house, and still there has been many residences erected during the interval. This looks good for the town, and all the business men are doing nicely. Make Greenwood even a better town. It is up to you.

He is still at the hospital in Lincoln and is getting along as well as could be expected from the nature of the injury, and the very seriousness of the injury and affliction. His many friends are hoping that the band will now soon be in its normal condition again.

Found Cold Weather.

A letter from Grant Peters who with Glen, Earl and Edward Stradley and who are in the upper parts of Wyoming, writes that one day last week they had a blizzard that which covered the country with four inches of snow, and the wheat sheafs which they were thrashing were covered with four inches of snow. This is in very great contrast with the thrashing season, which is generally done in the heated weather and one is looking for some place to get cool rather than some place to get warm.
