The car which has been used as a residence for the people who have been working for the company, was given to Mr. Berger if he would move it away.

Had Two Wolf Hunts. One was last Saturday afternoon, which resulted in the bagging of one of the pesky critters, and the other was on Sunday, when they did not get any. Still they saw one, but to see and not be able to bag the game is very poor satisfaction, still all enjoyed the chase just the same.

have changed their designs and made some wonderful improvements and are making most of their mixers now entirely of steel.

They are making shipments all over the country, having shipped consignments to Budapest, Austria, just recently, and were just sending out invoices to Texas, Missouri and Colorado. They are just now putting out two new designs, one for a short farm and which is mounted and all steel for \$32.00 and one for the contractor for \$45.00. These are all steel, and of the latest models and which enable the user to attach to their car for transporting it from place to place. They were shipping their saw rigs to Missouri and Virginia, also that day. Besides this they are representing the Kelvinator, the modern refrigerators in Cass, Otoe counties, Nebraska, Fremont county, Iowa, and are installing many of these machines. Better drop in and see this plant when in Nehawka, you will be pleased at this institution, whose business extends to most all foreign countries.

New Tables Being Built for Legion Bldg. Substantial Folding Type to Provide Banquet Accommodations for Approximately 120.

From Monday's Daily—Like the frog who thru perseverance finally jumped out of the well, the American Legion is gradually acquiring the things it needs to outfit the present unit of the new community building so that it may be of use to the greatest number of people.

Although the rental rates cover only the overhead cost of operation when used for banquets, suppers, etc., the Legion has provided a fine stove and is now having built ten substantial knock-down type banquet tables. By getting these built now, before spring work opens up in the carpenter line, a right smart saving has been effected.

Their construction is in the hands of G. O. Schwenneker, who made the price unusually low, feeling that he could in this way contribute something to the building fund.

The tables are being built with a view to providing the least possible inconvenience to those seated about them for banquets, etc., and all cross-bracing, etc., is dispensed with. A sample table was built today to determine if any more strengthening is needed to insure their rigidity, and construction of the remaining nine will proceed at once.

The Legion has yet two ideals in view, namely the securing of adequate kitchen equipment and the providing of a knock-down stage and adjoining dressing rooms that will permit of putting on home talent shows at frequent intervals, and is working out a plan now to raise the other for these two objectives, the proceeds from dances and rentals being needed to pay interest on borrowed capital and reduce the amount of the loan as rapidly as possible.

Further announcement of the particular money-raising plans decided upon will be given in the near future. Suffice to say, it will not be the asking of donations, as the Legion feels the fine support given its chair drive last fall was sufficient testimonial of a more than friendly interest and will try to raise the other needed funds thru giving the public its money's worth.
