Oil Well Doing Nicely. The well which is being sunk for oil in the Pollard orchard has been doing nicely during the period since the work began the last time, but they have been working at a disadvantage on account of the caving of the banks of the hole which was started during the first drilling. The drillers are down several hundred feet at this time and have struck rock, and a few days since had gotten one of the drill bits stuck and have since been trying to recover it.

## Norris Praises Smith's Omaha Farm Speech

Says McNary-Haugen Men Can't Consistently Oppose the Governor Now.

Washington, Sept. 24.—Keeping clear of the presidential campaign Senator Norris (rep., Neb.) announced today that he is planning to leave Washington at the end of this week to make a number of speeches on behalf of the re-election of several members of the progressive group in the senate.

In the speeches, Senator Norris said he will not advocate the election of either Herbert Hoover or Governor Alfred E. Smith for the presidency. The Nebraskan, who is regarded as the leader of the senate progressive group, however, in a statement today characterized the democratic presidential nominee's speech on farm relief at Omaha as "fine" and his Denver water power speech as "great."

"Men who believe in the theory of the McNary-Haugen bill should be satisfied with the Omaha speech of the governor," the senator declared. "Governor Smith proposes to take care of the surplus and charge the cost to the producer. That is the real object of the McNary-Haugen bill. Should Extend Views.

"Governor Smith's water power speech is the most progressive ever made on that subject by any presidential candidate. It comes nearer to Roosevelt's idea than the views of any man a candidate for the presidency. The only possible criticism is that he says nothing of giving municipalities and farm organization preference over private corporations in the distribution of the water power. He should cover this feature to make his program complete.

The Nebraskan said that after the Omaha speech those who believed in the McNary-Haugen bill as a proper method of dealing with the surplus question could not consistently oppose Smith. He also said that in his opinion Governor Smith's declarations at Denver showed that there was no comparison between his position on the power question and that of Herbert Hoover.

Norris' addresses for his progressive senate associates will be in support of Senators Wheeler (Montana) and Dill (Washington), both democrats; for his republican colleagues Howell (Nebraska), Frazier (North Dakota), also a republican, and Shipstead (farmer-labor, Minnesota). He already has spoken in Wisconsin in support of Senator La Follette and said that he would go to California to aid Senator Johnson (republican), if it were thought necessary.—World-Herald.

## BLAINE REFUSAL AN AID

Governor Smith's Train, En Route to Helena, Mont., Sept. 24.—White Governor Smith declined to comment today on published reports that Senator Blaine, republican progressive of Wisconsin, would not support or vote for Herbert Hoover, Senator Wheeler of Montana, who boarded the democratic special at Billings expressed the belief that the junior Wisconsin senator's announcement would clinch victory in that state for the democratic national ticket in 1924. Wheeler ran for vice president on the independent ticket headed by the late Senator LaFollette of Wisconsin.

"I would think," said the Montana senator, who is up for re-election as a democrat, "that the announcement would assure Wisconsin for Governor Smith."

He added that "it will be very helpful in Minnesota and North Dakota, and in all probability in South Dakota." Wheeler made his statement in a press conference on board Governor Smith's train, which also was attended by Senator Walsh, democrat, Montana, and prosecutor of the senate oil inquiries. The democratic nominee took only a minute at the interview.

Wheeler said that the LaFollette progressive vote of 1924 was lined up almost to a unit for Governor Smith in North Dakota, Wisconsin Minnesota and Montana.

## BURLESON IS FOR SMITH

New York, Sept. 24.—Albert S. Burleson, postmaster general in the Wilson administration, enrolling today in the College League for Smith declared that "prohibition fanatic and religious bigots" are making the two outstanding issues in the campaign.

There would be no doubt about the result of the election, he wrote from his home in Texas, were it not for two elements in the electorate—"one, a fanatical element who contend that the Volstead act just as it is written is more essential than the restoration of our government to honest control, and the other, a bigoted, intolerant element which has not the courage to declare its real belief that our constitutions are wrong when they declare there shall be no religious test for office."

## RUBY CAPTIVATES MOVIE DIRECTOR

Los Angeles, Sept. 23.—Ruby Kendrick's dreams of a prince charming, vine-covered church, flowers and a wedding march came true today.

Ruby and her rich daddy lived in Birmingham, Ala. Deciding she would carve out a career on the screen, she came to Hollywood. One day she got a call to the Educational studio. It was there N. C. Sweet, assistant director, saw her. The ceremony was at the Glendale Church of the Flowers.

## St. Louis Grain Cargoes Exceed Previous Years

Barges Loaded With Shipments From North Crow Road to Gulf of Mexico

St. Louis, Mo.—For the first time in history, fleets of barges loaded with grain from the north and northwest are lined up at the Mississippi wharves here in company with other fleets ready to take their cargoes to the Gulf of Mexico and thence, by sea on other vessels, in the ends of the earth.

Maj. John C. Gotwals, in charge of federal river development in the St. Louis district, is authority for the statements that 2,000,000 tons of freight will be moved on the river before the present season ends, the largest in history and 40 per cent more than last year. Moreover, there is said to be freight in sight far in excess of this amount, needing only added equipment to make it a part of a new total when it is ready. The entire Midwest is now saving

freights on sugar and other southern commodities that formerly came up the valley by rail. Singularly, the railroads in developing business that requires greater speed than the vessels can make the showing increased loadings in the river territory.

For some time coal has been brought to St. Louis by barge from Pennsylvania and West Virginia, via the Ohio and the Mississippi. Next spring a new line of vessels will bring steel products down the Ohio and into the upper Mississippi territory.

Major Gotwals says this fleet is now in readiness at Pittsburgh, and as soon as his engineers have accomplished some necessary changes in the channel at the confluence of the Ohio and Mississippi, it will come through with tows of 16,000 tons.
