Results have counted, and so smoothly has the City forged ahead that scarcely a murmum is heard these days from those who once harranged at every street corner. It's strongest opponents are now its chief supporters."

Many volumes could be written on the City Manager Plan, how it operates and the benefits to be expected, but time would not permit hem to be recited at a luncheon. The discussion I have given you is the experience of many managers and comments from the press.

The City Manager Form of government which is now effective in 390 American cities, in which nearly ,000,000 people now live, which has n almost every jurisdiction where t has been applied, reduced costs, or perimtted a greatly increased program without increased cost; which has established high standards among cities for the care of the poor, the development of schools, libraries, parks and playgrounds, and other educational and social advantages; which has brought municipal government; which has established longtime, far-sighted programs in its respective cities; and which has advanced many other municipal government functions and services for the greatest benefit to the people of the cities served-is a system that merits serious consideration as to its application and the benefits to be derived from such application to the City of Plattsmouth.

The City Manager Plan is a good thing to keep thinking and talking about, for it furnishes a practical alternative to your present system, and if it works well elsewhere, es-pecially in cities the size of Plattsouth, it ought to work well here. I thank you.
