### Nebraska Physician Gives Advice About Cancer

University Professor is a Speaker Before American Medical Association.

Portland, Ore.—Altho most Americans have advanced beyond the fried potatoes and pie breakfast, there still is a tendency toward a diet conducive to degenerative diseases, Dr. Lovell Langstroth, San Francisco, told members of the American Medical association here Wednesday.

Dr. Langstroth said that a study of 501 sick persons revealed that 88 per cent of them ate chiefly bread, meat, potatoes, sweet desserts and other foods poor in vitamins. Many of them improved on a diet of fresh milk, fruits and vegetables, he said.

Dr. E. T. Quigley, instructor in the University of Nebraska medical school, who has done extensive research work in cancer, said that so many "sure cures" for cancer have

been announced or are about to be announced that sufferers are under the impression that "the day of salvation is just around the corner."

"This state of mind," Dr. Quigley said, "is what makes it so easy for the quack to market, at a huge profit, his utterly worthless nostrums."

"When the medical profession ceased seeking a cure and turned to the cause of cancer, the death rate slowed up. Primarily there seems to be four causes: Constant irritation of tissue, chemical irritation and heat and infection," he said.

Dr. Quigley advised watching the diet and consuming sufficient vitamins to ward off a possible attack. Such things as white bread and sugar, the doctor said, give the cancer an opportunity to gain a foothold in the body, where vitamins tend to obliterate it.—State Journal.

**EXTRAS IN TALKIES PLANNING WALKOUT**

Los Angeles, July 10.—The Times Wednesday said talking motion picture extras who are members of Actors' Equity association have planned a preliminary strike.

Phone your news to No. 6.

## LOCAL NEWS

## Report Made by Agriculture Department

**Rye Only Major Grain Estimated to Show an Increase Over Last Year's Yield.**

Washington—Decreased yields this season in grain crops below last year's harvest were forecast Wednesday by the department of agriculture on the basis of information on July conditions.

Of the major grains, only rye was estimated to show an increased production, altho reports from producers, included in the survey, showed that up to July 1 the weather was 2.7 per cent more favorable for crops than last year.

Estimates for leading crops, compared with the 1928 harvest, follow: Corn, 2,662,000,000 bushels, compared with 2,836,000,000 harvested last year; wheat, 834,000,000 and 902,000,000; oats, 1,247,000,000 and 1,449,000,000; barley, 317,000,000 and 357,000,000. The rye forecast was for 41,900,000 bushels compared with 41,700,000 a year ago.

**Average Runs Lower.**

In the country as a whole the condition of the crops averages 3.7 per cent below the 1918-1927 average, the department commented.

"On the first of July crops were in a particularly critical condition in the northern great plains region where drouth and high temperatures prevailed and prospects were declining daily."

"The estimates for this area allow only for damage in evidence on the first of the month. Allowing some late crops still to be planted and for usual loss of acreage from drouth, flood and other causes, the total crop acreage harvested this season seems likely to be about the same as that harvested last season."

The separate wheat crop estimates were: winter wheat, 582,000,000, compared with 578,000,000 harvested last year; durum wheat, 58,000,000 compared with 93,000,000 and other spring wheat 193,000,000 and 231,000,000.

Decreased acreages were indicated in corn, oats, rye, rice, and potatoes, and increased acreages were planted to wheat, barley, flaxseed, cotton, hay, sweet potatoes, tobacco, beans, peanuts and sugar beets.

**Some Crops Heavy.**

Of the crops reported on increased yields over 1928 were estimated in flaxseed, tame hay, beans, tobacco and sugar beets. Decreases were shown in hops, broomcorn, sweet potatoes, pears, apples, peaches and rice. Particularly poor yields were

**CREDITS HOOVER FOR PACT**

Lima, Peru.—Alexander P. Moore, American ambassador, sailed for New York Wednesday on the steamship Santa Maria. He made his farewell call upon President Leguia Wednesday morning and as Mr. Moore was leaving the president said to him: "You can tell President Hoover that the reconciliation of Peru and Chile thru the Tacna-Arica agreement was largely due to his outstanding statesmanship."

President Leguia's farewell gift to Mr. Moore was a fine Panama hat which had been especially woven for him. Among the testimonials awaiting him at the steamer was a huge American coat of arms fashioned out of flowers.

**STATE WINS SUIT FOR SALT LANDS**

Lincoln, July 10.—Drying in surface salt springs did not make valid the sale of the Capitol Beach Amusement park site 25 years ago District Judge Broady ruled Wednesday in denying a writ to force state officials to give title to the land to the Central Realty and Investment Co.

The court ruled the 160-acre tract part of the park is still property of the state, since it is a part of a tract set aside as Salt Springs by the constitution of the state and as such are not subject to sale or alienation.

**MALADY PUZZLES DOCTORS**

Safford, Ariz.—Deaths of two more persons, making a total of six, from a mysterious malady were reported Wednesday night from a small lumber camp in the Graham mountains, thirty-five miles from Safford. The latest victims were William Evans, forty-five, and an eleven year old boy named Powell. Even four year old daughter died earlier in the day while three boys succumbed Tuesday.

**PTOMAINES POISONING**

John Green, sixteen, Grover Siebold, sixteen, and Ralph Kerby, eleven, were the first victims of the unsolved illness, then a cure of which has baffled every physician available here and in the Graham mountain section.

"Ptomaine poisoning from drinking 'home brew' was at first thought to have been the melody which struck death into the camp. This was discounted with the death of the Evans child, who was declared not to have partaken of the beverage."

**ESTIMATED IN FRUIT CROPS**

pears being estimated at 19,800,000 bushels, compared with 24,000,000 bushels last year; peaches 47,100,000 bushels compared with 68,400,000, and apples 154,000,000 bushels compared with 186,000,000 bushels last year.

"Farm wages for the country were about 2 per cent higher on July 1 than a year ago," the department reported. "Wage increases are general except in the South Atlantic states where some decrease is shown. The supply of farm labor is reported as 101.7 per cent of demand, as compared with 105.5 per cent a year ago."—State Journal.
