Probe Links Farm Lobbyist with Power

Reveals Deal of Chester Gray and Shoals Bidders; Bureau Federation is Involved.

Washington, Feb. 20.—The American Farm Bureau federation was used as a propaganda smoke screen by the American Cyanamid Co. in its efforts to get Muscle Shoals, it was revealed by the senate lobby committee Thursday.

As a part of the plan, R. F. Bower was to do "field work" in the south opposing government operation of Muscle Shoals, ostensibly for the Alabama Farm Bureau federation. Actually he was to be paid by the Cyanamid Co. This scheme had the approval of the fed.

One of its subsidiaries, it was testified, and the Union Carbide Co., Chester H. Gray Washington lobbyist for the farm bureau, who was on the witness stand Thursday. Gray said under the circumstances he approved it. He added that the plan was never carried out.

Still Seek Lease. The Cyanamid Co., however, did pay \$7,048 for Muscle Shoals propaganda which was sent broadcast under the name of the farm bureau. The company is now trying to lease Muscle Shoals.

Under questioning by Senator Black (D.), Alabama, Gray admitted that a few weeks ago he advised W. B. Bell, president of the Cyanamid Co., to remain away from Washington to avoid being called by the lobby committee.

Instead, he urged him to tell about his contributions to the farm bureau propaganda before the house military affairs committee. Bell subsequently appeared before the committee.

Black also got Gray to admit he himself was on the payroll of the Tennessee River Improvement association in 1923 and 1924 at a salary of 10 per day. Gray said he was not with the farm bureau federation at that time.

Works With Industry. The improvement association also favors the Cyanamid Co.'s bid for Muscle Shoals.

Turning aside from Muscle Shoals, Senator Walsh (D.), Montana, showed that Gray has been working hand in hand with industrial groups on federal legislation.

On the tariff, Gray co-operated with the National Association of Manufacturers. The purpose of one of their meetings he attended was to

Put Your Oats Crop on a Paying Foundation by Seed Treatment with CERESAN

Now is the time to choose between a good stand and big acre yields of oats this season, or poor germination and a short, smutty crop. By seed treatment with Du Bay Ceresan you can control both loose and covered smuts before you plant.

Controls Smuts—Increases Yields. By preventing crop damage from oats smuts, Ceresan increases yields per acre. The Illinois Agricultural Experiment Station said in a bulletin that Ceresan gave perfect smut control, increasing the yield on smutty 60-Day Oats by 13.3 bushels per acre, and on smutty Big 4 Oats by 19.1 bushels per acre over the yields from untreated seed. These increases were about double the increases obtained by formaldehyde treatment.

Wisconsin Circular 133 states that Ceresan has given very good control of oats smuts. The Plant Disease Reporter for August, 1929, reported that dust treatment with Ceresan gave "good control" of oats smuts in Iowa, and in Kansas, Ceresan dust treatments gave "excellent control" of oats smuts.

Used on seed barley, Ceresan gave perfect control of both covered smut and stripe disease and produced a yield increase of over five bushels per acre. Ceresan is also effective in controlling many seed-borne diseases of spring wheat; rye; sorghums, such as kafir-corn and milo-maize; millet and cotton.

Dust seed treatment with Ceresan is quick, easy, inexpensive and harmless to seeds. Only three ounces required per bushel of seed oats, barley or cotton; two ounces per bushel of seed wheat, rye, sorghums or millet. Treat seed now or before sowing. In all sizes from one to 300 pounds. Five pounds, \$3.00; twenty-five pounds, \$12.50.

Use Semesan Jr. for seed corn; Semesan Bel for seed potatoes; Semesan for vegetable and flower seeds and bulbs.
