A SPLENDID RECORD

There has been a family in this city that has made a real record in the educational work of the Plattsmouth city schools, this being the who with the graduating of Miss have graduated from the local school. Mr. Olson has been engaged here in carpenter work and it is a real tribute to he and his wife that they have been able to send all of their children through the schools and see them attain high rank in their classes, as all seven of the members of the family have been among the leading students of the Plattsmouth high school. This is also a testimonial to the worth of the public school that offers to every child the opportunity for education, and to the parent that has striven to see that the educational opportunities could be enjoyed by the child.
