Big Team Hitch Demonstration. The Horse Association of America was the miniature multiple hitch layout which will be at the farm ureau office the entire week of May 12 to 17. This is made up of eight mall horses, one-eighth actual size which are modeled after the grand champion gelding at the International Livestock Show in 1928. A miniature two-bottom, three-bottom play, and a tandem dics accompany

Leather harnesses on the horses are complete in every way with interchangable buck ropes, lines and lead chains. The layout has a commovable and may be hitched up to the plows or disc in any multiple

hitch combination. Every detail is more effectively and clearly shown than in an actual field demonstration. Any of the different combinations can be hitched in but a few minutes as if the real live horses and life sized implements

during this week.

Seed Corn Treatments.

For the past several years, much publicity has been given to the matter of seed corn treatments. Various in his self reliance. commercial compounds have been for general farm use as seed corn disdemonstrated in some of the more humid areas of the corn belt. Very little is known of the distribution of these diseases and the extent to which they effect the germination and productiveness of seed corn in the drier or semiarid sections.

and cheerful help with his difficulties will develop him faster than scolding his awkardness and carelessness.—D. D. Wainscott, Co. Ext. Agent, Jessie H. Baldwin, Asst. Co. Ext. Agent.

Tests to determine the effects of seed corn treatment have been under

Station at Lincoln for several years. The results of these tests for the years 1924, 1925 and 1926 were published as Nebraska Experiment Station Bulletin No. 218. That no benefits have resulted from the treatment to be Candidate of farm selected seed is shown by the summary of this bulletin.

"The organic mercury compounds. including Uspulum, Semesan, and Bayer Dust applied to ordinary seed corn, had no significant effect upon the germination field stand, rate of seedling growth, crop vigor, per cent To the voters of the 2nd Senatorial of smut, barrenness, lodging, yield District, comprising the counties of per acre, or quality of product. The securing of equal field stands is di-The time has arrived when candi- rect evidence that the damage from

These conclusions have been suba statement from me at this time is stantiated by further results obtained due to the people of this Senatorial in 1927 and 1928 which have been published by the Journal of Agricul-

tural Research, Vol. 40, No. 2, 1930. To test the application of these results to conditions further west in nouncement with a certain sense the state, a series of tests were conducted at the North Platte Substation in 1929.

The responsibilities are anything Tri-county shows. All of these have that the legislature has to settle. The special premium classifications for

This is an exceptional opportunity Any boy or girl in any community Again I wish to thank the people wishing to join a poultry club should

to Attend Club Week. Special meetings are being planned for local leaders who attend club week and every local leader who can is urged to come. Three periods each morning will be given to local leaders conferences. Mr. R. A. Turner, National Club leader, in charge of the central states, Representative of the extension service of Washington, D. C., will have charge of one period each day.

Accommodations for leaders may be had at the college for the same price as club members. Cass County should have a good representation at club week.

Group Achievements Interesting. The Louisville, Weeping Water, Murray and Murdock extension clubs have held their group achievements with 385 women attending. These have been in the nature of an afternoon teafi with an informal, program of music, readings, and playlets followed by a social hour, which gave the women a chance to inspect the ex-

hibits and to get acquainted. Miss Orinne Johnson, clothing and house furnishing editor for the Farmers Wife magazine, St. Paul, attended the Murray group achievement. Miss Johnson remarked that it was one of the most unique achievements meetings she had ever attended. She also made special mention of the excellent exhibit. The Murray achievement was just typical one of the four.

All the different hitches will be Give Him a Chance to be Self Reliant demonstrated to every visitor that | When a little child is allowed to will stop at the farm bureau office feed himself, and encouraged to do such things as putting on his own shoes, buttoning his buttons, taking care of his toys, and washing his hands, he developes confidence in his own ability. Before long he hates to be called a baby and he takes pride

It is really surprising how soon in widely and extravagently advertised life a little shaver can do things for for general farm use as seed corn dis-infectants. The effectiveness of many off his mother's shoulders.
