State of Nebraska, Cass County, ss-

I, Geo. R. Sayles, County Clerk of Cass county, Nebraska, hereby certify that the foregoing is a true and correct Sample of the official Ballot to be used at the Primary Election to be held in Cass county, Nebraska, on Tuesday, August

Witness my hand and the Seal of my office at Plattsmouth, Nebraska, this 4th day of August, 1930. GEO. R. SAYLES.

County Clerk, Cass County.

FARM BUREAU NOTES Copy for this Department furnished by County Agent

4-H Judging Try-Outs.

All clubs interested in trying out for a judging team, in dairy, livestock, poultry, grain, baked goods, canning, clothing and girls room, should have their representative at the college of agriculture by 9:30 Monday, August 11th.

Classes will be provided by the college and those in charge will score the placings. Agents wil be responsible for judges to score reasons.

County-Wide Picnic.

The Farm Bureau and Farmers Union extend a county-wide invitation to their picnic which will be held at the Weeping Water park Tuesday, August 19th. Band music, speaking, ball games, and sports will make a full day's program. Bring a basket dinner, a lot of pep, and come with the intentions of having a good

Early Plowing Wheat Pays.

Early plowing followed by disking to keep down the weeds and pack the soil will do more to make the 1931 crop of wheat profitable than any other one thing that individual farmers can do at the present time. Results at the agricultural experiment, station of the university at Lincoln show that plowing July 15, and disking August 15 resulted in a yield of thirty-one and one-half bushels per acre as an average of a number of years. This was from one and onehalf to fifteen bushels more per acre than other methods of preparing the

Disking July 15 followed by plow-ing August 15 gave a yield of almost thirty bushels per acre. Listing July 15, splitting the ridges August 15 and disking September 15 gave exactly the same yield.

Farmers who are not certain whether or not they should put all their stubble land into wheat this fall might list some or al of it at the present time. If they decide not to seed any certain field, the ridges will catch th snow during the winter and can be split next spring when corn is planted. The object of fall plowing or listing is to get rid of weeds. No other special benefits have been noticed from fall plowing stubble land for spring crops the next year. Sometimes it is more practical to pasture down the weeds or mow them than to plow or list the stubble.

Any practice which would increase the yield per acre without too much cost of preparation should increase year. It would seem more advisable, with present prospects for the future, to yet a high yield from a few acres than a small pield from a larger acre-

Furnish Seed to Other States

Carload lots of Comfort Barley will be shipped to New York state, of Burt oats to Virginia, and of Nebr. 60 wheat to Wyo, thru the Nebr Growers Ass'n. All the seed ahs been certified by that Ass'n. The buyers in the other states have been attracted by the high quality and general value of Nebr. 1930 crop of small grain, according to P. H. Stewart, Sec'y of the Crop Growers Ass'n. This is the first time that certified seed has gone

to any other state in any quantity. It is estimated that 65 per cent of the winter wheat in Nebraska, is of the Nebraska 60 strain that 60 per cent of the oats are Nebr. 21, a selection of a white oat from the ordinary Kherson. The acreage of barley has jumped from 246,000 acres in 1927 to 718,000 in 1930, largely due to the introduction of smooth bearded barleys like Comfort and elvet, which has taken the "itch" out of the crop. These varieties have yielded 20 per cent more than the common six row variety. Barley is a good hog feed and a fairly safe crop for southern Nebraska where farmers may shift some of their acreage to other grains than kheat.

Summary of 5-Yr. Clothing Project In completing her work with the Nebraska agricultural extension service Miss Theresa Judge has summarized the figures from five years of reports to show what Nebraska farm women have done with clothing selection during that time.

She calls to the attention of Nebraska people such things as a display of 16,000 coats and dresses, over 10,000 aprons, 6,645 remodelled garments, and a five-year style parade of 4,170 women.

Miss Judge will be remembered by

many homemakers of this county as the lady who came here once each month for a year to give project leaders of women's clubs lessons about color, material, and selection or making of costumes for women and children. The project leaders have taken the lessons to their clubs each month following the meeting with Miss Judge. In this way it has been possible for her to give the instruction to from 1200 to 1991 clubs each month following the meeting with Miss Judge. In this way it has been possible for her to give the instruction to from 1200 to 1991 women a year each of the last five years.. Six thousand fifty-nine women have been abl to improve their ability to select colors in clothing or to make or remake garments.

Some of these six thousand women dyed and say they enjoyed it. Their total figures showed 4,961 garments dyed as a result of one month's lesson each of the last three years .- D. D. Wainscott, Co. Ext. Agent.

The Journal will appreciate your telephoning news items to No. 6.
