FIRE IN 1930

During June, the fire loss in the United States was \$31,818,266—\$1,787,397 less than in June, 1929. We have, however, nothing to be proud of, as this is the first month in 1930 in which such a decrease has been recorded. The total loss for the first six months of the year was \$242,329,771, corresponding to \$230,092,795 for the same period last year. In short, we have so far destroyed over 12 million dollars worth of property more than in 1929.

It cannot be too often repeated that the United States has the most gigantic fire loss, both total and per capita, in the world. Our carelessness in the matter of fire has become a national menace—and a national disgrace. Every year we sacrifice thousands of lives and half a billion dollars in property values. And, at the most conservative estimate, at least 80 per cent of this waste is entirely unnecessary.

Two factors are responsible for the waste—carelessness and ignorance. It is carelessness that allows us to drop cigarettes where we finish with them; let wiring go unattended; pile trash in corners, and the like. Ignorance has bred the attitude of "Let the insurance company pay for it"—as if insurance companies could pay losses without, in turn, collecting from policyholders. It should be thoroughly understood that every fire,

SHERIFF WHO FACED OUSTER WINS 2 TO 1

Stapleton, Neb., Aug. 14.—Fred J. Kirsch, sheriff of Logan county for the past seven years, polled a vote Tuesday that led his opponent, Priest, approximately two to one. He faced ouster proceedings last winter, as an outgrowth of the county seat fight. He was given a clean bill at that time by the governor's office.

Indian Bureau to Help Wards be Independent

New Education to Stress Subjects of Practical Value Declared in a Report to the President

Washington—Indians now wards of the United States are to receive every opportunity the Indian Bureau can give to become independent, self-sustaining citizens in full measure, through vocational training, aid in finding and keeping proper employment and development of agriculture and industry, Charles J. Rhoads, commissioner, declared in a report to President Hoover.

Placing emphasis upon changes in educational procedure, Mr. Rhoads said that subjects of practical value to the Indian are to feature the new policy.

"The program of Indian education and the courses of study offered in our Indian schools, Mr. Rhoads declared, "are being modified and expanded so as to place increasingly greater emphasis on education of a practical and vocational character, so that upon completion of the prescribed courses the Indian boy or girl may be fitted to take his or her place in the life of the nation, whether as an industrial worker, an agriculturist, a teacher, clerk or in some other of the innumerable ways in which American citizens earn their living."

"It is our plan to merge the Indian into the state school system as far as possible. There is a steady and constant increase in the number of Indian children attending public schools and a growing tendency on the part of the public schools to receive the Indian child on the same basis as the white child without any race distinction. In grades and general standing the Indian pupils compare favorably with the whites."

After graduation it is essential for the Indian to find proper work. Mr. Rhoads added, An amount of \$50,000 is included in the 1931 Appropriation Act for obtaining remunerative employment for Indians, and several placement and guidance officers have been appointed. Extension of this activity will be sought by the bureau, according to Mr. Rhoads.

Additional subsistence, clothing, personnel and equipment for Indian schools is provided for in an appropriation of \$1,100,000, made by the last Congress, he continued.

Agriculture, stock raising, and industrial phases of the Indian work are being developed, Mr. Rhoads said, as a further means of enabling the Indian to become economically self-sufficient. Attention is being given to relieving Indian lands from certain charges accumulated against them for irrigation and other projects, he added.

PLATTS BOY IN NAVY

Jack Uhlik of this city who enlisted in the navy some months ago, is now on board the U. S. S. New York, one of the crack ships of the navy and which is now a part of the Pacific fleet at the Bremerton (Wash.) navy yard.

Jack is rated as a painter on the war ship and his artistic talent has won him recognition already as he has designed the head and illustrations in the ship's paper, "The Knickerbocker." The many Plattsmouth friends will be pleased to hear of Jack and that he is having his marked ability in the illustrating line recognized by his shipmates as the "Knickerbocker" has a very pleasing note on his work in helping get the designs for the paper.

'Humanize' Urge Bishops in Call from Conference

Angelic Prelates Adopt Stand on Problems of Living; Recognize Help of Modern Science

Lambeth Palace, London, Aug. 14.—A call to "humanize religion," to defend the Christian standard of the family, of marriage and sacredness of sex and to meet squarely and frankly other problems of life, was sounded by the Lambeth conference of Anglican bishops, which has just concluded its deliberations here.

Sixty bishops of the Protestant Episcopal church of the United States were among the 306 who sat for five weeks under the chairmanship of the archbishop of Canterbury.

This afternoon the archbishop discussed the results of the conference, as embodied in an encyclical letter and 70 resolutions, containing in all some 70 thousand words, considered by the church authorities to be epochal in the history of the church of England and challenging to the religious thought of the world.

Other results of the conference are a recognition of the help to religion of modern science and a call of youths, in its "mental confusion and spiritual hunger."

Admit Women as Deaconesses. The conferences also brought to light a record of a stimulus to a growing movement toward Christian unity throughout the world and the admission of women to the ministry of the church as far as the order of deaconesses.

Another important development was the denunciation of war as incompatible with the teaching of Christ, together with a clear cut statement that "the existence of armaments on their present scale among nations endangers the main-

tenance of peace" and the conference joins in an appeal for a further effort to secure continued reduction of armaments by international agreement.

There emerged from the conference, as contained in the encyclical letter, the declaration that no one should be excluded from worship of any church on account of color or race and that the guiding principle of racial relation should be interdependence and not competition.

No mention is made in the encyclical of such controversial subjects as the Anglo-Catholic movement, the prayer book or disestablishment, or of separation of church and state.

Birth Control Stand. The vote on only one of 75 resolutions on which the bishops acted was made public. That concerned birth control and was carried by 193 votes to 67. The resolution stipulates that "where there is a clearly felt moral obligation to limit or avoid parenthood, the method must be decided on Christian principles."

The resolution strongly condemns "the use of any methods for birth control from motives of selfishness, luxury or mere convenience."

In all questions of marriage and sex the conference emphasizes the need of education. On the subject of divorce the bishops are equally outspoken. The resolution reads: "The conference, while passing no judgment on the practice of regional or national churches within our communion, recommends that marriage of one whose former partner is still living should not be celebrated according to the rites of the church."

NEW STREET SIGNS IN

From Friday's Daily—Jess Elliott, street commissioner, with his force have just completed the installing of the new additional street signs designating the various streets of the city that have heretofore been unmarked. The new signs were placed at the urgent request of the postoffice department so as to allow the extension of the free city mail delivery into the territory that has not heretofore been covered by the carriers.

Death of One of the Old Time Civil Engineers

H. C. Schmidt, Resident Here in the Early Days, Dies at Kansas City, Missouri

Last evening W. H. Hoover of Louisville arrived in this city en route home from Kansas City, Missouri, where he was in attendance at the funeral of his brother-in-law, H. C. Schmidt, a civil engineer and surveyor of the early days in this part of Nebraska and a long time resident of Plattsmouth.

Mr. Schmidt passed away at the ripe old age of eighty-three years, he having for the past few years suffered a gradual breakdown as the result of an accident in which he was injured by an auto and which at his advanced years caused a general breaking down of his health.

The deceased received his education in German technical schools taking up his work as a draftsman and surveyor and on coming to the United States he came to Nebraska in the early seventies and located at Plattsmouth. At this time the Burlington railroad was entering the state and he had the task of helping lay out the railroad through this portion of the west, going from Plattsmouth west to Lincoln to lay out what is known as the "short line" of the railroad.

Later in 1872 Mr. Schmidt entered the office of the surveyor general at Plattsmouth as a draftsman, serving there until 1875 when he again resumed his activities as surveyor and engineer. He also assisted in plating the townsite of Louisville, where his father-in-law, Captain J. T. A. Hoover was one of the early settlers.

In 1890 Mr. Schmidt was elected as county surveyor of Cass county and served in that capacity for a few years or until 1893 when he removed with his family to Kansas City, Missouri, following his profession there for many years and up until a short time before his death was engaged in work in the surveyors office at Kansas City.

Mr. Schmidt is survived by his widow, Mrs. Catherine Schmidt, one son, John H. Schmidt of Pocatello, Idaho, and three daughters, Miss Lillian Schmidt, Mrs. Nell C. Speck of Coffeyville, Kansas. The deceased was the engineer making the plats of Cass county which are now a part of the records of the office of the register of deeds of Cass county.

CARD OF THANKS

To the voters of Cass county I wish to extend my most heartfelt appreciation of the splendid support given me at the primary election for the democratic nomination for the office of sheriff. If elected to the office I shall do my utmost to serve the expression of confidence by giving an honest and efficient administration of the office of sheriff.

GEO. H. TRUNKENBOLZ

Natural gas franchises were approved by votes of more than two to one in four western Iowa towns at special elections Thursday. The towns approving franchises, all to the Iowa-Nebraska Light and Power company, were Woodbine, Carson, Oakland and Macdonia, all served now with electric power by the same company.

British Miners' Head Assails Tariff Plans

Lord Beaverbrook's Proposals Would Harm Exports According to Thomas Richards.

London—Opposition to Lord Beaverbrook's Empire Free Trade policy and faith in the traditional Free Trade system of Great Britain were voiced by Thomas Richards, president of the Miners' Federation of Great Britain, at the annual conference at Weston-Super-Mare on Aug. 11.

Mr. Richards approached the question from the viewpoint of the coal industry's need for overseas markets. Exports of coal to countries within the Empire, he declared, were normally less than 2 per cent of the total exports. Canada was the only one importing British coal in any quantity, but its imports from Great Britain were negligible compared with those of European countries, Canada is the chief customer of the surplus coal of the United States and Mr. Richards thought that Great Britain is unlikely to wrest away this trade in view of the geographical situation.

Lord Beaverbrook's proposals, he added, would have serious effects in those countries which are now Britain's chief customers and would increase the difficulties of export trade. Mr. Richards believed that mine workers in the exporting districts would find themselves without employment as well as having to pay exorbitant prices for foodstuffs.

Meanwhile Lord Beaverbrook, addressing an Independent Labor Party summer school at Welwyn on Empire free trade, admitted that higher tariffs are "to some extent" liable to lead to loss of markets, but argued that, despite the tariffs, British markets could be extended in Canada and Australia. Lord Beaverbrook also said that without duties on foreign foodstuffs his policy would fall flat.

"KIDS"

TWO STATE AGENTS FACING CHARGES

Prosecution of State Agents Eugene Battin and Frank Weyrnt on charges of assault with intent to kill and assault with intent to do great bodily harm will be demanded as the result of the shooting at Bertrand last Thursday of Fred Bieseker of Bertrand.

The announcement was made in Omaha Thursday by R. H. Duff of Bertrand, father-in-law of Bieseker. Bieseker is in Lord Lister hospital. Governor Weaver has ordered affidavits taken from all parties connected with the episode.

Don't advertise haphazardly. Lay out a definite plan and keep persistently at it. We will help you.

Farmall Price Reduced!

We have just received a big piece of power farming news—the McCormick-Deering FARMALL price has been cut \$50, and we are at once passing the information on to our customers. The Harvester Company's announcement says:

"We are glad to be able to make a reduction in the FARMALL tractor price at this time because right now the farmer is seriously in need of anything that will help him to cut down his costs of crop production.

"Due to manufacturing economies and anticipated reductions in material costs, we were able to reduce prices on the McCormick-Deering implement lines, effective for the present season.

"Recently, by the same process, we lowered the price on the 10-20 McCormick-Deering tractor \$40, and cut the 15-30 tractor price \$75.

"Now, to complete our program of reductions, we announce a \$50 cut in the price of the FARMALL.

"These price reductions, made during recent months, mean a saving to farmers of millions of dollars.

"As the original all-purpose tractor the McCormick-Deering FARMALL has won tremendous popularity. More than 100,000 FARMALLS have been built. Already this tractor has created a real revolution in farming. It is the best investment a farmer can make.

"The new price, \$825 f. o. b. Chicago, is the lowest ever placed on the FARMALL."

You have probably seen the FARMALL Tractor at work. If not, we will demonstrate it at any time, on any job. The FARMALL replaces 6 to 10 horses and 2 to 3 men. It plows 7 to 9 acres a day . . . double disks 18 to 25 acres . . . drills up to 45 acres . . . plants 24 to 46 acres . . . cultivates 33 to 50 acres and, in later cultivatings, 50 to 65 acres. It handles every farm power job, including row-crop operations. Put the best tractor power to work now—at the new FARMALL price!

If it isn't a McCORMICK-DEERING, it isn't a FARMALL
