FORD

SMOOTHNESS

## The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all - an unusually large number. Each bearing is adequate in size and carefully selected for the work it has to do.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost. The deciding factor is the performance of the car.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life to vital moving parts.

Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.

LOW PRICES OF FORD CARS \$430 to \$630

F.O.B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can buy a Ford for a small down payment on a convenient financing plan. Son your Ford dealer for details.
