Economy

The proper care of any machine is true economy. Say, how are your brakes; are they working? And the rods in your motor—Does the battery turn the motor over like it means business? True economy is keeping the machine in perfect condition. We are here to do it.

Could Be Deceit.

Many people think they are privileged characters and act as though they had a right to do anything they wish whether it interferes with others or not. They have no respect for any thing or any body. The church is not a place to level or to treat disrespectfully, but many do it just the same. Some one has been ringing the bells of the two Murray churches at night disturbing people, and causing many to think there was a call for fire or something like that. Now a decent respect for other people would cause all self respecting people to desist from this practice. No one can rely on a call for an emergency when some one with no respect for the law or for other people's rights continue to do this way.

Censorship is Now Sought for Moving Pictures

Two Hundred at Hearing by House Committee on Proposal—Say Films Degrading

Lincoln, Neb., March 31.—With a demand for creation of a state system of moving picture censorship, more than two hundred women and a number of men representing welfare and religious bodies appeared before the house committee on cities and towns today in support of a censorship bill now in the committee's hands.

With the group were a number of Lincoln clergymen, including Rev. Paul Calhoun of First Presbyterian church.

George W. Rosenlof, Lincoln, an assistant to the state superintendent of schools, condemned the practices of the moving picture industry as degrading and as negative to the character upbuilding of children as taught in the schools.

He cited the reported movie industry offer to Al Capone, Chicago gangster, as an example, he said, of the "temerity of the producers." He referred to a one million dollar offer to the Chicagoans to play in one movie which, however, has been denied by Capone.

They're doing it! Philip Thierolf

Speaking, he said, in the "cause of righteousness." Rosenlof declared there was a crying need for censorship in pictures and in their advertising.
"The problems of the motion picture today," he said, "are on a par with those concerning the liquor question."
The American made picture of today, Rosenlof further charged, is a cause of great concern in many foreign countries which have refused to exhibit them. "In Canada alone last year," he declared, "more than 150 pictures were rejected, and still we permit them to be shown here."
The bill at issue was introduced by Representative H. P. Hansen of North Platte. It provides for creation of a censorship board appointed by the governor.
Representative James W. Smallwood (rep.) of North Platte, is chairman of the committee in whose hands the bill rests.
No action was taken by the committee after the hearing.—World-Herald.
