Convict Bank Bandit in Hastings Robbery

Jury Returns Early Verdict on Thomas; No Appeal Planned; Sentence Saturday

Hastings, May 5.—After slightly more than a half hour of deliberation a district court jury here late Tuesday convicted James C. Thomas of Amarillo, Tex., on a charge of bank robbery in connection with the \$27,000 holdup of the Hastings National bank last Feb. 25. County authorities said Thomas probably would be sentenced next Saturday.

Thomas accepted the verdict with no show of emotion and the defense gave no notice of appeal. The trial began in the court of Judge J. W. James Monday. The state rested its case Tuesday morning and the defense did not call a single witness, nor did it call Thomas to the stand.

The state's attorney presented his argument in about 15 minutes and the defense had concluded half an hour later. In addition to the robbery charge, Thomas also had been named in complaints charging shooting with intent to kill and kidnaping.

William Meinger, caretaker of the bank, Monday identified Thomas as one of three men who participated in the robbery. Three city and county officers testified Thomas was one of three men who when found in a house here on the night after the robbery, shot their way to freedom, wounded one officer and kidnaped two patrolmen.

Thomas was wounded in the attack but recovered. The wounded officer recovered and the two patrolmen were released unharmed. Thomas was apprehended soon after the escape, accompanied by Mrs. Thelma Creighton. Mrs. Creighton is free on bond and officers still seek her husband, Jim Creighton as one of the fugitives.—Bee-News.

The words of Mrs. Willard to her daughter, is the same words every mother says to her child. "Go your work is mine. I thank God that he ever said to me, Bring up this child for me in the love of humanity and in expectation of immortal life.

BURLINGTON ROAD TAXES. Governor Bryan and members of the state board of taxation continued in session on Tuesday at the Burlington railroad's plea that it is taxed too high in Nebraska.

Attorney Bryon Clark introduced exhibits to show that the Burlington property in Nebraska has an assessed valuation of \$95,797,925, and that this should be reduced by equalization with other property which it is alleged is assessed at 75 percent of its market value. Last year the state board assessed the Burlington at \$119,000,151 after equalizing the amount on a basis of 75 percent.

The state board values railroad property on a basis of stocks and bonds. The Burlington contends that while it has no stock on the market the state board found the value of its stock to be \$225 a share. The company introduced testimony to show that a few shares on the curb market were sold last March at \$196.56 and some in April at an average of \$145.

The joint showing of roads on sales and mortgages assessed value of private property in the state, principally farm land, is only about 62 percent of its market value.

MOTHER'S DAY. Perhaps no movement in all history has so gripped the national consciousness and thrilled its way to public appreciation in so short a time as the general observance of Mother's Day. Since its inauguration some years ago, there has been no wild outburst of enthusiasm that quickly subsided, but a rapid and universal growth in popular favor. There is a reason. The day was set aside and dedicated to one, who, whether in a palace or cabin, has been the controlling force in shaping the destinies of nations—Mother.

Next Sunday is the day we honor her. The churches of this city are inviting you to assist them in making this a great day. They ask that you make a special effort to attend the services in honor of your mother. Each will have a carefully planned program that will be a blessing to you. The Methodist church will have a seat of honor for an older representative member of the church and also a young mother. We are endeavoring to make the church a bower of flowers for this occasion. If the pastor is notified this week all mother's who have no way of getting to the services will be called for next Sunday morning and brought to the church by autos specially provided for this service.

WHAT every ENGINEER KNOWS

The only road to full power from any engine, the only way to keep any machine in first-class condition, is by correct lubrication.

The new model motors give oil a harder job. Their cylinder clearances are smaller. Compression and engine heat are higher. Engine speed has been increased.

So new model oil was developed—new POLARINE. It defies the "cracking" and thinning effect of high heat—always flows freely in cold weather—does not gum valves or carbon the motor—provides a tough, wear-resisting film.

New Polarine enables motors to deliver full power and provides the utmost protection against wear—does everything that any oil can do for your motor. Consult the chart for the correct grade to use—25¢ a quart for every grade.
