Car Owners Bought More Firestone Tires During April, May and June than in any like period in History

There are reasons for this—Firestone is now building the Greatest Tire Values in history, with the result that Firestone factories are operating 24 hours a day, 6 days a week, to meet public preference.

This is the year everybody is scrutinizing his purchases. This is particularly true in tire buying because of the many confusing and misleading statements made about tires.

To give car owners the facts, Firestone published comparisons showing quality, construction and prices. Then the public came in—made their own comparisons with cross-sections cut from Firestone tires—and from special brand mail order tires and others.

When they saw the facts, they bought more Firestone tires during April, May and June than in any like period in Firestone history.

Drive in today and let us show you these Firestone Extra Values and have your car equipped for Safe, Trouble-Free Summer Motoring. We can save you money and serve you better.
