A PLACE OF BEAUTY

One of the most striking objects that the tourist or passing visitor through this city finds is the large electric substation of the Iowa-Nebraska Light & Power Co. Just at the south outskirts of the city. The plant in itself is one of the largest in the state and represents the investment of over \$100,000 and at night with the glowing lights makes a sight that can be seen for a distance of several miles to the south, east and west. The surroundings of the substation are kept in the most perfect of condition, a fine lawn well maintained surrounds the entire plant and the control building, while in the section where the power lines are located there is crushed rock placed for the beautifying of the place.

GIVEN FINE TREAT

From Wednesday's Daily—
Last evening following the regular business session of the Eastern Star, the ladies of the chapter were given a very pleasant treat by the male members of Home chapter, the men volunteering to provide and serve the refreshments during the heated months. That they did their task well all of the members vouch, the dainty refreshments of bananas and ice cream and wafers proving a real treat. The men of the chapter not only prepared and served the refreshments but also arranged the dining room most appropriately in the Star colors, a large Star being a part of the decorative plan.
