FIRESTONE tires appeal to the thrifty. They give Extra Values at the lowest prices ever known.

Firestone do not manufacture tires under special brand names for mail order houses and others to distribute. Special brand tires are made without the manufacturer's name. They are sold without his guarantee or responsibility for service.

You take no chances on Firestone tires. They are silent, safe, long-wearing—and each tire bears the Firestone name, which is a guarantee of satisfactory service.

Firestone's greater economies in buying, manufacturing, and distributing make possible these greater values and lower prices.

Stop at our store today. See sections cut from Firestone tires—special brand mail order tires and others. Take these sections in your own hands—compare Quality and Construction. Then you, too, will know why—"Firestone is the tire that taught thrift to millions!"

Extra Values GUM-DIPPED CORDS

The Firestone patented Gum-Dipping process transforms the cotton cords into a strong, tough, sinewy unit. Liquid rubber penetrates every cord and coats every fiber, guarding against internal friction and heat, greatly increasing the strength of the cord body, and giving longer tire life.

TWO EXTRA CORD PLYS UNDER THE TREAD

This is a patented construction, and the two extra cord plies are so placed that you get 56% stronger bond between tread and cord-body, and tests show 26% greater protection against punctures and blow-outs. It sets a new standard for tire performance on high speed cars.

NON-SKID TREAD

Tough, live rubber specially compounded for long, slow wear. Scientifically designed non-skid gives greater traction and safe, quiet performance.

LOSES CAP ON ELECTION

C. A. Rosencrans, prominent tonorial artist, professional golfer and election enthusiast, had the hard luck to lose a new cap on primary election night. In making the rounds of the various wards and precincts, assisting in the tabulating of votes for his favorite candidates, he halted his car near the overhead crossing of the MOP on the Louisville road, on the way to the Vallery school in Plattsmouth precinct.

A long freight, pulled by a monster locomotive, came lumbering up the grade, and Clate "stood on the bridge at midnight" to witness the spectacle.

It seemed that the engineer answered his greeting by an extra eruption of steam, smoke and cinders, for the bridge plank arose, and so did Clate. After the smoke had cleared away a search was made for his

cap that seemed to also have gone up in the smoke. It is not the value of the lost cap that hurts, it is the time it requires to find another large enough.

If this cap should return to earth and be found by any one living in the precinct, its return will be much appreciated by the owner.
