dents in Nation Exceeds Cost of Public School System.

Did you know that an automobile raveling at a speed of 60 miles per hour and colliding with any obstacle meets with the same result that it would if driven off the top of a 10-story building?

That the interval of time which elapses between the recognization of danger and the application of the brakes averages one-half of a second, and a car traveling 30 miles per hour moves 22 feet in that length of time; that 64.7 per cent of all accidents are by drivers under 30 years of age, and only 18 per cent by drivers over 50 years old.

That the annual economic less from automobile accidents totals two billion, five hundred thousand dolcost of the public schools of United States.

That 23.9 per cent of all accidents, almost one out of four, are not from cellission but are caused by driving parlors, all Saturday afternoon, off the roadway, principally on

ASKS MOONEY CASE REPORT

Washington. - John Macdonald, Baltimore, who testified at the trials of Thomas Mooney and Warren Billings in connection with San Francisco's 1916 preparedness day bombing and later recanted, visited the capitol Monday in their behalf. Macdonald on the stand identified Mooney and Billings as the bombers but later asserted his testimony was false and had been inspired by threats made by the presecuting attorney. Macdenald visited Senators Norris, Cutting and Costigan. He urged that they seek to have the senate soon adopt a resolution for printing as a public document the report on the case made by three experts of the Wickersham commission.
