

More Than Just 'Another Shop'

To you car owners we mean more than just 'another' auto repair shop. We have a personal interest in you and your car—a real desire to SAVE you money thru helpful suggestions and expert, honest workmanship.

MURRAY GARAGE A. D. BAKKE, Propr.

Murray

Mont Robb, of Union, was a business visitor in Murray on Monday of this week, making the trip on the train.

J. A. Scotten has been building a chicken house for Mrs. Betty Barrows, who now has a place for her chickens.

L. D. Cresser was in Omaha Tuesday of this week, going up to look after some business in connection with the operation of the garage here.

Searl S. Davis, of Plattsmouth, was a visitor in Murray last Tuesday afternoon and was looking after some affairs at the farm west of town.

George and Oscar Domingo of Weeping Water, were in Murray on Tuesday afternoon of this week and were looking after some business matters while here.

J. A. Scotten has been incapacitated for some time on account of a severe boil which had claimed pre-emptory rights on one of the knees of this esteemed gentleman.

Mr. and Mrs. George E. Nickles, who are making their home in Lin-

coln during the session of the legislature, were home over the week-end and enjoyed the visit very much. Murray still looks good to them.

John Frans, who has been chopping wood at the Roy Gerking home for several days, has it ready for the buzz saw and will then haul it home for the fire and be able to enjoy the genial warmth which the stove sends out.

On Tuesday afternoon of this week, Paul Richter was shelling corn for O. T. Leyda and son, Lloyd, the grain being hauled to the Ray Fredricks elevator, formerly the Farmers elevator, by Frank Mrasek and his fleet of trucks.

Ray Fredricks of the Fredricks Seed company, of Greenwood, was in Murray on Tuesday of this week looking after business at the elevator which is being managed by Arthur Weideman, who has been with Mr. Fredricks at his seed house in Greenwood, and who is an experienced elevator man.

The Henry Field Seed company, of Shenandoah, had a fourth truck load of buckwheat at the Murray Cereal Mills for grinding the past week, coming for the finished product on Tuesday. There was over 1,500 pounds of the flour, for which the seed company is finding much demand. The mill is now being operated by Harry McCulloch.

Sustains Fractured Collar Bone While John Noddleman, Jr., son of Mr. and Mrs. John Noddleman, was playing leap frog at school Tuesday afternoon, he fell and received a severely fractured collar bone. He was taken to the office of Dr. R. W. Tyson, who reduced the fracture, and the

young man, although suffering greatly from the injury, is getting along as well as could be looked for.

Uncle Dies in South A message telling of the passing of Mike Swartzfisher, of Minco, Okla., an uncle of Fred L. Hills, called him and his wife to the south. They left Sunday morning to attend the funeral. An account of the life of this gentleman, who formerly resided here, will be given in a later issue of the Journal.

Ladies Aid to Meet The Ladies Aid society of the Christian church of Murray is to hold a meeting at the church on Wednesday of the coming week, when they will also enjoy a program. The discussion will be led by Mrs. O. T. Leyda. The hostesses will be Mesdames Margaret Brendel, Bessie Seybolt and Fred L. Hild. All members are urged to be in attendance.

Purchases Farm in Missouri Homer C. Campbell, who has made his home on the farm of Searl Davis for a number of years, and who held a sale last week, shipped his goods and also departed with the family for Dunnegan, Mo., where he has purchased a farm and where he will make his home in the future.

Making Progress with House The new house which Ira B. Green, of Sidney, Iowa, has been erecting for Mrs. Fred Hanni, now has the roof on and is daily beginning to look like the home it is intended to be.

Cass County Farm Bureau Notes Copy furnished from Office of County Agent Wainscott

State Forester Visits County. C. W. Watkins, extension forester from the college, assisted the agents in putting on an evening program at the Pleasant Ridge Community club Friday night.

Mr. Watkins showed slides of ways and methods of stopping soil erosion by the use of trees, ways of setting out and caring for trees, replanting of forests, care of forests, forest fires and their results, wild game protection by the use of trees, and many other phases of tree planting work.

Seedling trees are again available for planting this year, through the extension service. The cost is \$1.00 per 100 which is to pay for the packing and mailing. Blanks are available at the Farm Bureau office. Order them now.

4-H Clubs Organize. Three 4-H clubs have re-organized for the year's work. They are the Blue Ribbon Baby Beef club, with William Brandt, leader; the Daisy Dairy Club of Mynard, with Noble Kiser as leader, and the Baa-Baa Sheep club with Milford Smith as leader. These three clubs were all active last year and are ready to plunge into this year's work with renewed enthusiasm.

Early Hatching Pays the Poultryman Pullets from early hatched chicks begin laying in the early fall and reach maximum production during the season when eggs are likely to be the highest in price. This is one of the most important reasons for hatching chicks early.

If man would only take Jesus at his word, what wonderful miracles we would see! Jesus is the same today. Man has need to pray: "Increase our faith."

When these enemies of Jesus could not destroy him by fair means, then it must be done by foul means. They are willing to forget their hatred against the Herodian party and make them their allies to destroy Jesus.

In like manner, often the forces of evil combine to destroy the forces of righteousness. See the spectacle today in our congress, to repeal the Eighteenth Amendment. The peril of the present time is not half so great that we are becoming a nation of Sabbath-breakers as that we are becoming a nation of law-breakers.

Oiling Increases Life of Harness Thoro oiling of harness at least

once a year is recommended by the Nebraska Agricultural College. The life of harness can be greatly lengthened by keeping the leather supple and pliable by frequent applications of Neat's foot oil or prepared harness dressing or oil. The harness should be taken apart for oiling. The pieces should then be soaked for about 20 minutes in lukewarm water, followed by a scrubbing of each piece with castile soap and water.

After being washed the straps should be allowed to dry in a warm room for two or three hours. While the leather is still moist, oil should be rubbed into it. If several sets are to be treated, they may be dipped in a tub of oil in which case they should remain submerged about 15 minutes. After removing the harness from the tub, all surplus oil should be wiped off.

Meat Cutting Demonstration. Fifty-nine men in the county are convinced that there is a logical way of cutting up a hog to get the best utilization possible of the carcass. This decision was reached after these men, together with 84 project leaders had attended six training meetings on "Summer Meat Supply." This meat cutting demonstration which was given by the county agent, was witnessed by 164 others aside from the club leaders.

Much of the success in caring for meat depends on the temperature at which it is kept. Meat should be allowed to cool at 38 to 45 degrees for twenty-four hours after butchering, before cutting it for canning or curing. This allows ample time for all animal heat to leave the carcass and increases the ease in caring for the meat.

Homemade Hominy. Have you ever tried making your own hominy? Select a few clean, sound ears of corn, either yellow or white (yellow if you have it as there is more food value in yellow corn) and shell off the nice even kernels.

Boil hot water over the corn and soak overnight. In the morning put the corn in an iron kettle with warm water enough to cover. For each pint of corn put in one teaspoon baking soda. Boil until the hull comes off readily. Wash in clear water. Slip off hulls with hands. Soak the hulled corn in water and wash until alkaline taste is gone. Boil until tender. Salt as desired. Drain off the water or cook it down until concentrated.

This will keep a few weeks if kept cold or it may be canned, and processed, and kept for summer use. Hominy may be used in griddle cakes, as croquette, with sausage or oysters, in casserole with meat as pudding, all of which add a pleasing variety to the meals.

Soap Making. Now that the butchering of the summer meat supply is about over, many housekeepers will find that they have saved fats which are not suitable for food. Such fats should not be wasted but, together with the cracklings, rinds and rancid fats left from last year's lard supply, should be utilized in soap making.

Once you have made your own soap you will appreciate the saving you can effect and the real pleasure there is in making various kinds of soap. Anyone interested in the recipes for soap making may have same by calling at the Farm Bureau office.

REDUCES RATES Because of motor truck competition, the Burlington railroad will make a reduction of about 40%, effective February 1st, in rates for transporting cream, which is the basis of churned butter.

Of perhaps small significance to the lay public, this reduction is important news to thousands of farmers, large and small, whose daily shipments of cream to the big city creameries represent an important and dependable source of revenue, especially during a period when the hard times have so seriously affected his market for crops and other farm products.

The creamery pays for transportation charges in the first place, but deducts the amount from the payment made to the farmer, and since such deductions henceforth will be less, the full benefit of the lower rates will be realized by individual farmers.

The new schedules apply for Kansas, Nebraska and Colorado.

FOR SALE Team of black horses, nine-ten years old. Inquire of John Stirek, La Platte, Neb., or telephone Louis Naeve farm.

A writer says the entire 125 million people of the United States must be jacked up to a higher economic level. Well, all we need is the Jack.

HUNDREDS of Plattsmouth women say that Hinky-Dinky is far the most economical store for their food investments!
